I have to report that the position of affairs in Barwan is much worse than it was as described in my last report, as a fortnight's absence of rain following on a six weeks of drought at one of the most critical periods of the year might be expected to make it. The crop of this thana is almost entirely amun, which the people say must, if a crop of any value is to be obtained, be transplanted out before the 10th Bhadro We have now arrived at that date, and not more than six annas (I doubt if so much) of the seedling rice has been transplanted, and of this not more than half is of good promise. The seedling beds are in two out of five cases almost hopelessly injured from want of moisture, and in the remaining three cases stunted and sickly. At the same time rice prices are from 9 to 10 seers for the rupee. Indeed, I have no hesitation whatever in describing the position as bad, and we cannot be too grateful that in this district at least it is over so limited an area that we have to meet the probability of much distress. The neighbouring thanas of Mouressur and Labpore are very fairly off, and, I am informed, give promise of what is considered a good average crop. Eastward, towards Kandi, things are much the same as in Barwan. I thought it well to see the sub-divisional officer and the Charitable Relief Committee there, who described the condition of that part of the country as much what I had found it to be in Barwan. The three or four miles of country over which I went beyond the boundary of this district was very dry indeed. I mention this as showing that the tract affected by drought is larger than I at first thought, and that consequently prices may go higher, and stop so longer than if the smaller area were alone affected. Charitable relief must be considerably increased in Barwan, as a rather large number of people of the lowest castes, who possess very little land, reside there. I have satisfied myself that this form of relief has been, and is being properly revised and supervised. I have had to cancel only some twenty tickets, and I am not sure that I did not err on the side of strictness in doing so.

R. D. HIME,
Officiating Collector.

No. 947, dated Bankoora, the 24th August 1874.

From—W. R. LARMINIE, Esq., Offg. Collector of Bankoora,

To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit my narrative for the fortnight ending 24th August 1874.

2. Prices have altered but little since the date of last report, and rice is procurable without difficulty in the chief bazars. In pergunnah Moheshra and in the west of Chatna, however, the supply is now insufficient, and arrangements are being made for the sale of Government grain in those parts of the district. The grain will be sold at the rates laid down by Government to shop-keepers in the different relief centres, and these will be bound to sell it at a fixed price to the consumers.

3. The present rates prevailing throughout the district are given below :—

4. The rainfall during the last week has been abundant in most places, and although there may be one or two small tracts still complaining of want of moisture, yet it may be stated generally that the district has had enough rain for the present. The seedlings which have been transplanted so late will not, of course, yield a full crop; but taking everything into consideration, I do not think I am too sanguine in anticipating, always provided the weather continue favorable, a total outturn very little under the average. All the early crops are safe, and the *aous* crop will be a good average one.

5. The improved prospects of the crops have of course acted beneficially on the general condition of the people, and the harvesting of the *jonar* and other early crops has provided food for large numbers. Where cultivation has been completed there is a demand for work, and the manufacturing class still require advances. I forward copy of Mr. Macaulay's report, which refers chiefly to pergunnah Moheshra. The results of his supervision are such as I anticipated; and Mr. Hare, acting under his directions, has been thoroughly successful in bringing the various centres inspected by him into good working order.

RELIEF WORKS.

6. This fortnight's return shows a little further increase in the number of coolies on the roads; this is due to the completion of agricultural operations in various parts. The month now coming on is the worst time for the coolies, but we will be prepared to supply work wherever required.

ADVANCES TO PRIVATE PARTIES.

7. Except in pergunnah Moheshra, grants of grain advances have, I may say, ceased. The total amount actually sanctioned up to date is about Rs. 88,532. It is satisfactory to find that from all quarters reports come showing the amount of good done by these advances, and I have no doubt general relief operations can be brought to a close much sooner than if we had trusted the ryots to the mahajuns, many of whom, indeed, were nearly destitute themselves.

TRANSPORT OF FOOD.

8. Nothing worthy of note.

STORAGE OF GOVERNMENT GRAIN.

9. I submit the usual return showing our receipts and expenditure. This shows the amount actually made over to us by Captain Grant, and is now in excess of our daily needs. The whole consignment will very shortly be stored, and I am now in a position, as I observed above, to sell grain where it is required.

CHARITABLE RELIEF.

10. Annexed is a table giving in detail the numbers relieved. As I prognosticated, it shows a considerable reduction on previous returns. Mr. Macaulay's report gives interesting details on the subject of relief centres and their abuses.

11. After a week or fortnight, I think we may commence closing some of our centres, and the beginning of October should see the end of all purely gratuitous relief. Other forms of relief must probably be continued a little longer, but we should then certainly make our conditions of giving aid as unattractive as possible.

Offg. Collector.

Dated Bankoora, the 23rd August 1874.

From—C. P. MACAULAY, ESQ., C.S., Special Relief Superintendent, Bankoora,
To—The Collector of Bankoora.

I HAVE the honor to submit the following report on the result of my inspection of relief centres during the past fortnight.

2. I have been engaged principally in pergunnah Moheshra where the distress has been greatest in consequence of the successive recurrence of three seasons of comparative drought. My method of proceeding was generally that which I find the Magistrate of Burdwan has recommended to his relief officers, with some trifling additions to which I need not particularly refer. I have opened a complete system of daily reports of the number relieved and the quantity of material in hands, and have provided each centre with store-books and ledgers for the separate record of all transactions under the different heads of jute, cotton, paddy, and the like.

At the 7 centres in the Moheshra pergunnah, the numbers receiving gratuitous relief were until recently excessive, aggregating at one time no less than 6,627 persons. Of these a large number have been summarily dismissed and left to find employment for themselves on the roads or in the fields, while many have been transferred to class C for employment on light labor. These reductions were to some extent made by the sub-committees in pursuance of the orders contained in a circular which I issued shortly after I joined the district in July, and in which I laid down the general principles on which charitable relief was to be administered. I have since carefully checked their operations, and I have not found that the orders issued have been too harshly interpreted. I have to observe that large reductions have now become particularly necessary in view of preventing the abuse of the public charity, as in Moheshra the reaping of the janera crop, and elsewhere the cutting of the chali and tetka rice which has now begun, have given considerable relief. In Moheshra, where there is no aous, the janera crop is very extensively cultivated, and as the outturn this year has been a fair one, about six weeks' food supply has found its way among the people. What is called the *khat* crop, or murwa, khodo, kheri, kang, gundlee, &c., is a large and, as I can say from careful personal observation, a very promising one indeed. It is to be noticed that these staples are consumed in Moheshra by high and low caste persons alike. The able-bodied have now no difficulty in finding employment, and those whose position does not permit them to work at out-door labour are employed in spinning cotton, husking rice, spinning jute, &c. All those who now appear in B class are absolutely unable to provide for themselves. They have always had to look for support to the charity of their neighbours, and the question only remains, when it will be thought advisable to leave them to their original resources. I think that the grant of charitable relief to those people may be safely stopped within a month.

4. I found the condition of the late rice-crop to vary very much in different parts of the pergunnah. The west and south had an average of 10 or 11 annas planted out, the extreme east had about 8, while a central and northern block of about 50 square miles bounded on the south by the Saltora road between Shampore and Assuriya, and on the north by the Damoodah river between Adgram and Mejiah, had not more than an average of 5 annas. In part of this block the situation was certainly becoming critical, and apprehensions were not wanting that the fourth season in succession might also be the worst; but the rain of the last two days has dispelled all present fears, and will enable the cultivators to plant out the greater part of their seedlings. Of course the outturn from a Bhadra crop will not be so large as that from a crop transplanted in Sraban; but though the season will not be one of exceptional prosperity, there is no present ground for believing that it will be one of marked failure.

5. At the close of the last fortnight I reported to you that I had detected a mohurir and a member of a sub-committee in various malpractices. The mohurir is now under trial. Since then I have, with the assistance of Sub-Deputy Collector Baboo Sitikanta Ghose, succeeded in discovering a gross system of fraud at Gogra. I have myself investigated the case on the spot, and find that one of the members of the sub-committee has had the entire working of the centre in his own hands, and that he has not only sold Government rice in his own house and made large presents of it to his relatives, but that he has systematically paid with it the laborers on a work for the completion of which he has taken a *tuccavi* advance from you. He has also regularly sold tickets for relief at the rate of a goat a family. He and the mohurir, who was in league with him, are now under trial. At Kamamari I found that the members had freely admitted their own relatives to relief under the D class, and that festive entertainments had been the order of the day, at which many of the guests, and in some cases the hosts themselves, have been in receipt of charitable relief. I have removed the mohurir and the offending members pending the completion of my enquiries.

No. 352, dated Hooghly, the 25th August 1874.

From—F. H. PELLEW, ESQ., Offg. Collector of Hooghly,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the narrative for the fortnight ending 22nd August 1874. The report has been delayed for the Serampore narrative; it has not yet come. The delay is owing to the sub-divisional officer having gone into the district for the period 19th to 22nd, and subsequent sickness of his clerk.

A.—State of the Country.

2. Abundance or scarcity of food-grains in the bazars.

There is no scarcity of food grain in the bazars.

This is insufficient. The fall of 1·50 occurred between Pundooah and Boinchee, an only over a limited area. In Kristonugger, Haripal, and Chunditilla the rain has slighter than at Hooghly.

Prospect of Crops.

5. The aous rice is good along a strip two miles broad on the banks of the Dam and in the high lands round the Dankoonee jollah; in other parts of the district it i in Haripal, Chunditalla, and Krishtonugger it is much injured by drought and blight.

6. Jute which is grown chiefly within three miles of the Hooghly is generally what little is grown further west is injured.

7. Sugarcane is damaged, except near the Damoodur and Hooghly.

8. As regards the amun crop, the condition of which in certain thanas I had i last narrative to report as being somewhat critical, I regret to state that a personal vation of the crop in all thanas except Ballagurh has satisfied me that it is now u to hope for more than a nominal crop, except in thana Ballagurh. There the cro been transplanted to some extent, but is suffering from drought and requires rain. Thr out almost the whole of the rest of the district, there is no water even in hollows and cha

9. In the Dankoonee jollah, however, the tidal waters have supported up to this ti fine crop of swamp rice. This water should not be allowed to escape till the crop is ready

10. *Condition of the people.*—I have in the diaries of my tours in the district on the 16th, 17th, and again on the 23rd August, stated my opinion that in consequen the failure of rain and the want of agricultural labour distress was rapidly increasing am the laboring population. In my last narrative I reported the commencement of such dis I now beg to state that I consider that it will be necessary to provide relief works for s thousand people for some months to come. I have opened such works as appeared immed necessary, and am daily opening others. It is to be expected also that notwithstandin elimination of undeserving objects, the charitable relief lists will steadily increase. impending distress is in my opinion serious. I have forwarded to-day a copy of a report the sub-divisional officer of Serampore (and of my reply) on the result of a tour of insp made by him on the 19th to 22nd August, in which that officer reports the opening of s teen relief works and describes the condition of the people. I have within the last few been over almost the whole district, and I concur in the view of the sub-divisional officer increased assistance must be given. The food crops sown were on a large scale, and, as l their prospects were fair, people were hopeful. The failure of some of the aous crop and a all the amun has caused much despondency.

11. *Grain theft.*—Two cases are reported to have occurred in thana Pundooah. In both the cases paddy has been stolen from granaries, and the cases are under police inquiry.

12. *Condition of special tracts.*—Thanas Kristonugger and Haripal may be said to be in a specially distressed condition, as compared with other parts of the district.

* Establishment and cost of transport of rice for charitable purpose.

HOOGHLY,
The 25th August 1874.

F. H. PELLEW,
Collector and Vice President,
District Relief Committee,
Hooghly.

No. 2102—F.R., dated Burdwan, the 24th August 1874.

From—E. H. WHINFIELD, ESQ., Officiating Collector of Burdwan,
To—The Commissioner of the Burdwan Division.

I HAVE the honor to submit the Narrative for the fortnight ending this day.

A.—STATE OF THE COUNTRY.

2. The Raneegunge Sub-Divisional Officer says that the supply of rice is sufficient; that it sells at from 10 seers 12 chittacks to 14 seers per rupee; that 2·65 inches of rain have fallen in the fortnight; that about one-third of the amun lands are still unplanted; that sugarcane and til are doing well; that the condition of the people is unsatisfactory; that the attendance at the relief centres has increased; that the condition of the chowkeedars and some of the cultivators is very miserable; that the condition of the people in Raneegunge is believed by the Sub-Inspecting Postmaster to be as bad as that of the people in Cutwa; and that the condition of the people in the coal tract (which lies between Sitarampore and Andal) is not a fair index of their condition in the rest of the sub-division.

The Bood-bood Sub-Divisional Officer says that the supply of rice is deficient; that prices range from 11 seers 13 chittacks to 12 seers 11 chittacks per rupee; that the mahajuns still hold considerable stocks; that 4·08 inches of rain have fallen in the fortnight; that the crops have suffered; that the recent showers have given an impetus to transplantation; that the condition of the people on the whole is good owing to the abundant relief given, though fever is making its appearance; that no cases of misery or starvation have come to light; and that in the case of one grain-theft poverty was pleaded.

The District Superintendent says that the supply of rice at all the bazars in the sudder sub-division is abundant; that prices range from 9½ seers (of good rice) to 12 seers of common rice per rupee; that considerable stocks are held; that the prospects of the crops are fair in Khundghose, Selimabad, and Indoss thanas, to the south of the Damoodur, but not so satisfactory in the northern thanas; that in the east of Gangooria in particular the lands are still unplanted owing to want of rain; and that no cases of starvation or grain-thefts have occurred. The rainfall in the fortnight has been 3 inches.

The Cutwa Sub-Divisional Officer says that the supply of grain is the same as before reported; that there are no stocks of grain; that the rainfall has been insufficient; that the cultivation of paddy in the northern part of Ketugram is very backward indeed; that only a half average crop of aous may be expected; that what aous was sown in North Ketugram has withered; that the land there is parched and broken up in cakes; that the people in this part are much distressed; that the coolies cannot get employment; that the condition of the people in the rest of the sub-division has not improved as yet notwithstanding the relief given; that many of those who have received advances of rice now want more; that there is danger of a water famine; that many of the cultivators apply for relief from the relief centres; and that no emigrants have been registered.

The Culna Sub-Divisional Officer says that the condition of the people is becoming worse day by day; that the prices of the principal food-grains remain unchanged; that dohonagra, rashi, and rakam rice have now disappeared from the markets; and balam, moonghy, and other Eastern Bengal varieties have taken their places; that stocks of locally grown rice are exhausted; that 6·17* inches of rain have fallen in the fortnight; that the prospects of the aous rice (which is very largely grown in Poorbustholi and Culna thanas) are favorable; that transplantation of the amun has been very much delayed by the want of sufficient rain, only one-sixteenth of the amun lands in Culna having been planted up to the present time; that the lower classes are undergoing great privations, and the middle classes are put to great straits by the high price of rice (about 12 seers per rupee); that no cases of starvation or grain-thefts have come to light.

* In his narrative he says 4·08 inches, but from the weekly rainfall reports the figures appear to be those given in the text. E. H. W.

The Jehanabad Sub-Divisional Officer says that the aous crops are ripening, and the crops are doing well everywhere except close to Jehanabad itself, where the rainfall has been unusually scanty; that the rainfall in the fortnight has been 3·72 inches; that supplies of rice have not run short as yet; that prices continue nearly the same as before reported; that no deaths from starvation or grain-thefts have occurred, but a gomashta is accused of plundering a mahajun's gola in order to give advances to ryots; that the commencement of the distribution of rice gave rise to wholesale mendicity, but this has been checked by the elimination of persons able to work, and by enforcement of the cooked food test in the case of all but the sick.

The Executive Engineer, Northern Drainage and Embankment Division, says that during the last fortnight agricultural operations have been going on actively and the available labor has been almost entirely taken up in that way; that in nearly all the sub-divisions there is a tendency to higher prices, but the bazars continue to be well supplied; that more rain is wanted everywhere, and considerable tracts of land are still unplanted; that applications have been made to cut the Damoodur embankment, but permission has been refused, as serious injury might be done by a flood in the river.

The Civil Surgeon, who has been out in the district for about two months, reports as follows:—

"*Fever.*—I examined fever and non-fever tracts. In the worst fever tracts I found that the general health of the people has improved very much; that the fever everywhere was not nearly so severe in 1873 as in previous years; that it is slowly dying out and losing its virulence; that the people, particularly the children, are recovering their former healthy looks, and that up to the date of my inspection of each place and village, no new fever had made its appearance this year.

"*Cholera.*—Since May, cholera has been very prevalent in the thanas of Bood-bood, Ausgram, Sahebgunge, and Munglecote. It still prevails in the Sahebgunge and Ausgram thanas, but has lost its virulence. From time to time native doctors have been sent in all directions to treat cases.

"*Small-pox.*—Has been very severe in thanas Sonamookhy, Ketugram, and Ausgram. In the two former it raged in an epidemic form. Vaccination was extensively carried out. Sonamookhy thana does not come under the Vaccination Act, and the disease was propagated and kept up by inoculation. The inoculators also vigorously opposed the vaccinators. In Sonamookhy about 300 people died of the disease.

"*General Health.*—All throughout the district the general health of the people was satisfactory.

"Dispensaries have been opened wherever necessary; sick diet on medical tickets is issued at each dispensary, and every care has been taken both to save and prolong life. I am happy to state that so far our efforts have been attended with success, and that although I know hundreds of lives have been saved by the relief measures, I could not trace any death to starvation or want.

"We must bear one thing in mind in the fever-stricken tracts of Burdwan. The disease has left many orphans, widows, and people so debilitated that they cannot work or earn a subsistence. There are also a great number of sufferers from old chronic diseases and the *sequelæ* of fever left on our hands. For this reason Burdwan requires more liberal relief and more care and attention than other more healthy districts.

"Although this report is for the month of July, I may here state that since the middle of August fever has increased, and I believe the fever season has now commenced. We are, however, fully prepared for it. Forty-six endemic dispensaries are scattered over the district, and a liberal supply of medicines is in the Burdwan Medical Store."

For my own part, I think there is great cause for anxiety as to the prospects of the crops in some parts, more particularly in the east of the district and in the higher parts of Bood-bood. Though the rainfall has not been below the average at the sudder and sub-divisional stations (excepting Jehanabad), yet it is apparent that the soil is not at present saturated with moisture to the extent that it usually is at this season of the year. Whether from the exhaustion of the tanks in last year's drought, or from the partiality of the rainfall in the present year, the tanks are not nearly so full as usual; the water in the wells stands at a lower level, and the low lands are not nearly so widely flooded as is usual at this time of the year. Transplantation of the amun rice cannot go on for more than a week or 10 days longer, and in Culna, especially, the reports show that very little land has been planted up to date. Were the prospects of the crops more favorable, no doubt the mahajuns would be now unlocking their stores, and prices would be showing a downward tendency; but as it is, I fear no considerable diminution of distress can be expected to take place at present.

B.—Relief Works.

3. These are shown in the accompanying Statement I. Most of the new roads are being turfed.

C.—Transport of Grain.

4. The imports by rail of food-grains on public and private accounts in the week ending August 8th, were 55,508 maunds, and the exports only 1,030 maunds.

D.—Storage of Government Grain.

5. Particulars of this are given in Statement II, and particulars of the consumption in the same statement. No grain has been sold to the public up to date, except the 100 maunds at Kanoo mentioned in the last report. The entry of a sale of 750 maunds at Raneegunge was a mistake, as that amount was used for payment of laborers. There has been some unexplained delay in the despatch of the rice indented for Culna. Reminder will be sent.

E.—Advances to Private Persons.

6. These are shown in Statement No III. I have found it necessary to make some relaxation in the rule requiring at least six ryots to join in an application for an advance. It frequently happens in small villages and hamlets that so many as six distressed persons cannot be found, and in these cases advances have been made to smaller numbers. The principle kept steadily in view throughout has been to make these advances solely to persons undoubtedly in distress and to no others. Advances to zemindars have been made most sparingly, and as a condition of getting them they have been required to produce for

inspection their distressed ryots for whom they professed to be taking the advances. But in spite of all these precautions the numbers of ryots who have received advances is very large. With such a mass of permanent pauperism as that with which we have to deal in this district, the number of persons who have reasonable or plausible claims to share in relief of this sort, when it is being given, is very large indeed.

F.—Charitable Relief.

7. The particulars of this are given in Statements IV and V. Active measures have been taken to scrutinize and revise the lists and turn out undeserving recipients of relief, but the numbers spring up again as quickly as they are reduced. The moment a reduction is effected by one officer, strong representations come in from another that the thing has been carried too far, and that relief operations must be again expanded.

G.—Financial Results.

8. These are shown in Statement VI.

* Refunded by the Deputy Commissioner of Manbhoom.

† No returns received this fortnight.

No. 262, dated Midnapore, the 24th August 1874.

From—H. L. Harrison, Esq., Collector of Midnapore,

To—The Commissioner of the Burdwan Division.

I have the honor to submit herewith the fortnightly report of the Midnapore district for the period terminating 22nd August.

2. On the whole the fortnight has been a favorable one, though the reports enclosed from Tumlook and Gurbetta indicate a want of more rain. More rain was being wanted throughout the district on the 20th, but on the 21st and 22nd rain fell almost incessantly at the sudder station, while as the Cossye is now in flood, so much so as perhaps to cause mischief, very heavy rain must have fallen in the north-west, and probably over the whole district. This will have prevented the crops from deteriorating where they were already good, and have ruined such as were previously drooping.

3. On the whole there is a prospect of an average aous crop, which is almost secured, and a probable average amun crop throughout the district as a whole, though rather above the average in the south and below it in the extreme north-east.

4. To this fair prospect there is one exception, viz., two small tracts of 40 or 50 square miles each, at the very north of thanas Chundraconah and Ghattal. Here the Deputy Collector reports that there will be a great deficiency in the amun crop owing to the exceptional want of rain. It has had rain since, but so late that it will most likely prevent the crop from being an average one.

5. Rice has remained stationary in price during the fortnight, and has fallen a little in the extreme west. It seems probable that it has now reached its maximum, and will begin to fall after another fortnight.

6. The roads still give employment to a large number of laborers, especially the Ghattal and Chundraconah road, which is being made pucca, and which gives work to 1,130 laborers daily, more than double the number engaged upon it three months ago.

7. Distress among the Tantees continues of course to increase, and must do so till prices fall. The depôts are constantly examined and unworthy recipients turned out; but in spite of this the number tends rather to increase.

8. The daily average is as follows:—

	Men.	Women.	Boys.	Girls.	Total.
Chundrconah	108	199	109	73	489
Kheerpoy	30	50	14	19	113
Radhanuggur	23	198	72	64	357
Daspore	7	39	13	13	72
Rajnugur	11	61	44		116
					1,147

9. A mistake was made in last fortnight's report as respects the numbers attending the Chundraconah, Kheerpoy, and Radhanuggur depôts. The clerk copying the statement seeing the words "daily average" concluded that the figures given were for the entire week, and divided them by 7; hence only one-seventh of the true attendance was shown.

P. S.—The flood in the Cossye only *began* to subside at 10 A.M., Monday, and a pucca bridge on the Gurbetta road has been carried away. Evidently the rain has been *very* heavy towards the north-west.

No. 365, dated Howrah, the 24th August 1874.

From—J. B. WORGAN, ESQ., Offg. Covenanted Deputy Collector of Howrah,
To—The Commissioner of Burdwan.

I HAVE the honor to submit the weather and crop report ending Saturday, the 22nd instant.

2. The *rainfall* at the sudder station was—

1st week	2·05
2nd week	2·35
Total for fortnight ...	4·40

The District Superintendent's reports show that there was more or less rain throughout the district, but they also show that there has been far from enough; and it appears that the transplanting of the amun dhan crop is terribly thrown back from this cause. I may mention that since the close of the period to which this report refers there has been heavy rain *here*. The Court Inspector's Raneegunge register shows from 6 P.M. on Saturday to 6 P.M. yesterday (Sunday) 1·82. This fall Mr. Reily, who has made arrangements for early information, reports to me as having been general throughout the district.

3. The *price of common rice* in the first week of the fortnight rose at Khanakool, Ampta, and Bagnan, and fell at Doomjoor.

In the second week it rose at Bagnan and Oolooberiah, and fell at Khanakool and Shampore. The highest price still exists at Juggutbullubpore, viz., 10⅔ seers per rupee. Next after this comes Ampta with 11 seers; then Sunkrail, 12¼ seers; the cheapest market being at Doomjoor, 14¼ seers.

4. As respects *relief expenditure*, the District Superintendent's report of the 14th instant shows Rs. 4-10-6, given to 24 persons in Ampta thana; 8 annas to one person in Doomjoor; Rs. 1-4-6 to eight persons in Juggutbullubpore; and 8 annas to 4 persons in Khanakool; or in all Rs. 6-14-6, given to 37 persons. His report of the 22nd instant shows Rs. 7-3-9, given to 52 persons in Ampta; Rs. 1-12 to 12 persons in Khanakool; and Rs. 11-15-6 to 186 persons in Juggutbullubpore; or in all Rs. 27-13-9, given to 287 persons in the fortnight. The figures of relief through the police for the fortnight (as far as accounts received by the District Superintendent, or up to the 18th instant) thus show an average number of persons receiving charitable relief of 20 roundly per diem.

5. As respects the Khanakool Relief Committee, the Deputy Collector of Moheshrekha has furnished figures for the *fortnight*, showing Rs. 28-5-3, spent on a daily average of 31 persons.

6. The Juggutbullubpore Relief Committee have not up to the present time had any money entrusted to them, and beyond the proposition that certain gentlemen should be asked to act on that committee, I do not think* that anything has been done.

I say *think*, because the papers on the subject are not complete, and I am uncertain till I can get them straight.
J. B. W.

7. The *statement of expenditure* in form B for the month of July 1874 for the district was ready; but I have just discovered that one of the statements on which it was made out, namely, the District Superintendent's, has been drawn up on an erroneous principle, and I have had to return it. Immediately on its receipt I shall submit the statement for the district. The statement up to the end of June has been already forwarded.

8. The submission to Government of the returns of laborers called for in Resolution No. 5718 of the 3rd December 1873, has been dispensed with, but perhaps the matter may not be without interest to you. Mr. Well's return shows 65 men employed in Howrah on the branch Grand Trunk Road and 220 men on the Juggutbullubpore road.

9. There is nothing to report under the Land Improvement Act.

10. As respects the present *general condition of the people*, I think that in some parts of the district there is reason for apprehension. The Deputy Collector of Moheshrekha writes far from hopefully of thana Khanakool. A great extent of dhan or high lands is said to be in danger of being lost, and the number of persons coming on the hands of the Khanakool Relief Committee is reported to be gradually on the increase. Much sickness is prevalent in the thana, and two native doctors have been deputed within the last 3 days, on my requisiton, to the thanas of Ampta, Oolooberiah, and Shampore.

11. Affairs are still more critical in Juggutbullubpore. The District Superintendent has just returned from a visit to the Oolooberiah, Shampore, Ampta, and Khanakool thanas, and thinks that with the recent heavy rain those thanas may pull through; but in Juggutbullubpore prices have long been very high, and the rain very scanty, and indications of distress are apparent. I have sent out Sub-Deputy Collector Baboo Deno Nath Dey to specially enquire into three petitions that have been presented since the 19th instant by some 200 ryots and laborers of 39 villages, asking for enquiry into their circumstances and assistance, and shall write further when I know more on the subject. The difficulty with this thana is its inaccessibility. The road is at present, I am informed, impassable for wheeled traffic, and there is no water-carriage up to the thana.

No. 1952, dated Purulia, the 28th August 1874.

From—Colonel E. A. Rowlatt, Deputy Commissioner of Manbhoom,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Department.

With reference to paragraph 3 of Government Circular No. 154—S.R, dated the 16th January 1874, I have the honor to submit my fortnightly narrative up to the 22nd instant.

A.—State of the Country.

During the fortnight ending the 9th instant, the rainfall only amounted to 1·80 inches, and consequently from the want of water in the fields transplanting operations were very much retarded, and in some of the central and south-easterly pergunnahs quite put a stop to. The crops of early rice, gundli, kodo, and Indian corn on the high lands were also beginning to suffer, when happily the rains came on again on Saturday evening, the 22nd instant, and changed the whole state of affairs, which was daily becoming critical, and the prospect of securing good crops very doubtful indeed. A good downpour of rain having taken place during Saturday night and Sunday, all fears for the present have passed away, and should the weather continue favorable, it is pretty certain that the crops will be more than ordinarily good. The gundli and Indian corn are now being gathered, and are yielding excellent returns; these will be followed by the murwa, kodo, and gora rice, all of which will be harvested by the end of September. Cotton and sugarcane are also doing well. In fact, our present prospects could not be better, and as a much larger area has been cultivated with early crops than is usually the case, food will no doubt be plentiful again early in October, and prices fall.

From Govindpore the Relief Officer, Mr. H. W. Mackenzie, reports,—"Although there has not been a very heavy fall of rain within the fortnight under report, yet there has been enough to enable the cultivators in most parts of the sub-division to all but finish the transplanting of the seedling paddy, and the rice crop, though a late one, appears at present to be all that could be desired. The jonair (maize) and other rubbee crops are, as has already been stated, unusually good; even on poor lands where hardly anything would grow last year, there are fair crops of gundli, kodo, cotton, &c., this year, and, should the weather continue favorable all through September, most of the grain crops ought to yield a large outturn." The goodness of the crops on the poorer class of land may perhaps be partly accounted for by their having produced little or nothing last year, showing how necessary it is that these kind of lands should be allowed to lie fallow occasionally, where high manuring is not resorted to.

Writing before the rain had again set in on the 22nd instant, the Relief Officer of the Roghoonathpore Western Circle, Captain W. L. Samuells, states,—"Eastward of Roghoonathpore the rainfall has been wholly insufficient for agricultural purposes, and a large area of up lands, which had been set aside for transplanted rice, lie dry and fallow; and what rice was sown broadcast on lands similarly situated, has entirely failed, and several days of heavy and continuous rain will now be required to complete the transplanting operations and save what has already been planted out on the high lands. The rainfall, aided in many places by irrigation, has been sufficient to keep the low lands well flooded, and the crops so situated are looking well. The bhadoi crops everywhere are good. In pergunnahs Mehal and Para, they will certainly have a 16-anna bhadoi crop. They have never had such bhadoi crops before, and fortunately for the poorer classes, who principally subsist on the bhadoi produced; the area bearing such crops is very much

larger than it has been in previous years; in some places five and six times as much. Since the above was written, rain has fallen freely in the Roghoonathpore Circle, and the prospects of the late crops have no doubt improved there as well as everywhere."

Regarding the Purulia Circle, Mr. R. D. Hare, writing on the 24th instant, reports,—"I am happy to find myself in a position to make a most favorable report of the prospects of the crops, and the general condition of the people of all classes in my circle. Sufficient rain has now fallen to ensure the completion of the transplanting of the bád and higher kanali lands, which still lay unprepared to receive the young paddy plants up to the date of my last report. All broadcast crops are doing well, and the area of high land under cultivation is so much above the average that should the season continue favorable it is confidently expected that this year's harvest will exceed what has been experienced for many years."

The reports which had hitherto been most unfavorable from the Manbazar Circle, and where another year of scarcity was being anticipated, are now better again, as rain had also fallen in that direction, which will enable the cultivators to complete the cultivation of their rice lands, a large portion of which was still lying fallow.

Regarding the condition of the people, the accounts are now generally very satisfactory, and the numbers applying for relief or work on the relief works are steadily on the decrease. Some few of the cultivators are still applying for small loans of Government grain to enable them to complete work in their rice fields; but loaning operations have nearly ceased, and will be finally closed in a few days more. From Gobindpore it is reported—"The general condition of the people is satisfactory; those who at one time were nothing but skin and bone are now, thanks to the liberality of the Government and the charitable public, in a very different condition; and to judge from their appearance, one would scarcely imagine that they had at one time been on the verge of starvation."

The same may also be said of the people all over the district; and from Roghoonathpore it is reported that in another month all those receiving relief will be fit to return to their former modes of life.

Crime, I am glad to say, continues abnormally low, and employment everywhere pretty abundant, though, as a rule, the cultivators are employing fewer hands than usual, and doing more work themselves on the fields than formerly.

The general health of the people is good, and both cholera and small-pox, which were prevailing to a considerable extent in June and July, as well as slight fevers, which were very common, especially in the town of Purulia in the early part of the month, are now disappearing.

The usual table showing the price of rice and pulses, as given by the police up to the 22nd instant, is given below:—

Names of Bazars.	Coarse Rice.		Fine Rice.		Pulses.	
	Last report.	Present report.	Last report.	Present report.	Last report.	Present report.
	Srs.	Srs.	Srs.	Srs.	Srs.	Srs.

Nirsha	12	11½	11	11	11	11
Gourandih	12	12	11	11	10	10

The only place where the price of rice has been affected by the reaping of the early crops is Raipore, where a crop is harvested much earlier than in any of the other parts of the district. A slight fall had also taken place at Jhalda; but at Roghoonathpore prices have risen higher than they had ever been before, which was no doubt caused by the very unfavorable weather which had prevailed up to the 22nd instant, which then threatened to bring about another year of scarcity.

B.—Relief Works.

Since the date of the last fortnightly report all the works, being carried on as a means of relief on the village tanks, have been closed as owing to their having partially filled with water, and but few persons having resorted to them, it was found unadvisable and unnecessary to keep them going any longer; the laborers were all being paid in grain, but small sums in cash had to be disbursed as pay of the overseers employed in carrying on the works, which, now that these works have been stopped, has ceased. The grain expended during the fortnight amounted to maunds 38-34-3 up to the 21st instant, when the work on the last tank was closed. These minor works have been the means of affording great relief to many who, urgently requiring employment, were not able to leave their villages to work at a distance. Altogether 62 tanks have been

deepened and cleared out, and in these the supply of drinking water will have been very much improved, which will no doubt add to the comfort and health of the villages in which they are situated.

Advantage has also been taken of the harvesting of the early crops, and the employment obtained by the people in the fields to abolish the contract system on the roads, and reduce the number on which work was carried on to give employment to the people. It is now proposed to limit our operations to those roads which follow the most important lines of traffic, and which are the most advanced, and complete these lines as soon as possible, and for carrying on which our present small establishments will nearly suffice, which they would not have done, when very large bodies of laborers had to be employed, and work had to be carried on along a much larger number of lines scattered about all over the distressed portion of the district. Rice has been stored all along the roads on which work will now proceed, and as all ordinary labour will continue as heretofore to be paid solely in grain, no cash payments will have to be made except for plant and tools, which, as far as required, will be purchased from the late contractor's stores, and partly to carpenters and bricklayers, and to the supervising and directing establishments.

The quantity of grain expended on the roads will be accounted for hereafter in the stock accounts.

C.—Transport of Government Grain.

The only grain that has been moved during the fortnight is a portion of the last allotment of 30,000 maunds to Purulia; of the 15,000 maunds of this which has to be conveyed to the sudder station, maunds 12,244-30 has been received, and the balance it is intended to keep at Roghoonathpore, where there is good storage room, till it is required for expenditure on the roads in the Purulia Circle. No difficulty has been met with in procuring sufficient carriage, and all has been delivered in good order.

D.—Storage of Government Grain.

Grain has now been stored all along the lines of road in the Roghoonathpore Circle on which it is proposed at present to continue working. A small quantity has also been stored at Chandankiari, in pergunnah Khaspel, from which the laborers will be able to procure the grain on the Roghoonathpore and Chas road, after it passes westward out of the Roghoonathpore Circle. For the roads in the Purulia Circle, it is proposed to send out grain as required to the different places where work will be going on, and about 2,000 maunds will be sent to Manbazar for use on the roads in that direction, as soon as the weather and state of the roads will admit of its being conveyed there without risk. The transfer of all that was required to be sent from Govindpore to Arta, in Khaspel, has been completed.

E.—Advances to Private Parties and their Results.

There have been no advances in cash made to any parties at all during the fortnight.

The loaning out of Government grain to cultivators and non-cultivators on security, together with gifts to chowkeedars and the quantities issued to tabidars employed on relief duty during the last fortnight, and the total up to the 22nd instant was as follows:—

The number of persons receiving uncooked rice from the Group Officers is given in the margin for each circle. The decrease is also similarly given, showing a total decrease of 2,459, which is the first time that a decrease of the whole numbers thus relieved has occurred, and which may now be confidently expected to continue at an enhanced rate.

(*b.*) Charitable Relief by Relief Committees.

According to the returns submitted by the Relief Officers up to the 22nd instant, the sums expended during the fortnight classified as directed by the Central Relief Committee are as follows:—

	B.	C.	D.
	Rs. A. P.	Rs. A. P.	Rs. A. P.

Total ...	1,358 5 11½	851 9 0	421 9 11½

The number of persons receiving relief according to the above classification during the fortnight under report was—

	B.	C.	D.
In the Govindpore Circle	526	.....	.....
„ Roghoonathpore, Western Circle	391	614	.....

„ Purulia Circle	284	121	131
„ Manbazar „	128	102	89
Total ...	2,245	976	220

Compared with the returns of the previous fortnight, there has been a decrease in the numbers receiving relief from the Relief Committees amounting to 5,913, which, added to the decrease of those relieved by the Group Officers, makes a total decrease of 8,372, which is a satisfactory sign that the condition of the people is now improving, and that more prosperous times have commenced. In my next narrative I hope to be able to show a still greater decrease in the number of persons still requiring relief.

No. 48M.A., dated Calcutta, the 25th August 1874.

From—LORD H. ULICK BROWNE, Commissioner of the Presidency Division,

To—The Offg. Secretary to the Government of Bengal, Scarcity and Relief Dept.

IN continuation of my letter No. 45M.A., dated 11th August 1874, submitting the fortnightly narrative of the Collector of Nuddea for the fortnight ending on 8th August 1874, I have now the honor to submit the Collector's report* for the fortnight ending on 22nd August 1874.

* No. 932—S.R., dated 24th August 1874.

2. The prospects of the amun crop are at present very unsatisfactory, and it is specially unfortunate that the worst tracts this year seem likely to suffer most next year.

No. 932—S.R., dated Kishnaghur, the 24th August 1874.

From—C. C. STEVENS, ESQ., Collector of Nuddea,

To—The Commissioner of the Presidency Division.

I HAVE the honor to submit my narrative of scarcity and relief for the fortnight ending with Saturday, the 22nd instant.

1. The supply of food-grains in the principal marts of this district continues the same, and is in most places adequate to the demand. The new rice is being harvested and used for private consumption. In some places it is coming into the market. The stock in thanas Karimpore and Tehatta, in sub-division Meherpore, and in thana Jaguli and part of Ranaghat, in sub-division Ranaghat, is reported to be low, but it is expected that the new rice will be reaped so soon that no inconvenience is likely to be felt.

2. The subjoined statement will show you the kind and prices of some of the food-grains selling at the principal marts of the district :—

	Common rice.	Kalai.	Mug.
	Rs A. Rs. A.	Rs. A.	Rs. A.
Kooshtea	2 8 to 2 12	2 0	2 12
Commercolly	2 8 to 2 12	2 0	2 12
Santipore	2 12	2 2	3 0
Ranaghat	2 14	2 8	3 0
Chagda	2 13	2 5	3 0
Bongong	3 0	.....	.....
Kishnaghur	3 12	2 8	2 4
Chooadangah	2 10	.....	.....
Alamdangah	2 10	.....	.....
Meherpore	2 14	.....	.....
Tehatta	3 0	.....	.....
Karimpore	2 12	.....	.....

From the above, it will be seen that the price of the common rice has generally fallen a little. This is to be attributed to the appearance of the new rice in the market.

3. The deficiency of rain has done much to injure the aous crop, which was at first very promising. In the northern parts of the distressed tracts, and in some parts of sub-division Ranaghat, it is estimated that the outturn of aous will not be more than an eight-anna crop. In other parts, considering the increased area of land sown with early rice this year, the yield will not, on the whole, fall short of the average crop of an ordinary year. Owing to the scantiness of rain, the transplanting of amun has been much delayed; up to date it is estimated that not more than quarter has been transplanted. Jute is doing well; sugarcane, til and arhar are generally thriving; indigo promises well; chillies and other crops are so far good.

4. Distress has somewhat decreased. No special cases of misery or starvation have been reported. For the present the pressure is decreasing, and I do not think that aid is required anywhere when it is not being given.

5. No marked decrease in the revenue of excisable articles is observable, though the rise in the price of rice has had some effect in diminishing their consumption.

6. The people have all along been hoping that their difficulties would come to an end with the arrival of aous harvest, but the extreme scantiness of rain has somewhat changed the aspect of affairs, and the people of all classes are apprehensive of the recurrence of the distress in the coming year. It is most unfortunate that the very tracts which have been suffering much seem likely to suffer again.

7. No more relief measures are required in the north and east of sub-division Meherpore. I have in my previous narrative informed you of the inconvenience caused by the non-arrival of Government rice, and the subsequent arrangement made by Mr. Toynbee to despatch a fresh shipment. I am glad still to be able to say that no fatal results followed the temporary diminution of relief works, though I am assured that a little more delay would have caused a great suffering. Owing to the unpropitious character of the weather, the crops have been thrown back, and it has not been found possible to reduce very greatly the extent of relief, though the officers in charge of the operations are bearing this matter in mind.

8. As before, the construction of village roads and embankment is going on in the distressed parts; but reaping of the aous harvest is gradually reducing the number of laborers on relief works. The number of persons now employed on relief works may be estimated at 3,000 per diem.

9. As has been reported before, charitable relief is being distributed both in the Debogram and Mooragatcha aids. No material alterations have been made of distribution since the submission of my last narrative.

STATEMENT OF THE BURDWAN MAHARAJAH'S RELIEF OPERATIONS FOR THE FORTNIGHT ENDING 22nd AUGUST 1874.

BURDWAN.

The very high daily average of 1.671 persons has been maintained during the past fortnight at the Sudder Billa, Burdwan. No acute distress has shown itself, and no particular cause is assignable for the increase beyond the natural pressure experienced by the people as the period of distress is extended.

KEDINA—HOOGHLY.

A slight decrease shows itself in the numbers who have received cooked food, but on the other hand the number of persons receiving raw rice has risen to 250 daily. The relief is being distributed in accordance with lists supplied by Mr. Pellew, the Collector.

BOOD-BOOD.

There is nothing specially worth recording about Bood-bood. There is a complaint, however, that the Relief Superintendent of that place is not sufficiently discriminate in his distribution of relief tickets, and that many of those who, in accordance with his request, receive raw food, have not the slightest appearance of distress. It certainly does appear that when these officers are not responsible to Government for the amount of rice expended, they are most careless in their work, granting tickets to all applicants without inquiry or investigation into their cases.

CULNA.

In Culna things have been going on much as they were. No distress, and only old and infirm persons taking rice at the Sudder Billa, with the exception of a few able-bodied women, who are made to work for their food. Raw rice has been distributed daily to seventy-two respectable persons.

Culna Outlying Depôts.—Within the past fortnight the five depôts mentioned in the last statement have been opened. The places were selected in accordance with the suggestion of the Deputy Magistrate; Gram Culna, Jehetta, Manekhar, Kusbedanga, and Kadliparah, being chosen. It was at first intended to distribute food according to the lists of the Relief Superintendent, but that officer's mode of procedure was so peculiar that the idea had to be abandoned. The Relief Superintendent apparently writes down the name of every person in a village as a fit object for charity, his list for one small village giving 1,064 names, for another 1,000, and so on; so that had relief been distributed to all the persons recommended by him, the amount of rice required for these five small supplementary depôts would have been greater than that required for all the other places where depôts are established, including Burdwan, where 1,660 persons are fed.

If this officer has the distribution of Government rice, it is possible that some waste may occur. The darogahs of the depôts have been ordered to distribute only to old, infirm, and sick persons, and young children, and to cases of real distress, should any occur. This order has been given in accordance with the Commissioner's request conveyed to the Maharajah.

Relief Works.—About 260 persons have been daily employed on relief works. One hundred and thirty-five have been employed on roads at Culna, sixty-five on roads at Burdwan, and the rest, about sixty, on tank-works.

A tabulated statement showing the daily average of persons relieved at various places is annexed.

RAJBARI, CULNA, the 26th August 1874.

M. C. BURDWAN, *Maharaj Adheraj.*

* In addition to those at Culna and Sudder Billa, there have been about 1,500 persons fed daily at outlying depôts, viz.—

Gram Culna	300
Tehetta	300
Kushedanga	300
Manikhar	300
Kadhparah	300
Total	1,500

This increases the grand total of persons daily receiving relief to 5,898.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 5th September 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
BURDWAN DIVISION. 1	Burdwan, 7th* Sep. 1874	2·11	Rain at Jehanabad ·19, at Cutwa 1·17, at Culna ·8, at Bood-Bood 1·16, at Raneegunge 1·29. Weather cloudy. Prospects of crops in the north and east bad, in Raneegunge and to the south of the Damoodah fair. Fever as before.
2	Bankoora, 5th " "	1·70	Showery. Prospects of crops favorable on the whole. The aous or early rice crop is beginning to ripen in some places. Other crops doing well. General health good.
3	Beerbhoom, 5th " "	2·25	Showery. State and prospects of the crops west of the Railway continue excellent; east of the Railway short crops. In Division Burwan widespread failure anticipated, owing to want of timely rain. No export by rail during the week ending 29th August. An active private import has commenced. Prices almost stationary.
4	Midnapore, 5th " "	·99	Fine, with occasional and very partial showers till Friday the 4th, when rainy weather appears to have again set in. The dry weather, which extended from August 23rd to September 4th, has been too prolonged, and rain is now everywhere required. No mischief has been done except in the north-east (Sub-division Gurbeta), where there will be great failure of the amun or late rice, if the future rainfall is unfavorable, and a short amun crop at the best. In other parts of the district, the reports are that damage will ensue unless rain falls soon; but it may be hoped from the appearance of the sky that some rain has fallen everywhere, during the last 24 hours, and that more will follow. The dry weather has checked the fall in prices which had set in, and there is a slight, and the Collector hopes only temporary, reaction. The aous or early rice is coming into the market, but not in sufficient quantity as yet to affect prices.
5	Hooghly, 5th " "	·09	The weather has been hot. No rain till Friday night, when a slight shower fell. Prospects of the crops as last week, *e.g.*, the amun or late rice bad over three-fourths of the districts. Aous or early rice damaged in parts; a fair crop expected. Reaping about to commence. Jute good.
	Howrah, 5th " "	·65	There has been a shower of rain in Sankrail, Oolooberiah and at the Sudder Station during the week, but no rain in other stations in this district. Weather sultry. Wind from south-east. Want of rain has been general in this district during the week. Lands are being prepared for the transplanting of amun or late rice seedlings; in most parts of the district transplantation is progressing, but it is greatly retarded in Domjoor, and especially in Jugutbullubpore, for want of rain. The general cry is for more rain. The ryots have commenced cutting aous or early rice crop. Jute and sugarcane healthy.
	Central Districts.		
PRESIDENCY DIVISION. 6	24-Pergunnahs, 7th† Sep. 1874.	4·26	Close and very hot. The harvesting of the aous or early rice continues. There was heavy fall of rain at Alipore and Barrackpore on the 6th, but it is not yet known whether it has been general throughout the district. Prospects of the amun or late rice crop are not hopeful. Fever still prevalent in the Barripore, Busseerhaut, and Satkhira Sub-divisions. It has abated in Diamond Harbour.
7	Nuddea, 5th Sep. 1874	2·16	There has been heavy rain at Head-Quarters, and in the north of the district; elsewhere the rainfall has been scanty. The yield of the aous or early rice crop throughout the district will be nearly, if not quite up to, the average. The amun or late rice crop on the higher lands is still suffering from want of rain. Heavy floods are reported in the Chooadangah Sub-division. The Collector has gone there to ascertain the actual state of affairs.
8	Jessore, 5th " "	·10	The weather has been throughout the week generally dry. Cry for more rain is general. Transplantation of amun or winter crop is nearly finished. Prospects hopeful. Aous or early rice crop is being harvested; a fair outturn is expected. The crop in low land is damaged by inundation.
RAJSHAHYE DIVN. 9	Moorshedabad, 5th Sep. 1874.	3·51	Two inches and a quarter of rain fell on the 3rd, and one inch on the morning of the 5th; the former fall was general and extended over Bhurutpore, Kalleangunge, and Khurgaon. It is, however, reported that it has not been sufficient in the first two thanas for transplantation. The rivers are overflowing everywhere. The Bhagiruthee now covers the bund at Laltikooree, and it is much feared that the latter will give way. The latest reports state that the bund shows signs of breaching. The late rice crop has been greatly benefited by the recent rain.
10	Dinagepore, 4th Sep. 1874.	1·25	There has been heavy rain in some parts of the district. Wherever rain has fallen, the prospects of the hymunti or late rice are excellent, even in some places where there have been only showers, no permanent damage has been done.

* Telegram of the 7th September, received on the same day, shows rainfall during the seven days immediately preceding.

† Report of the 7th September, received on the same day, shows rainfall during the seven days immediately preceding.

		Central Districts.—(Contd.)		
RAJSHAHYE DIVISION.—(*Contd.*)	11	Maldah, 5th Sep. 1874	4·03	Cloudy, rainy, and sunny alternately. Heavy showers of rain on Tuesday and Thursday. The harvesting of the early rice crop is still going on. In some places, however, a portion of this crop has been submerged and destroyed. Prospects of the late rice crop are fair, owing to there having been rain in the "Borind" during the last two days.
	12	Rajshahye, 5th " "	2·47	There has been good rain throughout the district, sufficient to be of great benefit to all the rice crops, except in a part of Bhurind, where still more rain is needed for transplanting. In Nattore and Pootea a good deal of aous or early rice has been lost by inundation. The prospects of the deep water amun or late rice are decidedly good at present, and the transplanted paddy is also looking well. In the north of the district a quantity of aous is still uncut, and there is every promise of its giving a plentiful harvest; all other crops are thriving. In some places 20 seers of rice for the rupee are procurable, the prevailing rates being from 15 to 20 seers.
	13	Rungpore, 4th " "	4·37	Heavy showers on the 1st, 3rd and 4th, and there is great promise of more. The copious rain, if it continue, will save the amun or late rice crops. Reports coming in seem to show that the fall has been general. The reports on the state of the transplantation have continued to be bad hitherto, but an improvement may now be looked for.
	14	Bogra, 5th " "	2·20	The prospects of the amun or late rice still continue favorable. The rainfall generally over the district has been seasonable, but there are complaints from the thana of Shibgunge. As yet there is no reason to apprehend that there will be a deficient late rice harvest. Health of the district good.
	15	Pubna, 5th " "	5·38	Heavy rainfall on the 3rd September. The late rains have been favorable to the amun or late rice crop on high lands. The harvesting of the aous or early rice has been finished. The overflowing of the river Pudma has swept away the amun or late rice crop of a tract of low land situated on the opposite side of Issamutty river, and to the west and north of Pubna station. Fever still prevalent.
COOCH BEHAR DIVN.	16	Darjeeling, 4th " "	6·09	There has been rain every day throughout the week. Since Wednesday it has fallen in torrents. In the hills the early maize and murwa (millet) are being reaped; potatoes are also coming in. All have turned out very well. In the plains bhadoi or early rice is being harvested, and a good outturn is expected. The prospects of the winter crops are very good.
	17	Julpigoree, 4th " "	6·88	Weather most favorable. Heavy rain last two days. All crops promise well.
		Cooch Behar, 3rd " "	2·50	Cloudy and showery. The prospects of the amun or late rice crop continue to be very good in most parts of the State.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 7th* Sep. 1874	1·01	Weather cooler and more rain. Crops favorable. Heavy rain reported from north, and crops generally flourishing.
	19	Fureedpore, 5th " "	1·18	Alternate rain and clear weather during the week. The rivers continue rising, and the amun or late rice crops promise a fair outturn everywhere, except in Thanas Sudderpore and Deora, and in the Madareepore Sub-division, where the water is falling, which is likely to do harm if it continues. The fact is that the rise is from the Ganges and not the Brahmapootra. The latter is the larger river, and on it depends very much the height of water in the lower Delta. Price of coarse rice is stationary at Gopalgunge, but has risen at Fureedpore, Goalundo, Madareepore and Bhangah, owing to decrease in imports.
	20	Backergunge, 3rd Sep. 1874.	0·12	Very hot. Prospects fair, but rain is wanted.
	21	Mymensingh, 4th Sep. 1874.	3·07	Seasonable showers. Whatever anxiety there may have been, must now be considered past. Though a considerable portion of land intended for the late rice must remain unused, still enough has been done to yield a fair average harvest, of which there is at present a good prospect.
	22	Sylhet, 1st Sep. 1874	1·24	Pretty cool, but the weather is very unusual for this time of the year, from the small quantity of rain which continues to fall. Amun or late rice crops on low lands good; those on high lands and the kataria crop will turn out indifferently if more rain does not fall in the next fortnight. The transplantation of the sail crop is backward from want of rain. Cholera and fever still prevalent.

* Telegram of the 7th September, received on the same day, shows rainfall during the seven days immediately preceding.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)			
	Eastern Districts.—(Contd.)		
CHITTAGONG DIVN. 23	Chittagong, 3rd Sep. 1874	·69	Hot and threatening, but clouds continue to pass off. Cutting of the aous or early rice still going on. More rain required for transplanting amun or late rice, which is behind hand. High tides at Kutubdea on the 26th and 27th, but little or no damage experienced. No report from Cox's Bazar. Cholera prevalent at Harbaug on the south of the district.
24	Noakholly, 3rd „ „	1·05	Rain on Friday and Saturday; none since. Weather very warm. The aous or early rice has nearly been reaped, and the accounts of the harvest are generally satisfactory. More rain is wanted for the amun or late rice.
25	Tipperah, 4th „ „	1·01	Hot and sultry; very still and close atmosphere; only slight rain. The outturn of the aous or early rice very fair. More rain much required for the amun or late rice.
26	Chittagong Hill Tracts, 1st Sep. 1874.	1·2	Excessively hot throughout the whole week. The paddy is being reaped in the jooms. Transplanting operations are over. A fall of rain would be beneficial to the plough cultivators. The cotton pods have formed, and the prospects are good.
	Hill Tipperah, 4th Sep. 1874.	0·53	The crops in some parts are looking scorched for want of rain; transplanting in low lands still going on.
BEHAR.			
PATNA DIVISION. 27	Patna, 7th* Sep. 1874	3·04	Weather partly cloudy, and partly clear, with heavy showers of rain at intervals. The crops on high grounds are coming up very well, and promise an abundant harvest; those on low lands have been damaged to some extent by the late floods. Health good.
28	Gya, 5th „ „	2·18	Seasonable weather. Prospects of crops everything that could be desired; the late rains being succeeded by genial sunshine.
29	Shahabad, 5th „ „	3·15	Cloudy and showery, with variable wind. In the Arrah and Buxar Sub-divisions, the prospects of the crops are good; some damage has been caused by the late floods, the extent of which will be carefully ascertained. No return from Sasseram Sub-division. In Bhubbooah a loss from flood and excessive rain of one anna is reported of the bhadoi or early crops. On the Plalian the loss is estimated at four annas from the same causes. This estimate is rather above than below the mark. Health of the district good.
30	Tirhoot, 5th „ „	0·80	Hot and cloudy. In the Hajeepore Sub-division, the dearah crops almost entirely destroyed by the floods. The Gunduk floods at Hurrowli have not caused the damage anticipated, owing to sudden fall in the river. In the north of the sub-division rain much wanted to save the dhan, but a yield of other bhadoi crops to 10 or 12 annas may be expected. Two inches of rain fell in the north part of the sub-division on the 2nd instant. In the Durbhunga Sub-division showers have fallen, generally to the improvement of the later sown bhadoi. The rain, although in most places insufficient for transplanting dhan, has freshened up the high land dhan that was formerly in a languishing condition. The rain has greatly improved the condition of the bhadoi crop in Warrisnagore, where now 10-anna crop is secure. Towards the north and west, there, too, the dhan has been much benefited; generally the position is satisfactory, compared with what it was a fortnight ago. A considerable quantity of dhan still remains to be transplanted. In the Mudhoobunnee Sub-division, prospects of aous and gamrhi becoming worse and worse. Paddy languishing for want of sufficient rain. Field work entirely stopped, owing to the continued drought, while the time is over during which transplanting can be carried on with advantage. With rain soon a 12-anna crop may yet be obtained. Without rain during the next fortnight, the paddy will almost entirely fail. In the Seetamurhee Sub-division, there has been good rain during the week. At Dynchuprah and Poopri, there was 2 inches on the 31st. At Damra, over 2 inches on the 1st instant. This rain has given hope to the people for the aghani crops, and temporarily averted the fear of a future famine. Even planters say that with a few more seasonable showers no dread need be entertained of another famine. Sales at Government golas almost at a standstill, owing to the cheap rates. Murwa (millet) and makai (Indian-corn) are selling in the bazars. In the Tajpore Sub-division, the weather has been more favorable; a little transplanting has been made, but much heavier rain is still required to save the dhan. In the Sudder Sub-division the little rain that has set in has done immense good to both bhadoi and aghani crops. More rain is wanted to secure average paddy crop.

* Telegram of the 7th September, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BEHAR.—(*Contd.*)				
PATNA DIVN.—(*Contd.*)	31	Sarun 5th Sep. 1874	2·40	Cloudy, with intervals of clear and warm weather; east wind prevailing. The inundation extended over about a fifth of the district, and it is believed that the greater part of the bhadoi and aghani crops over this area has been lost. Rain more or less general throughout the district, except within the jurisdiction of Bhorey, an outpost of thana Burragaon, in the Sewan Sub-division, where the rice seedlings in the higher lands are being cut for fodder for cattle. The remaining bhadoi crops are generally reported to be good, except in Mushruck and Bussuntpore, in parts of which 5, 8, and 10-anna makai or Indian-corn crops only are expected. The early crops are being harvested and consumed by the people and exposed for sale in the bazars in small quantities. Transplantation of aghani rice in the low lands has been completed, but in higher lands it is still going on. More rain wanted for the paddy crop, the prospect of which is very indifferent in parts of Mushruck and Bussuntpore thanas, the distribution of the rainfall having been very uneven. Manufacture of indigo khontee (second cuttings) going on in some factories. Prices on the whole steady. The river has fallen and the inundation is subsiding. Cholera decreasing.
	32	Chumparun, 4th Sep. 1874.	3·04	Cloudy, with showers and sunny intervals. West winds. The rain of the week and that of the 4th has done immense benefit to the autumn crops, which appear promising. The bhadoi crops are now being cut.
BHAGULPORE DIVN.	33	Monghyr, 5th Sep. 1874	1·14	Changeable. Seasonable rain and sunshine. The prospects of the bhadoi or early crops on lands not flooded and those of the rice generally continue good. In Begoo Serai the Ganges came in flood on 27th August, and in consequence of embankments bursting, the surrounding country was flooded. This flood is higher than the great flood of 1871. A large amount of the bhadoi or early crops in Pergunnahs Ballia and Milkie have been destroyed, but no exact estimate is procurable as yet. The inundation is favorable for the *rubee* (cold weather) sowings. The rubee last April in these pergunnahs was very good.
	34	Bhagulpore, 7th* „ „	1·96	Mudhepoora has had over 8 inches of rain since 1st. Soopool over 5 inches; Banka over 3 inches. The very great benefit of this rain need not be commented upon. Prospects and condition of the people considered most satisfactory so far. Ganges falling fast. General health good; fever is appearing in Mudhepoora. Another fall at Soopool of 2 inches of rain during night of the 6th; probably general.
	35	Purneah, 5th „ „	4·37	Heavy rain at intervals. The crops in the north are splendid. Early rice, murwa (millet), and in some places jute is being cut. The Ganges has been rising very high in the south, but has gone down again without doing much damage. Up to date there has been quite enough rain everywhere for the winter rice.
	36	Sonthal Pergunnahs, 5th Sep. 1874.	3·81	At Doomka there has been some rain nearly every day in the week and much more than at the sub-divisions. At Rajmehal it has been cloudy with occasional rain; at Deogurh and Godda much the same, but the latter place has had ·35 only during the week against 1·5 at Rajmehal and 4·16 at Deogurh. From the Sudder Sub-division reports are everywhere excellent as regards all crops; the Ganges is still rising at Rajmehal, but prospects of crops are good up to date. In Godda all crops are good, with the exception of Janerah (Indian-corn) in the north, which was injured by early rain. From Deogurh it is reported that previous heavy rain has done no harm to the paddy crop, whilst the bhadoi or early crop is all that could be desired.
ORISSA.				
ORISSA DIVISION.	37	Cuttack, 7th* Sep. 1874	1·0	Rainfall at Jajpore, ·75. Weather bright and clear; slight damage in some places by floods. Submerged crops rotted, but on flood subsiding sprouted again. Early rice crop excellent. Floods have done more good than harm. Public health good.
	38	Pooree, 3rd „ „	·26	Fair and hot. The early rice crop continues to be weeded and is also partly coming into ear. The crop on the banks of rivers has been destroyed by the floods. The late rice crop is being weeded. Sugarcane is doing well. Mandia, arhur, and noabirhi (pulses), castor and til-seed are growing well. The rivers have risen very high, and the flood has caused breaches in the embankments in some four or five places, and the Trunk Road has also been broken and the country flooded. The flood still continues, and the rice crops are yet submerged, and great damage is likely to be caused. Prices are stationary.
	39	Balasore, 4th „ „	·15	Hot, dry weather has prevailed. The rainfall has been sparse and insignificant. General prospects good. The operation of weeding the late rice crop is going on. A little of the early crop is coming into ear.
CHOTA NAGPORE.				
South-West Frontier Agency.	40	Hazareebagh, 4th Sep. 1874.	·43	A break after the very heavy rain of last week. Showery, however, at the close of the week under report. The crops are first-rate. The maize and millet are now being gathered. New millet in some places is selling at 2 maunds to the rupee.
	41	Lohardugga, 5th Sep. 1874.	2·37	Seasonable. The condition of the crops is satisfactory and the prospects at present are very good. The high land rice crop (early) is being cut and a fine harvest is expected. In Palamow the prospects also continue good, but some fine weather is now wanted. Prices are easy. General health fair.
	42	Singbhoom, 4th Sep. 1874.	2·51	Seasonable rain and sunshine alternately. Excellent prospects. Crops looking superb. Goondli (millet) and Indian-corn above the average. Gora dhan being reaped. Condition of people satisfactory. General health good.
	43	Manbhoom, 5th Sep. 1874.	3·58	Favorable. There have been several good falls of rain, and although more would do good to some of the higher lands, the crops on the whole promise well. Health of the district good.

* Telegrams of the 7th September, received on the same day, shows rainfall during the seven days immediately preceding.

The mean barometer, as likewise the dry and wet bulb thermometer means, are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

No. 5206.

FORT WILLIAM, *the 26th August* 1874.

Read again—

Accounts Proceedings, June 1870, Nos. 150 to 154, and Accounts Proceedings, August 1871, No. 132, regarding the grant of loans to civil officers for building purposes.

Read also the undermentioned papers regarding an application from the Reverend H. Murray, Chaplain of Moradabad, for an advance of Rs. 4,320 under the rules of 1870 and 1871, and relating to an inquiry by the Government of the North-Western Provinces whether local Governments are not empowered to dispose of such applications :—

Accounts Proceedings, June 1874, Nos. 53 and 54.
Letter from the Government of the North-Western Provinces to the Government of India, in the Home Department, No. 1508, dated the 27th June 1874.

RESOLUTION.—The President in Council considers that local Governments may properly be left to deal with applications for these advances from civil officers and chaplains; the circumstances in which the advances may be given, and the conditions to be observed, having been laid down in definite rules of the Government of India.

The Reverend Mr. Murray's application may accordingly be disposed of by the Government of the North-Western Provinces.

ORDERED that the foregoing Resolution be communicated to the Home Department,* the several local Governments and Administrations, the Comptroller-General, and the several Accountants-General and Deputy Accountants-General in independent charge.

* Original papers returned (a copy being kept of the North-Western Provinces' letter last read).

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 4th September 1874.

READ a statement showing the works of public utility constructed by private individuals in the several districts of Bengal during the year 1873.

RESOLUTION.—The Lieutenant-Governor is glad to find that the number and value of works constructed by private individuals for the public benefit in Bengal has increased greatly during the last few years.

The statements showed—

						Rs.
For the year 1871,	46	works	costing	...	...	54,800
„ 1872,	69	do.	do.	...	...	80,600
„ 1873,	163	do.	do.	...	...	1,69,715

These figures do not include the large sums which Khwajeh Abdool Ghunne and his son have given for the Dacca water-works, nor the cost of the great bridge which Baboo Soorjee Kant is building on the Mymensingh and Moortagachia road; nor the hundreds or even thousands of excellent works of tank improvement which have been undertaken during the last nine months by zemindars in the distressed districts.

2. Out of the whole expenditure the sum of Rs. 1,14,731 has been spent on tanks and wells, the object of which is to improve the local supply of drinking-water. The Lieutenant-Governor is specially glad to find that the zemindars and other wealthy persons of Bengal are spending their money on public works of this kind, for he believes that a supply of pure and wholesome drinking-water is a great want, if not the chief want, in most districts of Bengal, and especially in the tracts which have been visited by endemic fever.

3. The thanks of the Government of Bengal are tendered to each of the gentlemen named in the appended list. The Lieutenant-Governor hopes that

the list may in future years be much longer, and that great rich districts, such as the 24-Pergunnahs, Jessore, Cuttack, Backergunge, Bhagulpore, Monghyr, Dinagepore, and the districts of the Patna Division, which are now conspicuous by their absence, will appear in future lists.

4. Copy of this Resolution and of the appended statement will be published in the *Calcutta* and *Bengalee Gazettes*, and copies with translations should be forwarded by the Divisional Commissioners to each of the gentlemen named in the list.

By order of the Lieutenant-Governor of Bengal, &c.

C. BERNARD,
Offg. Secy. to the Govt. of Bengal.

Any letter as well as any packet of newspapers, books or patterns, may be registered on payment by means of stamps of a registration fee of 4 annas in addition to the postage.

Attention is drawn to Clause (7) of the remarks preceding the Foreign Post Schedule of the Postal Guide, respecting the limit of weight (8½ ozs.) for letters to Germany, which contain any other enclosure than paper. This limit applies not merely to letters for Germany, but to letters sent through Germany to other countries, under the present arrangement. Attention is also drawn, as respects Belgium, to Clause (8) of the same remarks respecting the prohibition against the transmission of valuables to that country; and as respects Russia, to Clause (9) of the same remarks respecting restrictions on the transmission of newspapers to that country.

Paid letters received by this route will be delivered in India without charge; unpaid letters will be charged at the rate of 7 annas 6 pie per ½ oz., if from Germany, Luxemburg or Heligoland; and at the rate of 9 annas 6 pie per ½ oz., if from Belgium, Holland, Sweden, Denmark, Norway, or Russia. Insufficiently paid letters received will be charged at the same rate as unpaid letters, less the value of the stamps affixed. In computing the supplementary postage, fractions of 6 pie will be treated as 6 pie. Only fully paid packets of newspapers, books, and patterns will be received, and these will be delivered without charge.

All covers posted in India for any of the above-mentioned countries not being specially marked by the senders, or obviously intended for transmission by some other route, will be forwarded by this route.

RESOLUTION—By the Government of India, PUBLIC WORKS DEPT.

Provincial Establishments and alterations in Public Works Department rules and practice consequent on the introduction of the Provincial system and other changes in the Department.

Read the following papers :—

Financial Department Resolution No. 3334 of 14th December 1870.

Public Works Department Memorandum to Financial Department, No. 805 E—G of 2nd July 1872.

Financial Department Resolution No. 1937 of 15th August 1872.

RESOLUTION.—The Governor General in Council considers it desirable now to review the arrangements and rules for appointments and promotions in the Public Works Department in connection with the recent changes involved in the formation of Provincial Services, the separation of the Military Works of the Bengal Presidency under a separate agency, and the organization of the State Railways under a Director.

2. When in December 1870 the Governor General in Council, having considered it desirable to enlarge the powers and responsibilities of the Governments of Presidencies and Provinces, directed the promulgation of Financial Department Resolution No. 3334, dated 14th December, certain conditions were laid down under which the financial control thus entrusted to them should be exercised.

3. It was intended that these conditions generally designed for all Departments should apply to all cases not otherwise specially provided for in Departmental rules, and that even in cases where these conditions were at variance with existing Departmental rules, the modification of the latter should be considered, with a view to applying these conditions generally to the enlarged powers which it was desired to delegate to Local Governments in order to carry out, as unreservedly as possible, the scheme of Provincial services therein set forth.

4. The first of these conditions, and the only exception to their general applicability to the Public Works Department, is that "without the previous sanction of the Government of India, no appointment shall be created with a salary of more than Rs. 250 a month, and no addition is to be made to the pay and allowances of any Officer if they exceed, or would after the addition exceed, Rs. 250 a month." This rule may be taken to authorize the appointment of persons by the Local Government or Administration to offices with salaries of less than Rs. 250 a month, without the necessity of obtaining the confirmation of the Government of India.

5. The Governor General in Council has carefully considered the desirability of applying this rule to the Public Works Department, and opportunity has been taken to review the existing relations between the Supreme Government and Local Governments in regard to the different classes of Public Works Establishments; the rules now laid down will remove all doubt as to their position in future.

6. First, in regard to Provincial Establishments.

7. The constitution of the Public Works Department is somewhat exceptional, and however desirable it might appear at first sight that Local Governments who have to provide funds and are responsible for the execution of

work, should select their own agents as far as possible, there are practical objections to the application of the limit assigned in the Government Resolution above quoted, which appear to demand exception in the Public Works Department.

8. The limit of salary already referred to does not mark the separation between the Engineer and Subordinate service, and although the high standard of qualifications required of the former places an almost impassable barrier between them, the lowest appointments in the Engineer service are, for obvious reasons, less highly paid than the higher in the Subordinate service. The application of this limit would include first appointments to the Engineer service amongst those which the Local Governments and Administrations might make.

9. The desirability of maintaining a high standard of qualification and the necessity of ensuring its uniformity, have been fully discussed, and the Cooper's Hill College for the future training of the great majority of the Engineer service has been established. Consequently employment must be found for all the students passed from the Cooper's Hill College, for the Officers of Royal Engineers of whom it has been decided by the Secretary of State a total strength of about 398 shall in future be employed in this country, for the passed students of the Thomason and Presidency Civil Engineering Colleges, to the employment of whom to a certain extent the Government is pledged, and for all supernumerary officers whose services become available in consequence of reduction of establishment arising from whatever cause. Excluding the Presidencies of Madras and Bombay, which will as heretofore have their own separate establishments, it seems clear therefore that power to appoint to the Engineer service cannot be unreservedly delegated to Local Governments and Administrations until the classes above-mentioned are provided for.

10. So far as can be at present calculated, it is probable that for some time to come the demand for Engineers will be so far met by the sources of supply already enumerated, that if it were desired to place any further appointments at the disposal of the Local Governments, there would be few if any, available, and the advantages to be derived from this patronage would be small as compared with the importance of maintaining an uniform standard of qualification. This, it is believed, is recognized by Local Governments, and it is understood to be their general desire that the first appointments to the Engineer service shall, as a rule, remain with the Government of India.

11. For these reasons the Governor General in Council is satisfied that it is not desirable to delegate to Local Governments the power of making first appointments to the Engineer Establishment of the Public Works Department and they will, therefore, remain as heretofore with the Government of India.

12. In regard to Upper Subordinates, the chief sources of supply are the passed students of the Civil Engineering Colleges, the men of the Royal Engineers who are sent out under the conditions laid down for their employment by the Secretary of State, and artificers and other subordinates occasionally obtained from Europe, under the orders of the Secretary of State. There will occasionally, moreover, be subordinates who become supernumeraries consequent on reduction of establishment in other Provinces. The Government of India must necessarily provide for the employment of these classes. The Local Governments must therefore report to the Government of India before filling up any vacancy in the sanctioned scale of Upper Subordinate Establishment.

13. It is desirable as already explained to take the opportunity of revising the rules for promotions in connection with the establishment of the Provincial services. In the following paragraphs the several ranks of the Department will be reviewed in order with this object.

14. All promotions up to the rank of Chief Engineer will be left absolutely to Local Governments (as distinguished from Local Administrations). For the appointment of Chief Engineers, selections will be made by the Supreme Government from the Department at large. Local Governments will be invited

to make their recommendations officially, and the Government of India will be guided thereby as far as possible. The distribution of the Classes of Chief Engineer assigned to the several Administrations will depend on circumstances. The details given in the Table, Appendix A, to each Administration are those which at present hold.

15. A Tabular Statement accompanies, Appendix A, showing the numbers of Superintending Engineers assigned to each Province. The Notification accompanying shows the distribution of the absentees, the total numbers and proportions of each grade must be gradually made to conform to the sanctioned scale in the manner indicated in para. 32.

16. If, on a vacancy occurring in the class of Superintending Engineers, Local Governments have no officer on their own establishment whom they consider qualified, or if they wish for the appointment of any particular officer not on their own establishment, application may be made to the Government of India either for a particular officer, or to nominate for the post.

17. On the other hand, the Local Government will be expected to give up officers asked for by the Supreme Government in the absence of strong reasons to the contrary.

18. It will be necessary for Local Governments to submit the names of Superintending Engineers recommended for Chief Engineerships, in view to the Government of India selecting for vacancies in the Minor Administrations.

19. The Executive and Assistant Engineers now on the Classified Lists of Local Governments will remain as at present. Each officer on return from furlough, or from an acting appointment, will join the Local Government or Administration to which he stands posted.

20. Transfers will in future only be made by exchange on mutual consent of the transferring Governments, except on special occasions when the Government of India may see fit to order transfers.

21. It will, however, be understood that as heretofore any member of the Public Works Department may be called upon to serve in any part of India.

22. It will be seen from what has been already stated, that although it is considered desirable for the reasons alleged to retain the power of first appointments to the Engineer Establishment, the actual control of the Local Governments over these Engineer establishments is intended to be the same as that exercised over the Civil Departments generally.

23. The Irrigation Establishments under the Local Governments have next to be considered. These are essentially Imperial, and their strength is determined mainly by the scale of construction operations sanctioned by the Government of India and Secretary of State; but as regards promotion and general control, it is now desired to delegate to the Local Governments the same power as in regard to their Provincial Establishments.

24. The Provincial Establishments under the Local Administrations have next been reviewed, the Tabular Statements, Appendices A and B, show the strength and proportions of grades of the Engineer establishments, and a careful consideration has led the Governor General in Council to decide that with these small establishments the Government of India must retain the power of appointing and promoting Superintending as well as Chief Engineers. The Upper Subordinate establishments will remain as they now are on the lists of each Local Administration subject to the reductions shown in the Table Appendix C which should be carried out gradually by transfers.

25. The recommendations of Local Administrations for these appointments will always receive the fullest consideration.

26. Within the grades of Executive and Assistant Engineers, promotions will be made by the Local Administration without reference to the Government of India. This rule will not apply to the Andamans.

27. The Public Works Establishments which are under the direct control of the Government of India, have also been considered. These consist of two branches :—

(1).—Military Works.
(2).—Railways.

28. In these cases the appointments and promotions will continue to be made by the Government of India, but the promotion lists have been separated, and the numbers of each grade assigned, so as to make the prospects of promotion as far as possible fair. In doing this, the comparative newness and probable expansion of the Railway Establishments, as compared with that of the Military Works, has been taken into consideration. The establishments are shown in Appendices A and B.

29. The Railway list will necessarily be divided. Part will be included in separate lists consisting of the officers employed under the Government of India in the control of Guaranteed Railways, together with the chief officers of the State Railways, such as the Consulting Engineer and Director, and the establishments of the State Railways not under the control of the last named Officer. The rest will consist of one list containing the Chief, Superintending, Executive and Assistant Engineers and other establishments under the Director of State Railways.

30. Promotions will be made in the separate Military Works and Railway lists; in regard to Military Works as heretofore on consideration of the recommendations of the Inspector General, and similarly hereafter in regard to the second part of the Railway list, on consideration of those of the Director of State Railways. The fixed establishments will be gradually worked to in the manner described in para. 33.

31. And as in the case of Local Governments, all transfers between Local Administrations and these branches must receive the preliminary approval of the Local Administration and Head of the Branch before being submitted for the orders of the Government of India.

32. The arrangement by which absence for more than 12 months constitutes a permanent vacancy in the Executive grades will cease from this date, as will also the addition of 10 per cent. to the sanctioned scale for absentees. Vacancies other than those due to absence on privilege leave will be filled up by temporary promotions (full allowances being drawn accordingly), and on the return of the absentee, the temporary incumbent will revert to his former rank. It will be understood that according to rule no Officer has any claim to any particular post or charge but only to his rank in the Department, and that in regard to any particular charge, the efficiency of work must alone be considered. The same procedure will apply in the case of an officiating appointment, so that the actual effective strength of the Executive grade will remain constant. These provisions will modify the establishments of the Local Governments, and the revised scale should be reported accordingly for approval.

As a necessary consequence of these arrangements, promotions will be made from time to time as vacancies occur, and the system of Half-yearly Promotion Rolls will cease.

33. Until the permanent establishment laid down in the Tables of Appendices A and B, and those to be reported by Local Governments are arrived at, promotions will be regulated as follows :—

I.—*Permanent promotions.*—The number of permanent incumbents in each grade assigned to each Administration in the Classified List, modified by Notifications of later date, and especially by the posting of absentees in the Notification of this date, will form the Provisional Establishment. On the first and second occasions of a permanent vacancy in any grade of the Provisional Establishment, that vacancy may be filled up by a permanent promotion. On the third occasion, if the Provisional Establishment be above the permanent establishment, no promotion will be made ; if below the permanent establishment, two promotions will be made. The numbers in the several grades arrived at after dealing thus with the third vacancy will constitute a new Provisional Establishment to be dealt with a

before until the permanent scale is arrived at. Any augmentation or reduction of the establishment will be held to affect the permanent establishment only. Removals or postings will be held to affect the Provisional Establishments only.

II.—*Temporary promotions.*—For regulating these the number of Officers actually present, together with those on privilege leave, will form the Provisional Establishment. Starting from this, temporary promotions will be made for the first and second vacancies, and the third will be dealt with as in Rule I, until the Provisional Establishment is gradually brought to conform to the permanent establishment in regard to the Officers present and on privilege leave.

34. In regard to the Accounts Branch, the circumstances are different. he Government of India has not renounced control over the expenditure assed as Provincial, although the powers of the Local Governments and dministrations have been enlarged in regard to the Provincial services. The pper grades of the Accounts Establishment form a comparatively small body hich could not be satisfactorily managed if broken up in the way which would necessary if each section of it, being in the several territories, were placed mpletely under the orders of each Local Government or Administration. he analogy of the Civil Accounts service points to the organization of the ccounts Establishment directly under the orders of the Government of India, ough which that Government by means of its Accountant General should ntain control over the Local Public Works Departments without interfering h the freedom of action it is desired to give to the Local Governments and ninistrations. It is intended therefore that the whole of the superior officers e Accounts Branch of the Public Works Department shall remain as regards ointments and promotions one body under the direct orders of the Government India.

35. It will be observed from the foregoing that—

(1).—*(a)* All first appointments to the Engineer Establishment and to the Superior Establishment of the Accounts Branch will remain with the Government of India. *(b)* Promotions in the Engineer Establishment will be made as follows :—

Of Superintending Engineers, Executive Engineers and Assistant Engineers by Local Governments.

12. Every candidate for examination for pleadership of either grade, or for mookhtarship, shall, on or before the 1st of November in each year, apply to the Board of Examiners for leave to present himself at the ensuing examination, and he shall establish to their satisfaction that he possesses the qualifications prescribed for such candidates.

13. Such application is not to be transmitted to the Board of Examiners direct, but is to be filed before the said 1st day of November in the Court of the District Judge within whose jurisdiction the candidate resides or is employed (Calcutta, for this purpose, being taken to be within the District of 24-Pergunnahs), accompanied by the necessary documents and papers. The Judge shall thereupon enquire into the validity of the certificate of character presented by the candidate, and shall satisfy himself as to the identity of the candidate, and he shall, on or before the 15th November, transmit to the Board of Examiners all such applications with the documents accompanying, together with a list of the applications and annexures, and with his opinion in each case as to the sufficiency of the testimonials produced, and any other information which he may think it needful in any case to communicate.

14. The Board of Examiners shall thereupon take the case of each candidate, with the report of the District Judge, into their consideration, and shall determine whether or not the candidate is possessed of the necessary qualifications. If the candidate is found qualified, the Board shall cause his name, the name of his father, his age and place of residence, and other needful particulars, to be entered in a register, with a declaration that he is permitted to appear at the next ensuing examination at * * * *.

15. An extract from the register shall be forwarded to the District Judge for delivery to the candidate. The Judge shall cause a notice of his having received such extracts to be stuck up in his Court-house, and shall deliver them to the candidates on application.

The District Judge, in carrying out this Rule and Rule 13, shall conform to such instructions as he may receive from the Board of Examiners through their President or Secretary.

16. Before the date of examination, every candidate shall pay into the Government Treasury of the 24-Pergunnahs, or of the place where he is to be examined, the fee prescribed by Rule 22, and shall at the same time present to the Officer in charge of the Treasury the extract from the register furnished to him under Rule 10, and the treasury receipt for the fee shall be endorsed thereon. Every candidate for examination shall produce to the Examiners the extract from the register, with the treasury receipt so endorsed thereon.

VI.—ENROLMENT.

17. Any person who shall have qualified under these rules, and who shall desire to be admitted to practice, shall pay into the Government Treasury of the district in which he shall intend to practise the fee prescribed by Rule 22, and shall, on presentation of the certificate of the Examiners or of his diploma, and the receipt for the said fee, be entitled to apply to the High Court for admission and enrolment.

18. The application, together with the certificate and receipt required by Rule 17, shall be presented to the Judge of the District in which the applicant intends ordinarily to practise, and shall be forwarded by the Judge to the Registrar of the High Court, with such remarks as he may think fit to make thereon.

19. The name of the applicant and his place of abode, together with his father's name and place of abode, shall be affixed in some conspicuous place in the Court-house of the Judge to whom the application is sent, and also in the High Court, at least six weeks before the applicant is admitted to practise.

20. The High Court may call for evidence of the respectability of the applicant in any case in which it may be deemed necessary.

21. Upon the applicant's being admitted and enrolled by the High Court, a certificate to that effect shall be forwarded by the Registrar of the High Court to the Judge of the district, who, upon the applicant's delivering and leaving with him a declaration in writing signed by the said applicant in conformity with the recital in the form of certificate given in the 2nd Schedule to Act XX of 1865, shall grant him a certificate as required by the said Act.

PHYSICAL GEOGRAPHY AND SURVEY EXAMINATION.

CIRCULAR.

IN accordance with paragraph 10 of the Junior Scholarship Rules promulgated by the Resolution of His Honor the Lieutenant-Governor, dated 5th October 1872, an examination of candidates for Junior Scholarship, who desire to obtain the certificates of qualification in Drawing, Surveying, and Physical Geography, will be held in the Kishnaghur College, Dacca Zillah School, and Senate House, Calcutta, on the 6th October 1874.

2. There will be set one paper in Surveying and Plotting at 10-30, and one paper in Physical Geography at 2, on the same day. Two and a half hours will be allowed for each paper. Specimens of the Survey work and of the Drawings done during the year will be submitted as directed in paragraph 5 below. There will be no separate examination paper set in Drawing.

3. A fee of one rupee will be paid by each candidate to the Head Master of the School to which he belongs; the Head Master will send nominal lists of candidates who have paid the fees to the Inspector of Schools, Presidency Circle, No. 22, Chowringhee Road, on or before the 20th September.

4. The candidates must be furnished with certificates of having paid their fees, and produce them to the Officer in charge of the examination at each centre, in order to be admitted to it. But the Officer in charge may admit any other boys he thinks fit to the examination.

5. Each candidate will deliver in the course of the day (at such time as may be convenient to the Officer in charge of the examination) the specimens of his Survey work and Drawings done during the year. The Officer in charge of the examination will see that each sheet of the specimens submitted is signed by the Head Master of the candidate's school which will be understood as the Head Master's certificate that the sheet so signed is the genuine work of the candidate.

6. For the Surveying paper, each candidate will be allowed to bring into the examination hall a scale, a ruler, a protractor, and a pair of compasses with pencil leg.

7. The examination at each centre will be superintended by the following officers :—

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 2nd September 1874, and is hereby promulgated for general information :—

ACT No. XII OF 1874.

An Act to provide for the exercise, in Sylhet, of the powers of the Lieutenant-Governor and Board of Revenue of Bengal.

Preamble.

WHEREAS the District of Sylhet is about to be transferred from the Lieutenant-Governorship of Bengal to the Chief Commissionership of Assam, and it is therefore necessary to provide for the exercise, within the said District, of the powers now vested in, or exerciseable by, the Lieutenant-Governor of Bengal and the Board of Revenue for the Lower Provinces of the Presidency of Fort William in Bengal respectively; It is hereby enacted as follows :—

Powers of Lieutenant-Governor and Board in Sylhet transferred to Governor-General in Council.

1. All powers over the whole or any portion of the said District, which at the time of the said transfer are, under or by virtue of any law or regulation, vested in, or exerciseable by, the said Lieutenant-Governor or Board of Revenue, shall, on the said transfer, become vested in the Governor-General in Council.

Delegation of such powers.

2. The Governor-General in Council may, from time to time, delegate to the Chief Commissioner of Assam all or any of the said powers, and withdraw any powers so delegated.

TRADE AT THE BALASORE PORTS.

RESOLUTION.

GENERAL DEPARTMENT.

MARINE No. 2938.

Calcutta, the 11th September 1874.

READ—

Government order No. 3551, dated 3rd October 1872, reducing, as an experimental measure, the port dues rate at Dhamrah from 6 to 2 annas, and at the other ports of Balasore, viz. Chooramun, Chanooah, Sartha, Sooburnareekha, and Lychumpore, to 1 anna per 100 maunds of burthen in respect of every sea-going vessel of 300 maunds burthen and upwards, and requesting the Board of Revenue to furnish information on the following points: (1) the number of boats which enter these harbours; (2) the cost of maintaining the harbours; (3) the yield of the dues; and lastly, the grounds on which the Commissioner of Orissa considers the rates too high.

Letter No. 659C, dated 30th December 1872, from the Board of Revenue, submitting the requisite information.

Read again—

Government order No. 216, dated 14th January 1873, requesting the Board to submit a report after a year's trial of the new port due rates on the finances of the six Balasore ports, and the increase if any, of the coasting trade.

Read also—

Letter No. 470B, dated 25th July 1874, from the Board of Revenue, submitting the required report.

The Lieutenant-Governor has perused with much interest the report submitted by the Board on the financial position of the Balasore ports of Orissa, and the progress of the coasting trade. From the statement appended to the report it appears that the value of exports, which in 1872-73 amounted to Rs. 2,14,250, has increased to Rs. 9,62,124 during 1873-74. Considerable as is this increase, it is perhaps sufficiently accounted for by the stimulus given to the grain trade of Orissa owing to the scarcity in other parts of Bengal. But the enormous increase in the value of imports during the past year, from Rs. 1,09,005 to Rs. 12,87,894, could hardly have been anticipated. This increase, which has principally been in cotton piece-goods, metal, and twist, is very satisfactory.

The improvement in the trade of the Balasore ports is no doubt to some extent owing to the reduction of the port dues. His Honor, however, regrets that he is unable to accede to the Commissioner's proposal to declare the ports entirely free from the levy of dues. Such a step seems hardly necessary under the circumstances. Every effort will nevertheless be made to further the supply of proper port appliances as soon as possible.

2. The steamer formerly at False Point will be restored as soon as the state of the relief operations shall permit.

ORDER.—Ordered that the Board's report, No. 470B, dated the 25th July 1874, with enclosures, and the resolution thereon, be published in the *Calcutta Gazette*; and that copy of the resolution be forwarded to the Board for information, with reference to their report.

No. 470B, dated Fort William, the 25th July 1874.

From—W. H. GRIMLEY, ESQ., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal.

WITH reference to paragraph 2 of Government order No. 216, dated 14th January 1873 I am directed to submit the following report on the financial position of the Balasore port of Orissa, and the progress of the coasting trade.

2. The names of the ports are Balasore, Dhamrah, Chandbalee, Chooramun, Chanooah Sartha, Soobarnareekha, and Lychumpore; and dues are levied at the following rates, namely at six annas per 100 maunds at Balasore; at two annas Dhamrah and Chandbalee; and a one anna at the remaining places. No dues are leviable at Cuttack and Pooree ports.

* * * * *

4. Schedules I and II, exhibiting the actual import and export trade of the Balasor port in which the dues were reduced, as well as a description of the vessels visiting eac port, disclose the enormous increase in 1873-74 of nearly 1,200 per cent. in the value imported goods, and of 450 per cent. in exports, as summarized below:—

Chandbalee is a subsidiary port to Dhamrah, but as there has been a great influx of trac there since the opening of steamer communication, it is treated as a separate port in th accompanying statements. Another circumstance favourable to the development of trac at Chandbalee is, that the passenger traffic has very considerably increased in consequenc of cheap fares and easy transport from Calcutta, attracting a large portion of the pilgrim an local traffic from the land routes.

5. Although the trade at those ports, the whole of which is coasting, has been abnor mally increased by the famine demand for grain, the Commissioner does not anticipate an falling off in future years. One port, Lychumpore, he remarks, may be expected to show better results, as it is frequented by Madras grain-merchants towards the close of the season when Balasore becomes inaccessible owing to its exposure to the south-west monsoon. Thi year, it appears, the trade was stopped there by high prices, many vessels, wishing to tak grain, leaving in ballast.

6. Only vessels of a tonnage exceeding 300 maunds are liable to port dues. Schedul III gives a list of such vessels, with the duty paid, amounting in all to Rs. 1,428, a mer trifle compared with the actual extent of trading operations of all the Orissa ports, repre sented in Schedule IV, from which it appears that the total of exports and imports for th year 1873-74 has amounted to Rs. 58,98,463; and that, as compared with the previous yea imports have increased by Rs. 17,16,294, and exports by Rs. 15,91,005; the total increa reaching the unprecedented sum of Rs. 33,07,299, partly due to the extraordinary dema for grain in Bengal, and partly to the gradual improvement in trade since the Orissa famine According to the Commissioner, Orissa is gradually attracting capital from a distance, whil the people are beginning to embark in trade of which they never before dreamed, and h seems very sanguine that, with time and opportunity, there will be no limit to its furthe development. To this end he is strongly in favour of discontinuing the levy of port due and thus expresses himself on the subject:—

"I believe that the proper policy to pursue is to open all the ports free of any sort "dues, and I would strongly recommend that the petty dues which are so far levied i "Balasore ports only, and which yield an insignificant sum of Rs. 3,567-6-8 only, may b "abolished, and all Orissa ports declared free of dues for a period of five years, or until 31 "March 1879.

"In reporting on the new Indian Ports' Bill now before Government, I have suggeste "an addition to paragraph 46, Chapter XLVI of the draft Bill to effect—

"'Or may specially exempt any port from any or all of the charges or port due "prescribed by this Act.'

"Such an addition is necessary to meet cases like the Orissa ports, and I trust the amendment may be adopted.

"The real fact of the matter is, that none of our ports have so far either mooring buoys, channel buoys, beacons, lights, or any of the appliances necessary for the convenience or safety of shipping, and it is neither wise nor just to charge vessels for advantages which do not exist; and I certainly think that before any port dues ought, in justice, to be charged, every port should be thoroughly and efficiently provided; the time I have given—five years—would probably admit of this; and by the end of that time, I think, a firm and equal rate of port dues might be properly levied at all Orissa ports.

"If, on the other hand, Government will insist on the levy of port dues, I should say that the fairest thing to do is to freely and fairly admit the liability of Government, to set immediately to work and thoroughly improve all the ports, and declare one uniform rate for all ports, say, three annas per ton. This is the rate prevailing in Madras ports."

7. The Member-in-Charge, while agreeing with the Commissioner as to the liability Government to supply ports, at which dues are taken, with the usual port appliances and carry on other works of improvement, is entirely opposed to his views on the subject of clearing the ports free for the next five years. It is very evident from the statements bmitted that the light dues imposed have in no way interfered with trade; and r. Money would therefore keep them as they are at present, instead of making fresh anges; but, under the circumstances stated, would recommend that Government should at ce take measures to see that the ports are put into proper condition.

RESOLUTION ON THE ANNUAL REPORT OF THE MARINE DEPARTMENT FOR 1873-74.

RESOLUTION.

GENERAL DEPARTMENT.

MARINE No. 2774.

Calcutta, the 28th August 1874.

D—

The Annual Report of the Marine Department for the year 1873-74.

1. *The Pilot Service.*—The strength of the Pilot service on the 31st rch 1874 was—

Pilots of the covenanted service at work ...	Salaried Pilots	7
	Free list	51
Licensed Pilots at work		35
	Total ...	93
Pilots on leave, four covenanted and two licensed		6
Pilots under suspension, two covenanted		2
	Grand total ...	101

During the year under review the long contemplated measures for reducing e numbers of the service were brought to maturity. Numerous memorials m the members of the Pilot service led the Government of Bengal in 1867 appoint a Committee to report upon the position of the Pilots, their ospects and alleged grievances. The Committee made a full report in ay 1867, and this Government disposed of most of the suggestions of e Report in its Resolution of the 18th of June 1868. The main point of e Committee's Report, namely, the proposal for the total abolition of the lot service as a covenanted service of Government was left over for further nsideration. The Committee had proposed to buy off all the privileges of ese covenanted servants, granting them at once pensions according to their ides, and permitting them to work as Licensed Pilots, but with no further im of any kind on Government.

These proposals, which had the recommendation of the Committee, ah the Collector of Customs as its President, and of Captain Howe, ficiating Master Attendant, received consideration from Government, but e conclusion arrived at was that they could not be accepted. This conclusion s derived from the following arguments:—

"The crying evil is that we have too many Pilots of all grades, yet the men pensioned e still, under the proposed arrangements, to be allowed to work as 'Licensed Pilots.' It alleged that there are at least a dozen Pilots who would at once leave the profession if they ot pension, and thus the number of 'Running Pilots' would be reduced, and the men left ould be better off and more efficient. But it is always doubtful how far expectations of is kind would be carried out, and the Government might find the same dead-lock after pending 1½ lakhs of rupees a year for some years in pensioning off the whole Pilot service.

"The argument in the next foregoing paragraph against pensioning off the whole service eems to His Honor very strong. But over and above that argument there are grounds for the pinion that it is in the interests of the port that some at least of the Pilots should belong to covenanted service on which Government has a strong hold in the shape of the absentee llowances, pensions, and other privileges it bestows. All the Pilots must be European or

"East Indians; the Pilots must all have served a long apprenticeship to the river; and if the "whole body of Pilots were merely Licensed Pilots, quite free to come and go, they might se "any time strike for higher wages, or bargain for gratuities, or in many ways they might "very seriously hamper the trade of the port.

"The profession must always be a close profession, it would take years to breed u "another race of Pilots; and it may after all be the best policy for Government to continue the "covenanted service for a part at least of the trade of the port, till at least it dies a natur "death."

Another Committee was accordingly appointed to consider the questio of the actual number of Pilots required for the pilotage of the river Hooghl In accordance with the suggestions made in this Committee's Report, th Government of Bengal recommended to the Government of India a reductic of the numbers of the service to 70 Pilots and 20 Leadsmen, at a cost £24,600. A certain number of Pilots were to be induced to retire by the off of suitable pensions and bonuses, and the general condition of the service w to be improved. These proposals having received the sanction of the Gover ment of India, the terms offered by Government were notified to the Pilots, wh came forward in greater numbers than were required. The service has no been reduced to 55 Covenanted Pilots and 21 Licensed Pilots, making a tot of 76, exclusive of Leadsmen. The contemplated reduction to 70 will be ma gradually by refraining from filling up vacancies.

The work of each Pilot as compared with that of the preceding year was :-

	1873-74.	1872-73.
Each Branch Pilot ..	36 ships.	36 ships.
,, Brevet Branch Pilot ..	41 ,,	25 ,,
,, Master Pilot ..	22 ,,	18 ,,
,, Mate Pilot ..	25 ,,	20 ,,

This statement shows an improvement in the position of all the gra below that of Branch Pilot, but still each Master and each Mate obtain about two ships a month. The recent reduction in the numbers of the ser will raise the average to about three ships a month each all round for Runn Pilots, and it may be reasonably anticipated that there will be no more co plaints of deficiency of work.

2. *Arrivals and Departures.*—There has been an increase of 25 ships the total of arrivals and departures of vessels, with an increase of 154,172 to in their burthen. The average tonnage of sailing vessels and of steamers h remained much the same as before. The number of steamers, includi arrivals and departures, has increased by 196, and that of sailing vessels h decreased by 171. Of the steamers which traded with the port of Calcut 50 more passed through the Suez Canal than in the previous year.

3. *Groundings and Collisions.*—It is satisfactory to the Lieutena Governor to be able to record that no case of a serious nature occurred.

4. *Marine Courts.*—The Lieutenant-Governor is glad to observe the lit necessity which has existed for bringing into operation the machinery of t Marine Court. But the Resolution of last year directed the Master Attenda to report in future on the general conduct of the Pilots as a body, with su remarks as might be called for by special or noteworthy cases. Nothing h been said upon this subject in the present Report, and the Lieutenant-Govern desires that the omission may now be supplied.

5. *Channels of the Hooghly and River Survey.*—There is nothing in t report to suggest special remarks regarding the condition of these channels.

6. *Vessels of the Department.*—The Lieutenant-Governor is glad to s that all the Pilot vessels are reported to have been thoroughly surveyed a repaired. He expects that such attention may be given to these vessels as m prevent the recurrence of the complaints which have of late been publi made. The Government of India has sanctioned the construction o new light-vessel to replace the *Comet*. Orders have recently issued breaking up the *Grappler*, and she has been replaced by the *Dolphin*, un it shall be decided what description of vessels are to be employed in t survey of the River Hooghly.

The question of providing proper vessels for the survey of the Riv Hooghly, is now under the particular consideration of Government.

The whole of the inland vessels are reported to be in good or fair ord with the exception of the *Teesta*.

7. *The Wreck and Anchor concern.*—The Lieutenant-Governor desi to have a complete report on the future prospects of this department, wi carefully considered suggestions as to the means which should be adopted improve its financial position.

8. *The Government Dockyard and its Departments.*—The Builder a Surveyor's department repaired 37 vessels and 56 boats, constructed 10 bo

of various descriptions, 13 pontoons for the Hooghly Bridge, and a new iron pontoon landing stage, and two new iron hopper barges for the Port Commissioners. The Steam Factory was constantly employed in repairing Government vessels and in the execution of other minor work. This department turned out a new steam launch, launched and finished the *Cornhill* steamer for Messrs. Finlay, Muir and Company, put together and finished 13 of the Hooghly Bridge pontoons, constructed a new landing stage for the Port Commissioners, and made 32 pontoon stages for the Superintending Engineer, South-West Circle. The Lieutenant-Governor entirely believes in the utility of an inland flotilla for urgent service in extraordinary times, and for general service in ordinary times..

9. *Miscellaneous.*—The remark made in the Resolution of last year, that it was undesirable to overload an Annual Report with matters of petty detail, appears to have been overlooked in reviewing the work performed in the Steam Factory. Indeed, most parts of the Report are open to this objection, and the Lieutenant-Governor trusts that in future there will be more of a general review of the marine administration of the year and of the working of the laws connected with it, and less of unimportant particulars.

ORDERED, that a copy of the Report and of this Resolution be submitted to the Government of India, in the Marine Department.

Also, that a copy of the Report and of this Resolution be submitted to the Government of India, Department of Revenue, Agriculture, and Commerce.

Also, that copy of the Report and of this Resolution be forwarded to the Commissioner of Cotton and Commerce.

Also, that a copy of this Resolution be forwarded to the Officiating Master Attendant.

Also, that a copy of the Report and of this Resolution be forwarded to the Chamber of Commerce.

Also, that a copy of the Report and of this Resolution be forwarded to the Port Commissioners.

By order of the Lieutenant-Governor of Bengal,

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Dist of Bengal, as reported to Government during the week ending the 12th September 1874.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.				
		Western Districts.		
BURDWAN DIVISION.	1	Burdwan, 14th* Sep. 1874	3·30	Rainfall at Jehanabad 4·28; at Culna 3·30; at Cutwa 6·0; at Bood-bood 1·72 at Raneegunge ·70 inches. Weather cloudy. Prospects of amun or late crops not good; more rain still wanted. Fever as before.
	2	Bankoora, 12th „ „	1·69	Showery during the greater part of the week. The crops are generally doing In the south-west the rainfall has been somewhat scanty, and the exte cultivation is therefore less than elsewhere. General health good.
	3	Beerbhoom, 12th „ „	3·0	Wet during the former, and dry during the latter half of the week. Sta prospects of the crops continue excellent, west of the Railway. East, improved by the recent rains. Prices steady.
	4	Midnapore, 12th „ „	3·18	Rain fell at head-quarters every day this week, and on Thursday, the 10th, was very heavy and apparently general. The prospects in all quarters district are improving and are above average in most places, and below a only in about 2½ thanas towards the north-east. The only apprehension an early cessation of the rains, which would, of course, be very disast season.
	5	Hooghly, 12th „ „	4·50	Cloudy; heavy showers during the week. At Serampore the rainfall has b The rain has been heavy throughout the district, and transplantatio amun or late rice crop rapidly progressing; continued rain is, however, for its growth.
		Howrah, 12th „ „	4·24	There has been rain throughout the district during the week. Weather so cloudy and sometimes clear. Wind from south and east. The rain du week has done much good to the crops. The cultivators are busy in pre lands for transplantation of the amun or late rice crop. Transplanta progressing. The ryots in some places have reaped the aous or early rice, &c. Sugarcane healthy.
		Central Districts.		
PRESIDENCY DIVISION.	6	24-Pergunnahs, 14th† Sep. 1874.	4·69	Rainy and close. Heavy showers fell in parts of the district during the especially in Dum-Dum, Diamond Harbour, Alipore, and Barrackpore. have done much good to the amun or late rice crop, and transplantation as possible is being fast completed. The harvesting of the aous or early rice continues. Fever still prevailing in Barripore and Satkhira. It has aba Diamond Harbour and Busseerhat.
	7	Nuddea, 12th Sep. 1874	4·79	Heavy rain everywhere, except in the extreme south of the district. The am late rice crop has been greatly benefited by the rain. The aous or earl harvest is nearly over. Serious damage has been caused by floods in the dangah sub-division, and further loss there and elsewhere is apprehended rivers still continue to rise.
	8	Jessore, 12th „ „	5·06	Generally cloudy. Heavy rainfall on the 9th, 10th, 11th and 12th. Pro continue favorable, but the height of the inundation is causing anxie Jhenidah and Narrail.
RAJSHAHYE DIVN.	9	Moorshedabad, 12th Sep. 1874.	2·07	Good and general rainfall during the week. In Rampore Haut and Jungypor divisions over five inches have fallen. There is appearance of more rain. prospects of the amun or late rice crop have improved very materially, but deal more rain is still wanted in the parts which suffered most from the dr of August. The bund at Laltikooree gave way on the morning of the 5th in and a large volume of water has been flowing through the breach since. low country in the vicinity of the breach and on the banks of the Gobra do the Kalantar in the south-east of the Burwa thana has been inundated, bu serious damage has been done to the crops. In some villages houses tumbled down, and stacks of paddy have been swept away. Relief is given to the sufferers. The crops in the Kalantar are above the flood; and a river is falling, there is every hope that they will be saved. In consequen the difficulty of the traffic caused by the inundation, prices have risen at Now and Hureehurparah.
	10	Dinagepore, 11th Sep. 1874.	4·33	There has been rain all over the district. The seasonable rain which has falle removed all anxiety as regards the winter crop. If rain continue, a very crop will be reaped. Bhadoi or early crop is still being cut in some places.

* Telegram of the 14th September, received on the same day, shows rainfall during the seven days immediately preceding.

NGAL.—(*Contd.*)			
	Central Districts.—(Contd.)		
11	Maldah, 12th Sep. 1874	5·06	Rain every day during the week. Prospects of hymunti and amun or late rice crops, owing to the recent fall of rain, good throughout the whole of the district. The bhadoi or early crop has nearly all been reaped and has yielded more than an average crop. The inundation is going down. Wheat and maize are cheaper than they were this time last year.
12	Rajshahye ...	.....	Return not received.
13	Rungpore, 11th Sep. 1874	1·97	Good showers almost daily, but no very heavy downpour. Reports of good rainfall from most out-stations, and progress made in transplantation. In some parts twelve to fourteen annas planted out. Still more rain wanted for high lands, especially in Govindgunge, where rainfall remains scanty, but even there matters have much improved during the week. Telegraphed on the 14th September: four inches rain since Friday; heavy rain all over the district; five inches in Govindgunge. Transplantation active.
14	Bogra, 12th „ „	6·51	The prospects of the district and of crops of all kinds are excellent, by reason of the late heavy rainfall. There is a good deal of fever in many parts, which is, however, the usual concomitant of this season of the year.
15	Pubna, 12th „ „	2·10	Weather cooler and heavy rainfall on the 9th, and small showers on other days of the week, with a south-east wind blowing. The amun or late rice crop has suffered in places from the inundation, and the estimated loss is under enquiry, but on the whole the crop will be a fair one. The turmeric and sugarcane in low lands have been irrecoverably ruined; prospects of others in high land good. The water of the Issamutty has somewhat subsided. Fever continues.
16	Darjeeling, 11th „ „	4·32	Heavy rain during the nights and showers during the day, and a good deal of mist. In the plains there has been a moderate fall of rain during the week, well distributed. The prospects of all the crops in both the hills and the plains are excellent.
17	Julpigoree, 11th „ „	7·61	The heavy rain of the week has been general over the district. It has come most opportunely for the winter rice crop, about the safety of which there can now be little doubt, and which promises splendidly. All crops promise well.
	Cooch Behar, 10th „ „	4·64	Cloudy; very wet on the 10th. The present wet weather is very beneficial; prospects are very good.
	Eastern Districts.		
18	Dacca, 14th* Sep. 1874	4·14	Much rain has fallen. State of crops now decidedly favorable.
19	Fureedpore, 12th „ „	8·47	The weather during the week has been very rainy; upwards of 5 inches fell within twelve hours in one continued shower. Reports from all parts of the district state that the present prospects of the late rice crop are excellent. The fear is that this excessive fall may be followed by a dry October and November, when a little rain is wanted to fill the ripening grain. The price of coarse rice remains the same at Madareepore and Gopalgunge, but at Fureedpore, Goalundo, and Bhanga it has increased slightly, partly from a supension of imports on account of stormy weather, and partly from prevalent cloudy and wet weather interfering with the preparation and husking of rice. The rivers everywhere are still rising, and the country almost all over the district is well covered with water.
20	Backergunge, 10th Sep. 1874.	4·42	Rainy weather; state of crops good.
21	Mymensingh, 11th Sep. 1874.	6·20	Continued rain or showers throughout the district. Transplanting in the east of the district is now being completed. The winter rice crop must needs be late, but there is no ground for expecting it to fall short of an average crop at present.
22	Sylhet, 8th Sep. 1874	3·89	Cooler than last week owing to pretty heavy showers of rain. The rainfall has been most beneficial. The high lands in Laskarpore suffered much from want of rain, but now the sail crops in all the high tracts of the district have every chance of turning out well. The amun or late rice on the low lands is good, but the amun on the high lands and the Kataria will probably fall below the average from want of sufficient rain all this time.

* Telegram of the 14th September, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)				
		Eastern Districts.—(*Contd.*)		
CHITTAGONG DIVN.	23	Chittagong, 10th Sep. 1874.	7·15	Rain almost daily, with some heavy falls. It appears to have been general over district, but heavier in the sudder sub-division than at Cox's Bazar, f which 4·62 inches are reported up to 8th instant. Reaping of the aous or c rice continues, and the rain during the week has been very favorable to tr planting the amun or late rice crop, which is actively progressing. Ch reported from Potia in sudder and Harbaung in Cox's Bazar sub-division.
	24	Noakholly, 10th „ „	8·07	Cool with abundant rain. The aous or early rice crop has nearly been reaped the accounts of it are generally satisfactory, except on high lands, where rainfall was insufficient. Transplantation of the amun or late rice is still g on. The rain has done good.
	25	Tipperah, 11th „ „	5·11	Cloudy, cool, and rainy, more like what the rains ought to be. At Brahmunl sub-division 1·42. The amun or late rice crop is still in fair condition, and timely rain has saved it from being a failure in the nine thanas of the su sub-division; but more rain is still required in the Brahmunberia sub-divisi three northern thanas.
	26	Chittagong Hill Tracts, 8th Sep. 1874.	3·42	Rainy throughout the whole week. The hillmen are busily engaged in harv their paddy crop. The cotton planted is thriving well. The falls during the week have been of much service to the plough cultivators prospects of all the crops are good.
		Hill Tipperah, 11th Sep. 1874.	1·38	A few heavy showers at the beginning of the week, with strong wind from east. Weather cloudy, with breaks of sunshine. Prospects of crops good.
BEHAR.				
PATNA DIVISION.	27	Patna, 14th* Sep. 1874	3·14	Pretty good showers during the week (6th to 12th). The harvesting of th or early crops well nigh completed. Prospects of the rice crops report excellent. Health good.
	28	Gya, 12th „ „	1·21	Rainy and hot. Everything that could be desired. A very full bhadoi crop is being harvested, and rice is everywhere reported good.
	29	Shahabad, 12th „ „	2·48	Showery weather. Prospects good. The bhadoi or early crop is being ge harvested. The injury caused by the recent floods has not been fully ascert The Soane is in flood again near Arrah, having commenced to rise on the This is very unfortunate, following so soon as it does on the recent heavy fl of both the Ganges and Soane in this direction.
	30	Tirhoot, 12th „ „	1·24	Sometimes cloudy and sometimes fine. In the Durbhunga sub-division, the c everywhere show a decided improvement. Rain has fallen generally over sub-division, refreshing the crops that have been sown, and enabling cultivato prosecute transplanting operations. The present prospects are therefore hop The bhadoi is being harvested, and the outturn will be on the whole an ave crop, except in Warrisnuggur relief circle, where it will be under the average. In the Mudhoobunnee sub-division heavy showers in every part of the sub-divis The rain has vastly improved the prospects of the paddy crops. They are looking healthy everywhere, and may be considered out of danger. In the Seetamurhee sub-division there has been a rainfall, more or less gen over the sub-division, doing much good to plants. Murwa (millet) and m (Indian-corn) are expected to yield twelve annas; sathi paddy five to six an aghani or late rice crop to north twelve annas, to south eight annas. In Tajpore sub-division the harvest of bhadoi or early crop has commenced; out is likely to be as expected, except perhaps that of murwa (millet), which will be a ten-anna crop. Dhan (paddy) is looking up, but transplantation is incomplete in the north-west. There is still but little water in the rice l but a few good downpours are much wanted. The loss in the south-west not be so great as feared, owing to the rapid subsidence of the water. crops are being put out in greater quantities than usual. The crop return f Hajeepore not received. The prospects of crops in the sudder sub-divi continue much the same as reported last week.
	31	Sarun 12th „ „	1·59	Cloudy, with showers and sunny intervals; east wind prevailing. The bhadoi or crops are being cut, and coming into the markets here and there in small qu ties. There seems strong reason to doubt whether the yield of the bh harvest of the district, as a whole, will exceed a 9-anna crop or a 6¾-anna according to the Government method of calculation; or in other words, a l above half an average crop. Transplantation of aghani or late rice in low lands has been completed, but in the higher lands it is going on; much remains to be planted out, while some portions of the district are, according to latest accounts, even yet affected by drought. There have been heavy showe most parts, but more rain is still wanted everywhere, except in Chup Dighwarah, and Pursa thanas. No rain in Gopalgunge, an outpost of t Burrowlee, in the Sewan sub-division. Manufacture of indigo "khontee" (se cuttings) going on. Prices (rice excepted) show a downward tendency, partl consequence of importations, and partly from the new crops coming into markets.

* Telegram of the 14th September, received on the same day, shows rainfall during the seven days immediately preceding.

BEHAR.—(*Contd.*)				
PATNA DIVN.	32	Chumparun, 11th Sep. 1874.	3·92	Showery, with sunny intervals; variable winds, and moist and cool. The rain of the week has been fairly general in the east and south-east and general in the rest of the district, where the prospects of all crops and the actual outturn of those being harvested are excellent. After a personal visit to the south-east of the district, the Collector estimates that the loss in the rice will not be nearly so great as hitherto reported, and that it promises to be an average or nearly average crop.
BHAGULPORE DIVN.	33	Monghyr, 12th „ „	3·46	Alternate sunshine and showers. The prospects continue good all over the district. The inundation in Begoo Serai has only damaged the crops locally. There was very heavy rain on Wednesday morning, which benefited the rice crops.
	34	Bhagulpore, 14th* „ „	1·39	Rainfall at Soopool 5·92; Muddehpoora 3·30; Banka ·84. Splendid weather for all crops; and the aghani or late rice, with favorable and seasonable weather for three weeks more, must be very fine. General health unusually good for the time of year.
	35	Purneah, 12th Sep. 1874	3·04	Heavy rain at times—mostly at night. The bhadoi or early crop is first-rate; but the Collector has recently been told that in the north of the district, nothing compared to what is expected from the aghani or late rice crop if the present favorable weather continues a little longer; there is at present no prospect of any change.
	36	Sonthal Pergunnahs, 12th Sep. 1874.	4·36	The weather has been cloudy and wet throughout the district. At Deoghur 9·67 inches of rain have been registered; at Rajmehal 4·3; at Godda 2·22 only. In the sudder sub-division the crops are very good indeed, and prospects excellent. At Deoghur they are as yet uninjured by excess of rain. A little dry weather is desirable for reaping sati paddy. Prospects continue favorable. In Rajmehal prospects continue good. Seasonable rain has fallen pretty generally throughout the sub-division. In Godda the crops, though somewhat backward, are described as generally getting on satisfactorily.
ORISSA.				
ORISSA DIVISION.	37	Cuttack, 14th* Sep. 1874	5·07	Weather clear, with occasional storms; much land still under water. Where floods have subsided not much damage done. Beali rice ripe, and being cut, with excellent outturn. General prospects good.
	38	Pooree, 11th „ „	1·8	Cloudy, with slight rain. The early rice crop is ripening. The late rice crop is being weeded. Both the crops have been partly destroyed by the late excessive rain and high floods. Preparations are being made for transplanting and replacing the crops lost as far as possible. Nearly one-fourth of the crops in the Pooree sub-division has been lost. The prospects of the crops have been seriously injured, but a continuance of fair weather would to some extent compensate the loss. Sugarcane is doing well and promises a good crop. Mandea, urhur, and Nowberhi (pulses), and castor are growing well. Teel (oil-seeds) being harvested, and the outturn is indifferent. The flood has now subsided and the inundated fields have been relieved, but several and large breaches in embankments have been left, and if any high floods follow, there will be much damage. Prices are stationary. Public health fair.
	39	Balasore, 11th „ „	3·64	Constant yet not excessive rain has been falling all over the district for six days. The effect has been highly beneficial, and the crops are very promising. In the few localities damaged by inundation, active efforts are being made to repair losses. The early harvest is being reaped.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 11th Sep. 1874.	4·76	If anything, there has been too much rain. The ripening crops require more sunshine; but no special complaints on this head have been heard as yet, and there has been sunshine on the 10th and 11th. A few days' fine weather coming now would do great good.
	41	Lohardugga, 12th Sep. 1874.	2·81	Seasonable weather. The high land rice is being cut, and the crop is reported from all sides to be a most excellent one. The late rice is also doing well, and the prospects at present are very fine.
	42	Singbhoom, 11th Sep. 1874.	2·18	Seasonable. Most favorable. Crops looking well. Gora paddy in course of cutting. Public health good. Several cases of cattle-disease reported from parts of the district.
	43	Manbhoom, 12th Sep. 1874.	9·1	Weather very good. The heavy fall of rain, which took place on the 9th instant, has been of great service in filling the tanks and reservoirs, and supplying the rice-fields on the high ground with a sufficiency of water of which they were much in need. No more rain is required just at present, but some good downfalls are looked for towards the end of this month and in the middle of October. The gora rice is being cut all over the district, and is yielding a good return. Cotton and sugarcane are doing well. The health of the people is good.

* Telegrams of the 14th September, received on the same day, shows rainfall during the seven days immediately preceding.

NOTE.

Barometric Pressure.—The pressures in column 2 of the above table for all stations below 500 feet, are reduced from those given in column 3 of the table on the previous page, by adding the weight of a column of air of the temperatures given in column 17. For stations above 500 feet elevation the reduction is made by Dippe's tables, as given in Guyot's "Meteorological and Physical Tables." The temperatures at the sea-level are taken from column 3 of the above table.

Temperature.—The temperatures in column 3 are reduced from those in column 17 on the preceding page by adding 1° Fahrenheit for every 450 feet.

Wind Resultant.—The resultant wind direction and its comparative predominance are calculated from the whole number of wind observations recorded during the month. The relative predominance in the direction of the resultant is given, as a percentage of the whole number of observations. The direction is computed in the usual way by Lambert's formula.

Serenity.—This column gives the average proportion of unclouded sky; a cloudless sky being indicated by 10, and one completely overcast by 0.

The above, being all comparable, afford the data for constructing a meteorological chart for the month, which shall show the isobaric and isothermal lines and the resultant wind directions, which last may be represented by arrows of varying length, proportioned to the prevalence of the wind. To these may be added the rainfall from the previous tables.

NOTIFICATION.

The 18th September 1874.—Bhudisham Bose, lately treasurer at the Kendrapara sub-division, in the district of Cuttack, and Choitun Churn Ghose, lately potdar at the same sub-division, have been dismissed from the service of Government for misconduct, and are hereby declared incapable of serving Government again in any capacity.

The 19th September 1874.—The following Resolution, regarding the retransfer of the town of Navadipa and the adjacent villages from the district of Burdwan to that of Nuddea, is published for general information :—

Read a petition from the inhabitants of the town of Navadipa or Nuddea, begging for a reconsideration of the decision that the town and island of Navadipa should be transferred to the Burdwan district.

RESOLUTION.—The Lieutenant-Governor met most of the memorialists on the occasion of his visit to the town of Nuddea on 13th September, and he ascertained on the spot that this petition represents the views of the most influential and important section of the people of Nuddea; and he learned that most of the memorialists held lands in, and were connected with, the Nuddea district on the left bank of the Bhagiruttee. His Honor also consulted the Magistrates of the Burdwan and Nuddea districts, and ascertained that no executive or fiscal advantages will be gained by transferring this small tract to Burdwan; while there are many disadvantages in its remaining part of the Burdwan district. The Magistrate-Collector of the Nuddea district, who has known the town of Nuddea and its people for nearly five years, has informed the Lieutenant-Governor that the allegations made by the memorialists regarding the wishes of the townspeople, and regarding the practical convenience of their town remaining a part of the Nuddea district, are in the main correct.

2. The order transferring the Navadipa or Nuddea tract to Burdwan was issued a few months ago, and no administrative inconvenience will result from its recall. Under these circumstances, as the wishes of the people and the opinions of the local officers are in favor of the island of Navadipa or Nuddea remaining a part of the Nuddea district, the Lieutenant-Governor is glad to be able to comply with the prayer of the memorialists; and he directs that the order transferring this island, including the Nuddea town and the adjacent lands, to the Burdwan district, be reviewed, and that the tract be retransferred to the Nuddea district. The "khal" or branch of the river which flows behind or westward of Nuddea town will form at this point the boundary of the two districts.

H. J. REYNOLDS,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th September 1874.—In supersession of Rule 18 of the rules and regulations of the Port of Calcutta, published in the Notification of the 24th September 1872, the following modification of the rule having received the assent of the Governor-General in Council, under Section 7 of Act XXII of 1855, is published for general information :—

PORT RULE 18, REVISED.

From the 1st day of May until the 30th day of June, and from the 1st day of October to the 15th day of November, all vessels in the Port shall have their royal and top-gallant yards on deck, and mast-ropes rove in readiness to send the top-gallant masts down at short notice when required, that is, when the storm warning signal (*double cone*) is displayed ; and shall send down their top-sail yards and house top-masts when the storm signal (*drum*) is hoisted, or when ordered to do so by the Commissioners. Vessels about to leave the Port may send their top-gallant yards aloft 24 hours before leaving the moorings. Vessels entering the Port between the above dates, having top-gallant masts and yards aloft, may be placed in moorings, and the top-gallant yards of such vessels shall be sent down within 24 hours after they are moored.

The 8th September 1874.—The following letter, received from the Government of India in the Financial Department, is published for general information :—

No. 5206.

FORT WILLIAM, *the 26th August* 1874.

Read again—

Accounts Proceedings, June 1870, Nos. 150 to 154, and Accounts Proceedings, August 1871, No. 132, regarding the grant of loans to civil officers for building purposes.

Read also the undermentioned papers regarding an application from the Reverend H. Murray, Chaplain of Moradabad, for an advance of Rs. 4,320 under the rules of 1870 and 1871, and relating to an inquiry by the Government of the North-Western Provinces whether local Governments are not empowered to dispose of such applications :—

Accounts Proceedings, June 1874, Nos. 53 and 54.

Letter from the Government of the North-Western Provinces to the Government of India, in the Home Department, No. 1508, dated the 27th June 1874.

RESOLUTION.—The President in Council considers that local Governments may properly be left to deal with applications for these advances from civil officers and chaplains ; the circumstances in which the advances may be given, and the conditions to be observed, having been laid down in definite rules of the Government of India.

The Reverend Mr. Murray's application may accordingly be disposed of by the Government of the North-Western Provinces.

ORDERED that the foregoing Resolution be communicated to the Home Department,* the several local Governments and Administrations, the Comptroller-General, and the several Accountants-General and Deputy Accountants-General in independent charge.

NOTIFICATION.

The 14th September 1874.—It is hereby notified for general information that, under the provisions of Section 11, Act VII (B.C.) of 1864, the Lieutenant-Governor has been pleased to direct that the following rule be added as Rule 32B to the rules prescribed in the Salt Manual issued under date the 13th July 1870:—

Rule 32B.—Within twenty-four hours after the completion of deliveries of salt from board-ship upon rowannahs and certificates, the holders thereof must present them at the Board's Office for the purpose of having the endorsements, made on them by the Preventive Officers, examined. Chellans will then be granted, with regard to such rowannahs as would require them, according to Section 34 of the Rules. This rule will not prevent salt merchants removing their salt-laden boats from the ship's side to safe and convenient places in the river, under the boat-notes previously granted by the Preventive Officers. Any person failing to comply with the provisions of this rule shall be liable to a fine not exceeding Rs. 100.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 4th September 1874.

READ a statement showing the works of public utility constructed by private individuals in the several districts of Bengal during the year 1873.

RESOLUTION.—The Lieutenant-Governor is glad to find that the number and value of works constructed by private individuals for the public benefit in Bengal has increased greatly during the last few years.

The statements showed—

						Rs.
For the year 1871,	46	works	costing	...	...	54,800
" 1872,	69	do.	do.	...	...	80,600
" 1873,	163	do.	do.	...	...	1,69,715

These figures do not include the large sums which Khwajeh Abdool Ghunne and his son have given for the Dacca water-works, nor the cost of the great bridge which Baboo Soorjee Kant is building on the Mymensingh and Moortagachia road; nor the hundreds or even thousands of excellent works of tank improvement which have been undertaken during the last nine months by zemindars in the distressed districts.

2. Out of the whole expenditure the sum of Rs. 1,14,731 has been spent on tanks and wells, the object of which is to improve the local supply of drinking-water. The Lieutenant-Governor is specially glad to find that the zemindars and other wealthy persons of Bengal are spending their money on public works of this kind, for he believes that a supply of pure and wholesome drinking-water is a great want, if not the chief want, in most districts of Bengal, and especially in the tracts which have been visited by endemic fever.

3. The thanks of the Government of Bengal are tendered to each of the gentlemen named in the appended list. The Lieutenant-Governor hopes that

the list may in future years be much longer, and that great rich districts, such as the 24-Pergunnahs, Jessore, Cuttack, Backergunge, Bhagulpore, Monghyr, Dinagepore, and the districts of the Patna Division, which are now conspicuous by their absence, will appear in future lists.

4. Copy of this Resolution and of the appended statement will be published in the *Calcutta* and *Bengalee Gazettes*, and copies with translations should be forwarded by the Divisional Commissioners to each of the gentlemen named in the list.

By order of the Lieutenant-Governor of Bengal,

C. BERNARD,

Offg. Secy. to the Govt. of Bengal.

14. The Board of Examiners shall thereupon take the case of each candidate, with the report of the District Judge, into their consideration, and shall determine whether or not the candidate is possessed of the necessary qualifications. If the candidate is found qualified, the Board shall cause his name, the name of his father, his age and place of residence, and other needful particulars, to be entered in a register, with a declaration that he is permitted to appear at the next ensuing examination at * * * *

15. An extract from the register shall be forwarded to the District Judge for delivery to the candidate. The Judge shall cause a notice of his having received such extracts to be stuck up in his Court-house, and shall deliver them to the candidates on application.

The District Judge, in carrying out this Rule and Rule 13, shall conform to such instructions as he may receive from the Board of Examiners through their President or Secretary.

16. Before the date of examination, every candidate shall pay into the Government Treasury of the 24-Pergunnahs, or of the place where he is to be examined, the fee prescribed by Rule 22, and shall at the same time present to the Officer in charge of the Treasury the extract from the register furnished to him under Rule 10, and the treasury receipt for the fee shall be endorsed thereon. Every candidate for examination shall produce to the Examiners the extract from the register, with the treasury receipt so endorsed thereon.

VI.—ENROLMENT.

17. Any person who shall have qualified under these rules, and who shall desire to be admitted to practice, shall pay into the Government Treasury of the district in which he shall intend to practise the fee prescribed by Rule 22, and shall, on presentation of the certificate of the Examiners or of his diploma, and the receipt for the said fee, be entitled to apply to the High Court for admission and enrolment.

18. The application, together with the certificate and receipt required by Rule 17, shall be presented to the Judge of the District in which the applicant intends ordinarily to practise, and shall be forwarded by the Judge to the Registrar of the High Court, with such remarks as he may think fit to make thereon.

19. The name of the applicant and his place of abode, together with his father's name and place of abode, shall be affixed in some conspicuous place in the Court-house of the Judge to whom the application is sent, and also in the High Court, at least six weeks before the applicant is admitted to practise.

20. The High Court may call for evidence of the respectability of the applicant in any case in which it may be deemed necessary.

21. Upon the applicant's being admitted and enrolled by the High Court, a certificate to that effect shall be forwarded by the Registrar of the High Court to the Judge of the district, who, upon the applicant's delivering and leaving with him a declaration in writing signed by the said applicant in conformity with the recital in the form of certificate given in the 2nd Schedule to Act XX of 1865, shall grant him a certificate as required by the said Act.

VII.—FEES.

22. The fees payable previous to examination and on application for enrolment shall be as follows:—

	Pleader, Higher Grade.	Pleader, Lower Grade.	Mookhtar.
	Rs.	Rs.	Rs.
Before Examination	30	20	15
Before Enrolment	25	15	10

VIII.—PENALTIES.

33. If any person having passed the examination entitling him to be admited and enrolled as a First or Second Grade Pleader or as a Mookhtar, and shall fail to apply for such admission and enrolment for a period of one year from the time of passing the examination, he shall not be admitted and enrolled, unless by special order of the High Court the time for such application shall be extended.

24. If any person having been admitted and enrolled as a pleader or mookhtar shall neglect to take out a certificate, or, having obtained a certificate, shall fail to renew it for a period of three years, he shall be suspended, and shall not be entitled to receive a certificate or to have his certificate renewed without further orders of the High Court.

25. Any person who shall hold any appointment under Government, or shall carry on any trade or other business at the time of his application for admission as a Pleader or Mookhtar, shall state the fact in his application for admission, and the High Court may refuse to admit such person, or pass such orders theron as it thinks proper.

26. Any person who, having been admitted as a pleader or mookhtar, shall accept any appointment under Government, or shall enter into any trade or other business, shall give notice thereof to the High Court, who may thereupon suspend such pleader or mookhtar from practice, or pass such orders as the said Court may think fit.

27. Any wilful violation of any of the above rules shall subject a pleader or Mookhtar to suspension or dismissal.

CENTRAL RELIEF FUND.

Proceedings of the 24th Meeting of the Executive Committee, Central Relief Fund, held on the 2nd September 1874.

PRESENT:

The Hon'ble John Inglis, C.S.I., *Chairman.*
The Hon'ble J. R. Bullen-Smith.
The Hon'ble Rajah Jotendro Mohun Tagore.
Moonshee Amir Ali Khan Bahadoor.

I.—The proceedings of the previous meeting were read and confirmed.

II—The Chairman read a letter from the Government of Bengal (No. 5089—S.R., dated 18th August 1874,) inquiring whether the Committee's decision, as conveyed in their letter

No. 258, dated 3rd August, finally negatived the suggestion made in paragraphs 4 and 5 of Government letter No. 4583, dated 20th July, regarding the Committee taking over charges for charitable relief, under heading (*d*) of their Notification of 4th March, in the very distressed districts.

Resolved—That a reply to the Committee's letter, No. 288 of 1st September, be awaited.

III.—The Chairman read a communication from the Cooch Behar Commissioner, forwarded by Government, inquiring whether the readiness of the Committee to meet charges on account of charitable relief extends to such relief paid for hitherto out of the funds of the Cooch Behar State.

Resolved—That the Commissioner be asked how much he requires.

IV.—The Chairman read Patna Commissioner's No. 1871F., dated 5th August, submitting the views of the District Charitable Relief Committee, Shahabad, as to the best mode of affording relief under heading (*d*) of the Central Committee's Notification of 4th March.

Resolved—That the Commissioner be informed that he need not submit these details in future.

V.—The Chairman read a letter dated 28th July, from the Lord Mayor of London, on the subject of the funds raised there for the famine, and thanking the Committee and the Hon'ble V. H. Schalch for the prompt and courteous manner in which information had from time to time been supplied.

Resolved—That the letter be recorded.

VI.—The following applications for assignments were read, and the amounts asked for were granted, viz. :—

	Rs.
Relief Commissioner of Rajshahye, for Dinagepore dispensary ...	540
Collector of Moorshedabad	72,000
His Grace Archbishop Steins, for orphanages under his care ...	2,060
Patna Commissioner, for the Bettiah and other dispensaries of his division	500
Total ...	75,100

VII.—Cash accounts and statements as follows were read and ordered to be recorded, viz. :—

Beerbhoom	For July 1874.
Bankoora	For July 1874.
Hazareebagh	For June and July 1874.

VIII.—Forecasts of Additional Commissioner, Durbhanga, for August and September, and of Patna Commissioner for August, received from Government, were noted and recorded.

IX.—The Chairman laid before the meeting the 24th Special Narrative by Government of the famine, embracing the period from the 7th to 20th August 1874.

Resolved—That it be recorded.

X.—A Bill for Rs. 9-5 on account of postage incurred by the Board's Office in the transmission of the Committee's letters was submitted and passed.

XI.—The Honorary Treasurer submitted the following statement of funds :—

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit scholar who cannot construe the hymns of the ancient Rishis of his country.—*Extract from Preface.*

BENGAL FAMINE.

TWENTY-SIXTH SPECIAL NARRATIVE OF THE DROUGHT IN BENGAL, FROM 4TH TO THE 17TH SEPTEMBER 1874.

Weather and Rainfall.—During the last fortnight the weather has throughout almost the whole of the country been everything that could be wished. Almost immediately after the last narrative was written, the long-continued drought, which had caused so much anxiety in the Presidency and Burdwan Divisions, and in parts of Tirhoot, Rungpore, and Moorshedabad, came to an end, and since then there have been constant and copious falls of rain almost everywhere. More is still wanted in Burdwan, parts of Tirhoot, Sarun, Nuddea, and Moorshedabad, but everywhere else quite enough has fallen for present needs; and in parts of Hazareebagh and the Sonthal Pergunnahs the rain is said to have been superabundant and fine weather is said to be wanted.

Prospects of Crops.—The prospects of the crops having greatly improved under the plenteous rains of the last fortnight, it is only necessary for the present favorable weather to continue till the end of the first week in October to ave an unusua lly large crop in the greater number of districts

In those districts where planting has been delayed by the absence of rain, it will require a more lengthened period of rainy weather to render a good crop certain: and all that can be said now is, that there is no present fear of the failure of the crops, except over a very small and comparatively insignificant area; and that throughout by far the greater part of the country the prospects are better than those of ordinary years, and nowhere can it be said that the crops are irretrievably lost. Even in those districts where the late rice has been destroyed by the unusually severe floods which have inundated large tracts in the Sarun, Tirhoot, Monghyr, Moorshedabad, and Nuddea districts, it will probably be found possible to secure a rice crop by planting out seedlings as the waters recede, and in the northern districts the yield of the cold-weather crops in the inundated tracts is almost certain to be very much above the average.

Prices.—Prices have, on the whole, been pretty steady during the fortnight; they have risen in many districts, but the rise in no case has been large, and in many districts it has been exceedingly small. On the other hand, there are some instances of a notable fall in prices, especially in Dinagepore, Chumparun, and Purneah. In the first district the price of rice has fallen from 12 seers 12 chittacks to 17 seers; in Chumparun the fall has been from 12 seers to 18-8, and in Purneah from 13 to 18. In Purneah rice is now cheaper than it was this time last year, and in Chumparun the prices of the two periods are exactly the same. Rice is also cheap as compared with average prices in Hazareebagh and Lohardugga, especially in the latter district. The general movement has been as follows:—The price of rice has fallen in Bankoora, Beerbhoom, Nuddea, Moorshedabad, Dinagepore, Rajshahye, Sylhet, Gya, Chumparun, Monghyr, Bhagulpore, Purneah, Pooree, Balasore, Hazareebagh, Lohardugga, Singbhoom, and Manbhoom, and barley has fallen in Sarun. Prices have risen in Midnapore, Hooghly, 24-Pergunnahs, Jessore, Maldah, Rungpore, Bogra, Pubna, Julpigoree, Dacca, Fureedpore, Chittagong, Patna, Shahabad, Sonthal Pergunnahs, and Cuttack, and elsewhere they have been stationary.

Private Trade.—The transport of food-grains by the railway has almost entirely ceased, but the downward river traffic shows signs of increasing activity, as 4,258 tons of food-grains, chiefly wheat and gram, were registered as passing Sahebgunge in the fortnight ending the 29th August, against 861 tons registered in the previous fortnight. The upward traffic also shows an increase of 363 tons.

Tirhoot.—Things have improved very materially in this district since the date of the last narrative. Even in Warrisnuggur, whence the reports of the preceding fortnight were most gloomy, an 8-anna autumn and a 10-anna winter crop were expected, and elsewhere, throughout North Tirhoot, present prospects are generally exceedingly satisfactory. In South Tirhoot, though the late rains have improved prospects, yet in parts of the Mozufferpore Sub-division the crops are said to want more rain immediately. In the south large areas have been inundated, but to judge from the district officers' reports, the flood seems, on the whole, to have done more good than harm, as throughout the greater part of the country it has filled rice-fields with water, where the plants were previously dying from want of rain. It appears, however, to have done a good deal of harm to the root crops, which are largely grown in the Tajpore sub-division, though the damage done to the potatoes seems to be by no means irretrievable.

Chumparun.—There is nothing to remark about this district, except that the prospects continue steadily to improve, and now even from the south-east of the district, where a failure of the crops was looked for, the Collector, who has just returned from thence, reports that an average crop may with favorable weather be expected.

Sarun.—The floods are said to have caused considerable damage in this district, and the loss thence arising is said to have caused the increase of distress which is shown by the additional number on relief works. Parts of the district are said not to have had sufficient rain, while others immediately adjoining them have had abundance.

South Behar.—It is expected that all relief operations in these districts will cease immediately, and that they will no longer be considered as distressed tracts.

Bhagulpore Division.—The reports from all parts of the districts of this division coincide in stating that the prospects for the future season are most excellent. Some little local damage has been done by floods in Beegoo Serai in Monghyr, but as these have made a full winter crop almost a certainty, the temporary inconvenience caused by the inundation cannot be said to have caused any serious injury. Relief operations are everywhere being contracted, and should prospects continue as good as at present, the services of all, or nearly all, the special relief officers will probably be dispensed with by the end of this or the beginning of next month and things return to their normal condition.

Rajshahye Division.—Last fortnight some doubt was expressed as to the prospects of the crops in parts of this division, but all fears have for the present been allayed by the late copious rains. It is only in two small tracts of Moorshedabad that any fears for the future are now felt—one to the east, where the floods have destroyed at all events a portion of the late rice crop; but even where the lately planted seedlings have been destroyed, it is still considered possible to get a crop from fresh plantings, and the damage may probably not turn out so great as it was feared it would at first. In the west, rain had greatly improved the prospects, but more was wanted to put an entire end to present anxiety. In this division it is only necessary to wait till the prospects of the winter crops are completely assured before breaking up the special relief establishments.

Chota Nagpore.—There is still some little distress in Manbhoom, but that is decreasing, and with improved prospects will rapidly disappear.

Burdwan Division.—It is in this division alone that I have to report an increase of distress during the present fortnight, though even now signs are not wanting that it will soon decrease. There is a decided improvement in the Bankoora district, and the Collector of Beerbhoom speaks hopefully of the future. In Burdwan things remain much as before, but in Hooghly the pressure has greatly increased. In these two latter districts the prospects of the future crops, though improved, are by no means such as to leave no room for anxiety: the population is so dense, and has suffered so much from fever of late years, that there are always large numbers living on charity, and certain to be reduced to great straits when the smallest strain comes; and they can no longer be supported by their neighbours and relatives, who have been forced, by the doubtful prospects of the coming harvest, to curtail their outgoings.

Relief Works.—The following statement shows the total number on relief works during the fortnight as compared with that preceding it:—

	Last fortnight.	This fortnight.
Patna Division	238,404	211,867
Gunduk Embankment	8,421	5,942
Soane Canal	24,088	26,020
Bhagulpore Division	47,658	32,131
Rajshahye Division	44,920	22,990
Northern Bengal Railway	4,851	4,384
Chota Nagpore Division	4,185	1,632
Burdwan Division	20,585	27,008
Cooch Behar	2,290	.....
Total ...	395,402	331,982

The returns show a decrease in every district, except Sarun and the districts of the Burdwan division; in Monghyr, Purneah, Rungpore, and Manbhoom, relief works have ceased altogether; while in Bogra the number on the works is quite nominal. On the more important works, such as the Gunduck Canal and Northern Bengal Railway, labour is said to be very scarce, and profitable employment could be given to considerably larger numbers if they could be procured.

The following tabular statement shows the numbers in each district, with details as far as they are available, of those employed on task or piece-work and on daily wages:—

Gunduck Canal and Embankment.—The work on the canal has been greatly impeded during the past fortnight by the quantity of rain that has fallen; 62,449 cubic feet have been excavated during the fortnight. On the embankment breaches have been closed, and 7,32,083 cubic feet of earth-work thrown up, besides 7,47,265 superficial feet of turfing and dressing on the upper embankment, of which 42 miles are now reported complete. On the lower embankment 40,000 cubic feet of earth-work were put into the breach at Hajeepore. On the Sarun side the officers have been occupied day and night in watching the embankment and guarding against a breach; this has been done successfully, though the trial was very severe, and the works are now being still further strengthened.

Soane Canal.—This can no longer be regarded as a relief work, as distress has almost disappeared from the country which the canal passes through.

Northern Bengal Railway.—The total amount of earth-work completed up to the 5th instant was 7,57,34,000 cubic feet of earth-work, equal to 156 miles, of a bank 4 feet high, with a top width of 15 feet. During the fortnight 21½ lakhs of cubic feet of earth-work were thrown up. Labour is said to be very scarce, and work is retarded by the continual absence of clerks and officers on account of sickness. The general health of the staff is said to have not at all improved.

Charitable Relief.—The following tabular statement shows the number of persons in the receipt of charitable relief in each district as compared with the previous fortnight:—

	Grand Total	.....	476,248	625,252

The decrease in numbers continues to be general, except in Pubna, Hooghly, and Burdwan. In the firstnamed district the increase was caused by the flood, which added a considerable number suddenly to the applicants for relief, but it will probably be very temporary. In Hooghly and Burdwan, however, though it is to be hoped no further increase will take place, yet the numbers cannot be expected to decrease materially till the prospects of the crops are sufficiently assured to allow of the begging population returning to their ordinary means of support. The numbers on relief works and charitable relief combined amount to 808,230 for the present fortnight, against 1,020,654, the numbers stated in the last narrative, being a total decrease of 212,424 persons, against 53,634, the decrease last reported.

By order of the Lieutenant-Governor of Bengal,

J. F. K. HEWITT,

Offg. Junior Secy. to the Govt. of Bengal.

ERRATUM.

An error having been discovered in the figures under head of "Charitable Relief" published with the Twenty-fifth Special Narrative, the following corrected statement is published :—

Charitable Relief.—The following statement shows the number of persons in the receipt of charitable relief in each district as compared with the previous fortnight :—

	Total		148,150	149,660
	Grand Total		625 202	647,550

The decrease in numbers is almost general, the only districts that show an increase being Sarun, Bhagulpore, Moorshedabad, and Beerbhoom. In Bhagulpore the increase is only nominal, as the returns for the previous fortnight were imperfect. Had the full numbers been shown, the present fortnight's return would show a decrease. The total numbers on relief works and charitable relief for the present fortnight are 1,020,654 against 1,074,288, as shown in the previous narrative, being a total decrease of 53,634 persons.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 19th September 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
BURDWAN DIVISION. 1	Burdwan, 21st* Sep. 1874	·2	Rain at Cutwa 1·61; at Jehanabad 2·11; at Culna ·62; at Bood-Bood *nil*; Raneegunge 1·25. Prospects of the crops have improved by the recent rains, but more rain is wanted for the lately transplanted amun or late rice. Fever as before
2	Bankoora, 19th „ „	1·01	Heavy rain at head-quarters on the 13th; showers at intervals throughout the district. General prospects are favorable. The northern part of Moheshra Pergunnah is backward, both as regards the quantity and quality of the winter rice. Indigo manufacture has closed with a good return of over 700 maunds. Prices falling.
3	Beerbhoom, 19th „ „	3·06	Showery. The state and prospects of the crops at date are generally good, though short crops are anticipated over a small area, east of the railway. Prices falling.
4	Midnapore, 19th „ „	0·18	Generally fine, with occasional and partial showers. Though the week has been dry, no complaints of want of rain have been heard; the fall of the preceding week having been abundant. If rain falls to a seasonable extent next week, the crops will be doing generally well, though rather below par in the north-east. Aous or early rice coming into the market, and reducing prices.
5	Hooghly, 19th „ „	Nil	Cloudy and sultry; no rain. At Serampore rainfall 1·47, at Chunditolah 2·34, at Hurripal 1·55, and at Kistonagore 3·05 inches. Prospects of amun or late rice much improved; transplantation still going on. More rain is necessary. Reaping of the aous or early rice crop has commenced.
	Howrah, 19th „ „	·83	Much less rain than there ought to be. The amun or late rice in most parts of the district is at present looking very well indeed. The rain which fell last week has done a material amount of good. But there was not much rain in the Juggutbullubpore Thana and along the Hooghly boundary generally. In this comparatively small tract, it is feared, the crop must be a short one under any circumstances. Unfortunately this part of the district had but four annas crop last year, has been severely visited by epidemic fever, and contains a large number of paupers.
	Central Districts.		
PRESIDENCY DIVISION. 6	24-Pergunnahs, 21st† Sep. 1874.	Nil	Dry and close. The harvesting of the aous or early rice and jute not yet completed. Transplantation of amun or late rice, where possible, still going on. More rain is needed. Fever prevailing in Sub-divisions Baraset, Busseerhat, Satkhira, and Barripore. It is abating in Diamond Harbour.
7	Nuddea, 19th Sep. 1874	1·40	Seasonable. Floods have done harm to teel (oil-seed), urhur (pulse), sugarcane, and chillies and other crops, especially in the Meherpore and Chooadangah Sub-divisions. The amun or late rice crops, however, have derived benefit on the whole. The rain has done much good. Prices have slightly risen, perhaps, because of the floods
8	Jessore, 19th „ „	·59	The week has been generally cloudy, but there has been only a small quantity of rain at the head-quarters. A very high inundation has flooded the Jhenidah Sub-division, and has extended along the course of the Chittra as far down as Narrail. The amun or late rice crop has been submerged, and considerable fears are entertained as to whether it will revive. Elsewhere the late rain has been most beneficial, and the prospects are good. Prices are higher, particularly in the northern part of the district—a result due partly to the fears for the harvest caused by the inundation, and partly to the difficulty of getting the grain husked and brought to market owing to wet weather.
RAJSHAHYE DIVN. 9	Moorshedabad, 19th Sep. 1874.	2·42	There has been less rainfall than last week, but most parts have been visited by good showers; cloudy at the time of report. The inundation caused by the breach of the bund at Chaitpore has subsided with the fall of the Bhagiruthee, and the crops which were submerged on the low lands are recovering. Should no further rise take place in the rivers, the damage done to the crops will not prove serious, except in a limited tract. The floods in other parts are also subsiding. Arhur (pulse) alone is reported to have suffered severely. In the west, considerable improvement in the late rice crop is observed. Prices stationary.
10	Dinagepore, 18th Sep. 1874.	2·14	Rain all over the district throughout the week; heavier in the interior. The cutting of the bhadoi or early crops not quite finished yet There has been ample rain for the hymunti (winter rice), the prospects of which are most excellent. No more rain needed now, till the first week of October 1874.

* Telegram of the 21st September, received on the same day, shows rainfall during the seven days immediately preceding.

BENGAL.—(*Contd.*)				
		Central Districts.—(Contd.)		
RAJSHAHYE DIVISION.—(*Contd.*)	11	Maldah, 19th Sep. 1874	2·23	Rain almost daily, more or less; heavy and continual showers reported from the north of the district. The weather has been most favorable for the crops. The inundation has gone down about four feet. The prospects of the late rice are good. Kalai (pulse) is now being sown in some parts of the district.
	12	Rajshahye, 19th " "	4·34	There has been rather heavy rain everywhere throughout the district during the week. The inundation is subsiding, and the winter rice crop is doing well, only a very small portion of it having been damaged by the sudden floods. Prices have risen in some places and fallen in others, but only to a small extent. The fever, which generally prevails at this season, has commenced to show itself in the east of the district; otherwise public health is good.
	13	Rungpore, 18th " "	3·89	Heavy showers at the commencement of the week. Weather apparently clearing up at the end. The rainfall has been heavier in the south. Gybanda reports 8·53, and Govindgunge 17· inches, but this latter quantity has not been gauged. All the rivers are rising. The prospects of the crops greatly improved everywhere. Transplantation still actively going on.
	14	Bogra, 19th " "	2·31	Crops look excellent. Prospects are very good in every respect.
	15	Pubna, 19th " "	1·79	Weather dry, and no rain during the week, except a heavy shower on Monday night. In some parts of the district about four annas of the amun or late rice crop has suffered from the inundation. The water is now gradually subsiding, and the prospect of the above crop looks favorable. The state of other crops is just the same as reported in the previous report Fever still continues.
COOCH BEHAR DIVN.	16	Darjeeling, 18th " "	3·25	Most of the rain during the week is registered as having fallen on Sunday, the 13th. All the other days rain fell in light showers. All the crops throughout the district are progressing very favorably. In the plains, a great deal of rain fell during the week, which is considered beneficial.
	17	Julpigoree, 18th " "	24·52	The rainfall this week has been exceptionally high; it has also been general throughout the district. Nothing could be finer for the cold weather rice. The general feeling in the district was well expressed by an agriculturist, who, speaking of the heavy rains, said "it is all so much gold now" which is falling in the fields.
		Cooch Behar, 17th " "	13·11	Very wet, with high floods, which have done no harm; prospects continue to be good.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 21st* " "	0·07	Weather dry and hot; crops good; more rain required.
	19	Fureedpore, 19th " "	0·95	Excepting on Tuesday and Thursday, when nearly an inch of rain fell, the past week has been dry and sunny, most favorable in every way for present agricultural requirements. After all the rain, sun is good for the amun or late rice. The water since last week has fallen about three inches, which, under ordinary circumstances, is immaterial. Present prospects of the amun are reported excellent throughout the district. The price of coarse rice at Fureedpore and Goalundo has fallen from 12 to 13, and from 13 to 15 seers per rupee. At Madareepore, Bhanga and Gopalgunge there has been no change.
	20	Backergunge, 17th Sep. 1874.	2·90	Rainy weather. Prospects of crops favorable.
	21	Mymensingh, 18th Sep. 1874.	2·21	In the north, east, and west of the district the rainfall has been much heavier than at the sudder. The prospects of the late rice crop are satisfactory throughout the district, and the area under cultivation is up to the average.
	22	Sylhet, 15th Sep. 1874	16·86	Almost incessant rain since Wednesday, with just signs of a break on the 15th. Amun or late and kataria crops promise well after the heavy rain. All anxiety for crops on high lands, and in pergunnahs Taraf, Bejura and Bhanngach more especially, may now be said to be removed. Good fourteen annas of the sail crop has now been transplanted.
CHITTAGONG DIVN.	23	Chittagong, 17th Sep. 1874.	2·96	Rain every day at head-quarters, except Sunday the 13th. Weather cloudy and breezy, with fine intervals. From Cox's Bazar 2·51 inches reported up to 15th instant. The reaping of the aous or early rice is nearly finished, and, as already reported, the outturn is fair. Transplanting of the amun or sail (late rice) crop has been delayed by want of rain last month, but it will be completed shortly; and the weather during the week has been most favorable for field work. Cholera still reported from Harbang (Cox's Bazar).
	24	Noakholly, 17th Sep. 1874	6·68	Rain throughout the week. The aous or early rice crop has been reaped; the outturn has not been reliably estimated, but is said in most places to be as good as, or better than, last year. The amun or late rice has been nearly all transplanted, it has benefited by the rain, and promises well.

* Telegram of the 21st September, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—(*Concld.*)				
		Eastern Districts.—(*Contd.*)		
CHITTAGONG DIVN.	25	Tipperah, 18th Sep. 1874	2·53	Cool and rainy. The rain which has fallen during the last fortnight has done much good to the amun or late rice crops in most parts of the district, except in the most northern thanas, where more rain is still required.
	26	Chittagong Hill Tracts, 15th Sep. 1874.	3·85	Rainy throughout the whole week. The hill people are busily engaged in harvesting their paddy crop. Cotton is thriving well, the pods having formed. The heavy fall of rain during the week have been of much service to the plough cultivators. Prospects good.
		Hill Tipperah, 19th Sep. 1874.	1·72	Generally hot and cloudy. Rainy during the latter part of the week; the late rice crop doing well.
BEHAR.				
PATNA DIVISION.	27	Patna, 21st* Sep. 1874	·42	Weather very close, especially in the evening. Bhadoi crops have nearly been harvested. Rice crops are thriving well, but more rain is wanted in some places. Health of the district generally good.
	28	Gya, 19th " "	Nil.	Fine and hot; the crops continue to progress favorably. The bhadoi or early crop harvest has been unusually good, and the prospects of the rice are everywhere favorable. Health generally good. Fever somewhat prevalent.
	29	Shahabad, 19th " "	1·70	Sunny and very hot. The prospects of all the crops are excellent. This break in the weather is advantageous in every way. Water is abundant. Health on the whole good.
	30	Tirhoot, 19th " "	·56	Hot in the day and cloudy at night. In the Hajeepore Sub-division the bhadoi is now a splendid crop and safe. The inundation, where it has not been excessive, has benefited the paddy. Reports from the interior good. In the Mudhoobunnee Sub-division the prospects of the paddy crop most excellent. The early gamrhi rice, which has not died, is now being cut; but its outturn, though more than expected, will be quite inconsiderable. In Durbhunga, prospect of rice crop satisfactory, except for about 20 square miles in the south, where rain is much wanted, and 3,000 acres in the west submerged. In Rosserah the prospects are generally hopeful, except in Warisnuggur relief circle, where the rice crop will be under a short average one; with good rain between this and 15th October, a fair average crop, though a late one, may be expected. Bhadoi has yielded generally an average crop. Reports from Seetamurhee not received. There is no material change in the prospect of crops in the Sudder Sub-division. *Tajpore.*—Rainfall, ·53 at Tajpore, but partial; bhadoi harvest progressing. Paddy still looks fresh, but wants heavy rain; transplantation incomplete in north-west, and time for it gone. Root crops promising.
	31	Sarun 19th " "	·19	Hot and clear; both east and west wind. Very slight showers, except within the jurisdiction of Thanas Mushruck, Pursa, and Bussuntpore, in the Sudder Sub-division, and Burrowlee and Buragaon in the Sewan Sub-division, where there has been no rain. The bhadoi or early crops are being harvested and consumed, and coming into the markets here and there in small quantities. The aghani or late rice in the low lands is promising, in the higher lands it is being seriously affected by drought; transplantation is at a standstill. Rain most anxiously looked for. In Thana Buragaon the rice seedlings are being cut for fodder for cattle. In Thana Burrowlee, an area of about 10,000 beeghas of paddy land has been successfully irrigated from the Gunduk by means of petty irrigation works constructed by relief labour during the present year. Manufacture of indigo "khontee" (second cuttings) is still going on in some factories; the outturn has been very small. Prices (jowar, cheena, and gram excepted) steady. Some cases of cholera at Sewan and in Bussuntpore.
	32	Chumparun, 18th Sep. 1874.	0·17	Bright, hot and sunny, with morning mists, occasional showers, and light variable winds. The rainfall at Bettiah has been ·24, but in the east between 2 and 3 inches have fallen, thereby much improving prospects in that quarter, which elsewhere, except in a corner of the south-east, are most favorable.
BHAGULPORE DIVN.	33	Monghyr, 19th " "	1·42	Hot and sultry. The prospects of the crops continue good throughout the district; with seasonable rain next month splendid rice crop is expected.
	34	Bhagulpore, 21st* " "	·12	There has been rain in the interior; at Banka, 2·02. Soopool and Muddehpoora both report all crops as in excellent condition. Two more good heavy falls of rain, one in this month and one in the next, will ensure very fine crops. The same may be said of the Sudder and Banka Sub-divisions. General health very good.
	35	Purneah, 19th Sep. 1874	2·01	Same as last reported. The prospects continue good. A little fine weather is now wanted to enable people to dry and thrash the early rice. The yield of makai (Indian corn) has been enormous. It is almost a drug in the markets.
	36	Sonthal Pergunnahs, 19th Sep. 1874.	0·71	The weather has been all that could be desired, the two sub-divisions which wanted a good fall of rain have got it—Rajmehal getting 5·9 and Godda 6·3; in the Sudder and Deogurh, where sunshine was wanted, there has been but little rain. Reports all round are very cheering. If seasonable rain falls hereafter there will be more than an average harvest of all crops.

* Telegrams of the 21st September, received on the same day, shows rainfall during the seven days immediately preceding.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
ORISSA.				
ORISSA DIVISION.	37	Cuttack, 21st* Sep. 1874	1·05	Rain at Jajpore 2·5. Weather clear, with occasional storms. Floods have subsided; very little damage done. Crops generally very flourishing. Public health good.
	38	Pooree, 19th " "	·63	Rainy in the early part of the week and since cloudy. The early rice crop is ripening and partly being reaped, but the outturn is indifferent owing to the late excessive rain and heavy floods. The late rice crop is being weeded and also transplanted where it has been destroyed by flood. The rivers have risen again, but the floods have not caused any fresh damage. The prospects of the crops are likely to improve with a continuance of fair weather. Sugarcane is doing well and promises a good crop. Mandia, arhur, and nowbirhi (pulses) are growing well. Teel-seed is being harvested with an indifferent outturn. Prices stationary. Public health fair.
	39	Balasore, 18th " "	·34	No rain since the 12th. The people are reaping their early rice, which is, however, an insignificant harvest, and weeding their late rice. General prospects continue favorable. Some loss has been caused as usual by the Suburnrekha floods. In the south of the district the crop newly planted on the inundated lands is doing well.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
	40	Hazareebagh, 18th Sep. 1874.	·06	Seasonable The sunshine of the past week has greatly benefited the ripening crops, and is most seasonable for harvesting the early rice. Prospects at present are very good everywhere.
	41	Lohardugga, 19th Sep. 1874.	2·31	Showery, with intervals of sunshine. The prospects of the crops are very good all over the district. The harvesting of the high land rice is going on. The bhadoi crops in Chota Nagpore Proper generally are very fine, and the late rice also promises well. In the Palamow Sub-division the bhadoi crops have been somewhat injured by the heavy rain, but the late rice crop is doing well. Lands being ploughed for the rubbee crops.
	42	Singbhoom, 18th Sep. 1874.	0·59	Hot and cloudless during the greater part of the week. Favorable. The break in the weather was required and will do good if not of too long duration. The gora dhan still being cut. Outturn good. General public health good. Condition of people good.
	43	Manbhoom, 19th Sep. 1874.	0·88	Favorable weather. The weather has been characterised during the last week by alternate sunshine and showers, which is favorable for all the crops, and also admits of the gora rice, now being cut, being gathered in, in good order. The rice crop only lately planted out have been attacked by the insect named boojs, but not to any very great extent as yet, and the damage done is chiefly confined to the crops on poor land, where the plants are weak and stunted. All the other crops and the rice crop on lower and better class of lands are doing well. Health good.

CALCUTTA, STATISTICAL DEPT.,
The 22nd September 1874.

R. KNIGHT,
Asst. Secy. to the Govt. of Bengal.

Note on the Rainfall in August 1874.

THE rainfall in August was generally above the average in Orissa, and very heavy in the southern parts of the Cuttack district; above the average in Chota Nagpore, and in the districts of Behar south of the Ganges, and very heavy in Gya and Shahabad. In Behar, north of the Gan ges (except in the northern part of Purneah), the fall was generally deficient, but not to any considerable degree, except in Tirhoot, where it was very scanty.

Throughout Bengal Proper, with the exception of the western districts Beerbhoom, Bankoora, and Midnapore, the southern parts of the 24-Pergunnahs, and Noakholly in Chittagong, the rainfall of the month was very deficient.

The places where the deficiency was greatest are shown in the following table, which gives side by side the actual rainfall in August 1874, and the normal rainfall for the same period :—

A full comparison of the rainfall in August of the present season and of the total rainfall up to the 31st August, with the averages of past years, was published with the weekly report of rainfall from this office in the *Calcutta Gazette* of the 16th instant.

As regards neighbouring provinces, it appears from such returns as have been received up to date that the August rainfall in the Central Provinces, North-Western Provinces, and in the north-east of the Assam valley, was considerably in excess of the average.

CALCUTTA,
The 17th September 1874.

The mean barometer as likewise the dry and wet bulb thermometer means are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken at unity. The receiver of the lower rain gauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.

The 19th September 1874.—The following Resolution, regarding the retransfer of the town of Navadipa and the adjacent villages from the district of Burdwan to that of Nuddea, is published for general information :—

Read a petition from the inhabitants of the town of Navadipa or Nuddea, begging for a reconsideration of the decision that the town and island of Navadipa should be transferred to the Burdwan district.

RESOLUTION.—The Lieutenant-Governor met most of the memorialists on the occasion of his visit to the town of Nuddea on 13th September, and he ascertained on the spot that this petition represents the views of the most influential and important section of the people of Nuddea; and he learned that most of the memorialists held lands in, and were connected with, the Nuddea district on the left bank of the Bhagiruttee. His Honor also consulted the Magistrates of the Burdwan and Nuddea districts, and ascertained that no executive or fiscal advantages will be gained by transferring this small tract to Burdwan, while there are many disadvantages in its remaining part of the Burdwan district. The Magistrate-Collector of the Nuddea district, who has known the town of Nuddea and its people for nearly five years, has informed the Lieutenant-Governor that the allegations made by the memorialists regarding the wishes of the townspeople, and regarding the practical convenience of their town remaining a part of the Nuddea district, are in the main correct.

2. The order transferring the Navadipa or Nuddea tract to Burdwan was issued a few months ago, and no administrative inconvenience will result from its recall. Under these circumstances, as the wishes of the people and the opinions of the local officers are in favor of the island of Navadipa or Nuddea remaining a part of the Nuddea district, the Lieutenant-Governor is glad to be able to comply with the prayer of the memorialists; and he directs that the order transferring this island, including the Nuddea town and the adjacent lands, to the Burdwan district, be reviewed, and that the tract be retransferred to the Nuddea district. The "khal" or branch of the river which flows behind or westward of Nuddea town will form at this point the boundary of the two districts.

RESOLUTION.

SCARCITY AND RELIEF DEPARTMENT.

Calcutta, the 4th September 1874.

READ a statement showing the works of public utility constructed by private individuals in the several districts of Bengal during the year 1873.

RESOLUTION.—The Lieutenant-Governor is glad to find that the number and value of works constructed by private individuals for the public benefit in Bengal has increased greatly during the last few years.

The statements showed—

						Rs.
For the year 1871,	46	works	costing	...	...	54,800
" 1872,	69	do.	do.	...	...	80,600
" 1873,	163	do.	do.	...	...	1,69,715

These figures do not include the large sums which Khwajeh Abdool Ghunne and his son have given for the Dacca water-works, nor the cost of the great bridge which Baboo Soorjee Kant is building on the Mymensingh and Moortagachia road; nor the hundreds or even thousands of excellent works of tank improvement which have been undertaken during the last nine months by zemindars in the distressed districts.

2. Out of the whole expenditure the sum of Rs. 1,14,731 has been spent on tanks and wells, the object of which is to improve the local supply of drinking-water. The Lieutenant-Governor is specially glad to find that the zemindars and other wealthy persons of Bengal are spending their money on public works of this kind, for he believes that a supply of pure and wholesome drinking-water is a great want, if not the chief want, in most districts of Bengal, and especially in the tracts which have been visited by endemic fever.

3. The thanks of the Government of Bengal are tendered to each of the gentlemen named in the appended list. The Lieutenant-Governor hopes that

the list may in future years be much longer, and that great rich districts, such as the 24-Pergunnahs, Jessore, Cuttack, Backergunge, Bhagulpore, Monghyr, Dinagepore, and the districts of the Patna Division, which are now conspicuous by their absence, will appear in future lists.

4. Copy of this Resolution and of the appended statement will be published in the *Calcutta* and *Bengalee Gazettes*, and copies with translations should be forwarded by the Divisional Commissioners to each of the gentlemen named in the list.

By order of the Lieutenant-Governor of Bengal,

C. BERNARD,
Offg. Secy. to the Govt. of Bengal.

POLITICAL.

Fort William, the 24th September 1874.

No. 2095 *P.*—The following order of Her Majesty in Council published in the *London Gazette* of the 7th August 1874, is republished for general information:—

At the Court at *Osborne House, Isle of Wight,* the 6th day of *August* 1874.

PRESENT:

The QUEEN'S Most Excellent Majesty in Council.

WHEREAS by an Act of Parliament made and passed in the Session of Parliament holden in the thirty-third and thirty-fourth years of the reign of Her present Majesty, intituled "An Act for amending the law relating to the Extradition of Criminals," it was amongst other things enacted, that where an arrangement has been made with any foreign State with respect to the surrender to such State of any fugitive criminals, Her Majesty may, by Order in Council, direct that the said Act shall apply in the case of such foreign State; and that Her Majesty may, by the same or any subsequent Order, limit the operation of the Order, and restrict the same to fugitive criminals who are in or suspected of being in the part of Her Majesty's dominions specified in the Order, and render the operation thereof subject to such conditions, exceptions, and qualifications as may be deemed expedient:

And whereas a Treaty was concluded on the nineteenth day of June last between Her Majesty and the King of the Netherlands, for the Mutual Extradition of Fugitive Criminals, which Treaty is in the terms following:—

HER Majesty the Queen of the United Kingdom of Great Britain and Ireland, and His Majesty the King of the Netherlands, having judged it expedient, with a view to the better administration of justice and to the prevention of crime within the two countries, that persons charged with or convicted of the crimes hereinafter enumerated, and being fugitives from justice, should, under certain circumstances, be reciprocally delivered up; their said Majesties have named as their Plenipotentiaries to conclude a Treaty for this purpose, that is to say:

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, the Honourable Sir Edward Alfred John Harris, a Vice-Admiral in Her Majesty's Royal Navy, Knight Commander of the Most Honourable Order of the Bath, Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to His Majesty the King of the Netherlands:

And His Majesty the King of the Netherlands, M. Joseph Lodewyk Hendrik Alfred Baron Gericke van Herwynen, Commander of the Order of the Netherland Lion, Knight Grand Cross of the Oaken Crown of Luxemburg, &c., &c., His Majesty's Minister for Foreign Affairs; and M. Gerrit de Vries, Commander of the Order of the Netherland Lion, His Majesty's Minister of Justice,

Who, after having communicated to each other their respective full powers, found in good and due form, have agreed upon and concluded the following Articles:—

ARTICLE I.

It is agreed that Her Britannic Majesty and His Majesty the King of the Netherlands shall, on requisition made in their name by their respective Diplomatic Agents, deliver up to each other reciprocally, any persons who, being accused or convicted of any of the crimes hereinafter specified, committed within the jurisdiction of the requiring party, shall be found within the territories of the other party.

HARE Majesteit de Koningin van het Vereenigd Koningrijk van Groot Brittannie en Ierland, en Zijne Majesteit de Koning der Nederlanden, het nuttig geoordeeld hebbende, ter bevordering eener betere bedeeling van het regt en ter voorkoming van misdrijven in de twee landen, dat personen, beschuldigd van of veroordeeld wegens de natenoemen misdrijven en die voortvlugtig mogten zijn, wederkeerig onder zekere voorwaarden uitgeleverd worden; zoo hebben Hunne gezegde Majesteiten tot hare Gevolmagtigden tot het aangaan eener daartoe strekkende overeenkomst benoemd, te weten:

Hare Majesteit de Koningin van het Vereenigd Koningrijk van Groot Brittannie en Ierland den Achtbaren Sir Edward Alfred John Harris, Vice-Admiraal van Harer Majesteits Vloot, Commandeur der Zeer Eervolle Orde van het Bad, Harer Majesteits Buitengewoon Gezant en Gevolmagtigd Minister bij Zijne Majesteit den Koning der Nederlanden;

En Zijne Majesteit de Koning der Nederlanden, den Heer Joseph Lodewyk Hendrik Alfred Baron Gericke van Herwynen, Commandeur der Orde van den Nederlandschen Leeuw, Ridder Grootkruis der Orde van de Eiken Kroon van Luxemburg, enz., enz., Hoogstdeszelfs Minister van Buitenlandsche Zaken; en den Heer Gerrit de Vries, Commandeur der Orde van den Nederlandschen Leeuw, Hoogstdeszelfs Minister van Justitie;

Welke, na elkander hunne volmagten, welke in goeden en behoorlijken vorm zijn bevonden te hebben medegedeeld, omtrent de volgende Artikelen zijn overeengekomen en deze hebben vastgesteld:—

ARTIKEL I.

Er is overeengekomen dat Hare Britsche Majesteit en Zijne Majesteit de Koning der Nederlanden, op eene in haren naam door hare Diplomatieke Agenten gedane aanvrage, wederkeerig aan elkander zullen uitleveren alle personen die, beschuldigd van of veroordeeld wegens een der hieronder omschreven misdrijven, gepleegd binnen het regtsgebied der opeischende partij, op het grondgebied der andere partij gevonden zullen worden.

ARTICLE II.

The crimes for which the extradition is to be granted are the following:—

1. Murder (including assassination, parricide, infanticide, and poisoning), or attempt to murder.

2. Manslaughter.

3. Counterfeiting or altering money, or uttering counterfeit or altered money.

4. Forgery, counterfeiting or altering of public or private documents, including forgery, counterfeiting or altering of paper money, bank notes, or other public securities.

5. Embezzlement or larceny, comprehending any larceny that by the Netherland Penal Law is not considered as "vol simple."

6. Obtaining money or goods by false pretences, including the crimes designated in the Netherland Penal Law as peculation, abstraction, or misapplication by bailies or public accountants.

7. Crimes against Bankruptcy Law which by the Netherland Penal Law are considered as fraudulent bankruptcy.

8. Perjury.

9. Rape.

10. Arson.

The extradition is also to take place for participation in any of the aforesaid crimes, provided such participation be punishable by the laws of both the Contracting Parties.

ARTIKEL II.

De misdrijven, ter zake waarvan uitlevering zal worden toegestaan, zijn de volgende:—

1. Moord (daaronder begrepen, vadermoord, kindermoord, en vergiftiging) of poging tot moord.

2. Moedwillige doodslag.

3. Muntvervalsching of muntschennis, of het des bewust in omloop brengen van valsche munt.

4. Valschheid in geschriften, daaronder begrepen het namaken van bank billetten, muntpapier, en openbare schuldbrieven.

5. Diefstal, daaronder begrepen elke diefstal, die door de Nederlandsche strafwet niet als eenvoudige diefstal (vol simple) beschouwd wordt.

6. Opligting, knevelarij, verduistering of ontvreemding door openbare ambtenaren met bewaring of ontvangsten belast.

7. Bedriegelijke bankbreuk.

8. Valsch getuigenis.

9. Verkrachting.

10. Opzettelijke brandstichting.

De uitlevering zal ook plaats hebben ter zake van medepligtigheid aan al de voornoemde misdrijven, mits zoodanige medepligtigheid naar de wetten van beide de Contracterende Partijen strafbaar zij.

ARTICLE III.

No subject of the Netherlands shall be given up by the Government of the Netherlands to the Government of the United Kingdom; and no subject of the United Kingdom shall be delivered up by the Government thereof to the Government of the Netherlands.

With reference to the application to the present Treaty, are comprised in the denomination of "subjects," not only naturalized citizens of the country, but also such foreigners as, according to the laws of either of the Contracting Parties, are assimilated to subjects, as well as such foreigners, who being domiciled in the country, and having married a citizen thereof, have one or more children by that marriage born there.

ARTIKEL III.

Geen Nederlandsch onderdaan zal door de Nederlandsche Regering aan de Regering van het Vereenigd Koningrijk worden uitgeleverd; en geen onderdaan van het Vereenigd Koningrijk zal door de Regering van dat Rijk aan de Nederlandsche Regering worden uitgeleverd.

Met betrekking tot de toepassing der tegenwoordige overeenkomst, zijn onder de benaming van "onderdanen" begrepen niet alleen genaturaliseerden, maar ook zoodanige vreemdelingen die, volgen de wetten van elke der Contracterende Partijen met onderdanen zijn gelijk gesteld, en evenzoo zoodanige vreemdelingen, die in het land gevestigd zijn en met eene vrouw des lands gehuwd, of gehuwd geweest, een of meer kinderen hebben uit dat huwelijk in het land geboren.

ARTICLE IV.

The extradition shall not take place if the person claimed on the part of the Government of the United Kingdom, or the person claimed on the part of the Government of the Netherlands, has already been tried and discharged or punished, or is still under trial, in the Netherlands or in the United Kingdom, respectively, for the crime for which his extradition is demanded.

If the person claimed on the part of the Government of the United Kingdom, or if the person claimed on the part of the Government of the Netherlands, should be under examination for any other crime in the Netherlands or in the United Kingdom respectively, his extradition shall be deferred until the conclusion of the trial, and the full execution of any punishment awarded to him.

ARTIKEL IV.

De uitlevering zal geen plaats hebben indien de persoon door de Regering van het Vereenigd Koningrijk opgeëischt of de persoon door de Nederlandsche Regering opgeëischt ter zake van het misdrijf, wegens hetwelk zijne uitlevering aangevraagd wordt, reeds heeft te regt gestaan en vrijgesproken, van regtsvervolging ontslagen, of gestraft is, of nog vervolgd wordt, respectievelijk in Nederland of in het Vereenigd Koningrijk.

Indien de persoon door de Regering van het Vereenigd Koningrijk opgeëischt, of indien de persoon door de Nederlandsche Regering opgeëischt, wegens een ander misdrijf in Nederland of in het Vereenigd Koningrijk respectievelijk, gepleegd, wordt vervolgd, zal zijne uitlevering worden uitgesteld tot na afloop van het strafgeding en van de geheele tenuitvoerlegging der hem opgelegde straf.

The extradition shall also be deferred if the person claimed should be detained for debt by a sentence passed before the requisition for the surrender, under the laws of the country where he shall be found.

ARTICLE V.

The extradition shall not take place if, subsequently to the commission of the crime, or the institution of the penal prosecution, or the conviction thereon, exemption from prosecution or punishment has been acquired by lapse of time, according to the laws of the State applied to.

ARTICLE VI.

A fugitive criminal shall not be surrendered if the offence in respect of which his surrender is demanded is one of a political character, or if he prove that the requisition for his surrender has in fact been made with a view to try or to punish him for an offence of a political character.

ARTICLE VII.

A person surrendered can in no case be kept in prison, or be brought to trial in the State to which the surrender has been made, for any other crime or on account of any other matters than those for which the extradition shall have taken place, until he has been restored or has had the opportunity of returning to the country from whence he was surrendered.

The period of one month shall be considered as the limit of the period during which the prisoner may, with the view of securing the benefits of this Article, return to the country from whence he was surrendered.

This stipulation does not apply to crimes committed after the extradition.

ARTICLE VIII.

The requisition for extradition shall be made through the Diplomatic Agents of the High Contracting Parties, respectively.

The requisition for the extradition of an accused person must be accompanied by a warrant of arrest issued by the competent authority of the State requiring the extradition, and by such evidence as, according to the laws of the place where the accused is found, would justify his arrest if the crime had been committed there.

If the requisition relates to a person already convicted, it must be accompanied by the sentence of condemnation passed against the convicted person by the competent Court of the State that makes the requisition for extradition.

A requisition for extradition cannot be founded on sentences passed *in contumaciam*.

ARTICLE IX.

If the requisition for extradition be in accordance with the foregoing stipulations, the competent authorities of the State applied to shall proceed to the arrest of the fugitive.

The prisoner is then to be brought before a competent Magistrate, who is to examine him and to conduct the preliminary investigation of the case, according to the laws of the country in which he is found.

Ook zal de uitlevering worden uitgesteld, indien de opgeëischte persoon wegens schulden gegijzeld is krachtens eene veroordeeling, volgens de wetten aan het land, waar hij gevonden zal zijn vóór de vanvrage tot uitlevering uitgesproken.

ARTIKEL V.

De uitlevering zal geen plaats hebben indien, na het plegen des misdrijfs, of het instellen eener geregtelijke vervolging, of de daarop gevolgde veroordeeling, de vervolging of de straf verjaard is volgens de wetten van den Staat aan welken de uitlevering wordt aangevraagd.

ARTIKEL VI.

Voortvlugtige misdadigers zullen niet uit geleverd worden indien het misdrijf ter zake waarvan hunne uitlevering wordt aangevraagd een staatkundig karakter draagt, of zij het bewijs leveren dat de aanvrage om hunne uitlevering opzettelijk gedaan is met het doel om hen ter zake van een misdrijf van staatkundigen aard te vervolgen of te straffen.

ARTIKEL VII.

De persoon, wiens uitlevering heeft plaats gehad kan in geen geval in hechtenis gehouden of vervolgd worden in den Staat aan welken de uitlevering heeft plaats gehad, ter zake van eenig ander misdrijf of wegens eenige andere zaak dan die waarvoor de uitlevering geschied is, advorens hij is teruggekeerd of de gelegenheid gehad heeft terug te keeren naar het land van waar hy uitgeleverd is.

Door het verloop van ééne maand zal de termijn, gedurende welken het den uitgeleverde vrijstaat, met het doel om zich het bij dit Artikel bedongen voorregt te verzekeren, naar het land vaan waar hij uitgeleverd is terugtekeeren, geacht worden verstreken te zijn.

Deze bepaling is niet toepasselijk op misdrijven, na de uitlevering gepleegd.

ARTIKEL VIII.

De aanvrage tot uitlevering zal gedaan worden door de Diplomatieke Agenten der Hooge Contracterende Partijen, respectievelijk.

De aanvrage tot uitlevering van een beschuldigde moet vergezeld zijn van een bevel, van gevangenneming afgegeven door de bevoegde overheid van den Staat, die de uitlevering aanvraagt, en van zoodanige stukken als welke overeenkomstig de watten der plaats, waar de beschuldigde gevonden is, zijne aanhouding zouden wettigen indien het misdrijf aldaar gepleegd was.

Indien de aanvrage een veroordeelde betreft, moet zij vergezeld zijn van het veroordeelend vonnis of arrest, ten laste van den veroordeelde gewezen door den bevoegden regter van den Staat, die de uitlevering aanvraagt.

Op veroordeelingen by verstek kan geen aanvrage tot uitlevering gegrond worden.

ARTIKEL IX.

Wanneer de aanvrage tot uitlevering overeenkomstig de voorgaande bepalingen is geschied, zal de bevoegde magt in den Staat, aan welken de aanvrage gedaan is, de noodige maatregelen nemen tot in hechtenis stelling van den voortvlugtige.

De aangehoudene zal in dat geval voor be bevoegde regterlijke overheid gebragt worden, welke hem in verhoor zal nemen en het voorloopig onderzoek der zaak zal doen plaats hebben overeenkomstig de wet van den Staat, alwaar hij opgespoord is.

ARTICLE X.

The extradition shall not take place before the expiration of fifteen days from the committal, and then only if the evidence produced in due time be found sufficient according to the laws of the State applied to.

ARTICLE XI.

A fugitive criminal may, however, be apprehended under a warrant issued by any Police Magistrate, Justice of the Peace, or other competent authority in either country, on such information or complaint, and such evidence, or after such proceedings as would, in the opinion of the person issuing the warrant, justify the issue of a warrant, if the crime had been committed, or the prisoner convicted, in that part of the dominions of the two Contracting Parties in which he exercises jurisdiction: Provided however that in the United Kingdom, the accused shall, in such case be sent as speedily as possible before a Police Magistrate in London. He shall be discharged, as well in the United Kingdom, as in the Netherlands, if within fourteen days, a requisition shall not have been made for his surrender by the Diplomatic Agent of his country.

ARTICLE XII.

If in any criminal matter, pending in any Court or tribunal of one of the two countries, it is thought desirable to take the evidence of any witness in the other, such evidence may be taken by the judicial authorities in accordance with the laws in force on this subject in the country where the witness may be.

ARTICLE XIII.

All articles seized which were in the possession of the person to be surrendered at the time of his apprehension, shall, if the competent authority of the State applied to for the extradition has ordered the delivery thereof, be given up when the extradition takes place; and the said delivery shall extend not merely to the stolen articles, but to everything that may serve as a proof of the crime.

ARTICLE XIV.

The High Contracting Parties renounce any claim for the reimbursement of the expenses incurred by them in the arrest and maintenance of the person to be surrendered, and his conveyance till placed on board ship, as well as for the reimbursement of the expenses incurred in taking the evidence of any witness in consequence of Article XII, and in giving up and returning seized articles. They reciprocally agree to bear such expenses themselves.

ARTICLE XV.

The present Treaty shall come into force ten days after its publication in conformity with the forms prescribed by the laws of the High Contracting Parties. It may be terminated by either of the High Contracting Parties, but shall remain in force for six months after notice has been given for its termination.

The Treaty shall be ratified, and the ratifications shall be exchanged at The Hague as soon as possible.

ARTIKEL X.

De uitlevering zal geen plaats hebben vóór het verstrijken van vijftien dagen na de in hechtenisneming, en alleen dan, wanneer de ten behoorlijken tijde overgelegde stukken overeenkomstig de wet van den Staat, aan welken de uitlevering is aangevraagd, voldoende bevonden zijn.

ARTIKEL XI.

De voortvlugtige kan echter in hechtenis worden genomen krachtens een bevel, afgegeven door een "Police Magistrate," "Justice of Peace," of andere bevoegde overheid in elk der beide landen, op zoodanige aangifte of klagt, en zoodanige bewijsstukken, of na zoodanig onderzoek als, naar het oordeel van den persoon, die het bevel verleent, termen tot het verleenen daarvan zou opleveren, indien het misdrijf gepleegd of de aangehoudene veroordeeld ware binnen het ressort van het grondgebied der twee Contracterende Partijen, waarover hij regtsmagt uitoefent: Mits evenwel in dat geval in het Vereenigd Koningrijk de beschuldigde zoo spoedig mogelijk voor een "Police Magistrate" te Londen worde gebragt. Hij zal ontslagen worden zoowel in het Vereenigd Koningrijk als in Nederland, indien binnen veertien dagen geen aanvrage tot zijne uitlevering door den Diplomatieken Agent van zijn land gedaan is.

ARTIKEL XII.

Wanneer het in eene, by eenig hof of bij eenige regtbank van een der beide landen aanhangige strafzaak, wenschelijk geoordeeld wordt een getuige in het andere hand te hooren, zal zoodanig verhoor plaats hebben voor de regterlijke overheid, overeenkomstig de wet, ten deze van kracht in het land, waar de getuige zich bevindt.

ARTIKEL XIII.

Al de in beslag genomen goederen, die zich op het oogenblik zijner aanhouding in het bezit van den uitteleveren persoon bevonden, zullen, indien de bevoegde overheid van den Staat aan welken de uitlevering wordt aangevraagd de overgave daarvan bevolen heeft, worden overgegeven op het oogenblik, waarop de uitlevering plaats heeft; en die overgave zal zich uitstrekken niet alleen tot de gestolen voorwerpen, maar ook tot alles wat tot bewijs van het misdrijf kan dienen.

ARTIKEL XIV.

De Hooge Contracterende Partijen doen afstand van alle terugvordering van de kosten, door haar gemaakt voor de aanhouding en gevangenhouding van den uitteleveren persoon en voor zijn vervoer tot aan boord van een schip, gelijk mede van de terugvordering van de kosten veroorzaakt door het hooren van getuigen naar aanleiding van Artikel XII, en door het over en weder zenden van in beslag genomen voorwerpen. Zij stemmen er wederkeerig in toe die kosten zelve te dragen.

ARTIKEL XV.

De tegenwoordige overeenkomst zal in werking treden tien dagen na hare afkondiging, overeenkomstig de vormen bij de wetten der Hooge Contracterende Partijen voorgeschreven. Elke der Hooge Contracterende Partijen zal haar kunnen opzeggen, maar zij zal van kracht blijven gedurende zes maanden, nadat van die opzegging zal zijn kennis gegeven.

De overeenkomst zal zoo spoedig mogelijk bekrachtigd worden en de bekrachtigingen zullen uitgewisseld worden te 'sGravenhage.

In witness whereof the respective Plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

No. 1999*G.*—*Fort William, the* 24*th September* 1874.—*General.*—The Notification No. 1706G, dated the 14th ultimo, appointing Mr. J. F. Needham Assistant to the Political Agent in the Naga Hills, and investing him with the powers of a Magistrate of the 1st Class, will have effect from the 31st December last.

No. 2010 *G.*—His Excellency the Viceroy and Governor General in Council is pleased to publish for general information a Proclamation issued by the Maharaja of Jodhpoor, in which His Highness announces that he has consolidated and revised the Tariff of duties charged on goods imported to, or exported from, His Highness' territories, with effect from 1st October next. The orders of the Government of India on the report of the Agent to the Governor General for Rajpootana, announcing the Maharaja's intention, are also published.

PROCLAMATION.

Be it known to all merchants and traders as also to all subjects of the British Government and of Native States—

That His Highness the Maharaja of Jodhpoor, with the object of securing comfort and convenience to traders and his subjects, and of removing all unnecessary obstacles which have here and there hitherto hindered trade in Marwar, has been pleased to fix a revised and uniform rate of export, import and transit duties to be levied in future within his dominions from the 1st of October 1874. A separate table of these rates is annexed herewith.

I. Should any merchant or trader offer any resistance to the Customs Authorities or raise groundless objections to the payment of these rates, serious notice of the same will be taken by the Durbar Customs Authorities.

II. These new rates of import, export and transit duties shall be levied at certain specified places within the Durbar limits; and all other dues which Jaghirdars and Bhoomias, &c., have hitherto been in the habit of levying, shall wholly cease; and these Jaghirdars and Bhoomias shall not be allowed to obstruct traders in any way on this account. However, the "Mapa" duties which all traders have been used to pay at places where they effect any purchase or sale shall be levied as before.

III. In lieu of certain duties which in excess of the Durbar's Customs duties, some of the Jaghirdars and Bhoomias have been in the habit of levying on merchandize, an equivalent in cash will be paid to them regularly by the Durbar. These Jaghirdars and Bhoomias shall not in future be permitted to hinder merchants in any way on this account, and if they do, traders are directed to report the same to the Durbar Customs Authorities or the "Kutchery," when immediate steps will be taken by the Durbar to punish the offenders.

IV. For the relief of his subjects, His Highness the Maharaja has been graciously pleased to wholly remit transit duties on corn within his dominions. All Jaghirdars and Bhoomias and the Durbar Customs Authorities are prohibited from in any way molesting this trade within his dominions.

V. All Charuns, Bhatts, Brahmins, Prohuts, Gansuns, Samees, as also Caublees, Beloochees, Sikhs, &c., of foreign States shall without exception, whether they export, import or pass goods through Marwar, take the Durbar "Purwanna" (Pass) from the 1st October 1874, and pay according to the newly fixed rates. Should any one raise objections or plead former custom, their complaint shall not be allowed. All are bound to pay according to the new rates.

VI. Should any Customs Official of the Durbar infringe these rules, the same should be duly reported to the Durbar, when after a due investigation immediate steps shall be taken to remedy the evil complained of.

In Marwar State, Customs duties differ in different Pergunnahs, *i. e.*, in some they are high, while in others low, but the following are the average Customs duties which will be levied on all articles

either exported, imported or passing through the Marwar Territory from the 1st October 1874, at the following rate per maund, and a seer will be counted equivalent to 80 Rupees in weight :—

ARTICLES.	Present Customs duties which are to be suspended from the 1st of October 1874.			Customs-duties which will be levied from the 1st October 1874.		
	Import duties.	Export duties.	Transit duties.	Import duties.	Export duties.	Transit duties.

From the Secretary to the Government of India in the Foreign Department, to the Agent to the Governor General in Rajpootana,—No. 2009 G, dated 24th September 1874.

I am directed to acknowledge the receipt of your letter No. 3361—2625 *G*, dated 26th ultimo, in which you report that His Highness the Maharaja of Jodhpoor has consolidated and revised the tariff of duties charged on goods imported into, or exported from, His Highness' territories, so as to reduce the rates generally and to remove the tax on grain altogether.

2. You are requested to convey to the Maharaja an expression of cordial approbation with which these enlightened measures are viewed by the Governor General in Council, and I am to inform you that a copy of this letter with a copy of His Highness' Proclamation and annexed table of rates, will be published in the *Gazette of India*.

The following order, issued by the Government of India in the Financial Department, is republished for general information :—

LEAVE AND ALLOWANCES.

No. 5856.—Fort William, the 26th September 1874.—The Governor-General in Council is pleased to direct the publication of the following correspondence between the Secretary of State for India and the Government of India :—

Public Despatch to the Secretary of State, No. 71, dated the 23rd October 1873.

Public, to Secretary of State, No. 34, dated 15th March 1874.
Public, from Secretary of State, No. 36, dated 27th April 1871.

IN continuation of the correspondence noted in the margin, we shall be obliged if Your Grace will instruct all newly appointed Members of the Covenanted Civil Service, who have been posted in England to the North-Western Provinces, Pubjab, and Oudh, and who intend to come out to India *viâ* Bombay, to enquire at the Secretariat of the Bombay Government for any orders that may be awaiting their arrival, and in the event of their not receiving at Bombay any orders as to their ultimate destinations, to proceed at once to Allahabad, and there to report themselves both to the Secretary to the Government of India in the Home Department, and to the Secretary to the Government of the North-Western Provinces. Until instructions for their distribution among the several Governments in Upper India shall have been issued, these Officers will be considered to be attached to the Government of the North-Western Provinces; but it is believed that we shall be ordinarily able to arrange that orders as to the particular destination of each Officer will be awaiting his arrival at Bombay.

Public Despatch from the Secretary of State, No. 152, dated the 4th December 1873.

I HAVE received and considered in Council the despatch of Your Excellency in Council of the 23rd of October, No. 71 of 1873, explanatory of the orders which you wish should be given to every Member of the Civil Service destined for the North-Western Provinces, the Punjab, and Oudh, who may proceed to India *viâ* Bombay.

2. In reply, I have to inform Your Lordship in Council that your wishes on this subject shall receive due attention.

With reference to the foregoing correspondence, His Excellency in Council is pleased to declare (in modification of the definition in Rule 1 under Section 2 of Supplement A to the Civil Pension Code, and Rule 1 under Section 7 (*a*) (3) of the Civil Leave Code, of the date of "first arrival in India since the 5th May 1869"), that the date of first arrival in India of a Member of the Bengal Covenanted Civil Service, who is posted in England to

Upper India, and comes out *viâ* Bombay, shall, if he has been instructed by the Secretary of State to enquire at the Secretariat of the Government of Bombay for any orders as to his ultimate destination and receives no such orders there, be held to be the date of his reporting himself at Allahabad to the Secretary to the Government of India in the Home Department, and to the Secretary to the Government of the North-Western Provinces. But if he receives orders at the Bombay Secretariat, the date of his first arrival in India shall be held to be the date of his reporting his arrival at any station or province to which he may be attached by such orders.

The following orders, issued by the Government of India in the Military Department, are republished for general information :—

2nd.—He must produce a satisfactory certificate of good moral character, and be above the age of 20 years.

IV.—QUALIFICATION FOR MOOKHTARS.

10. Every person may be admitted as a mookhtar who shall be qualified as hereinafter prescribed, that is to say—

(1.) If he shall be qualified to be admitted as a pleader of either grade: Provided that his application to be admitted as a mookhtar shall be made within one year from the time of his obtaining such degree or license, or within such further time as the Court shall for any special reason allow; or

(2.) If he shall produce a certificate from the Examiners that he has passed an examination in the subjects prescribed from time to time by the High Court for the examination of mookhtars. Such subjects shall, until further notice, be as follows :—

Code of Civil Procedure.	Code of Criminal Procedure.
Law of Limitation.	Registration Act.
Stamp Laws.	Evidence Act.
Small Cause Court Act.	Contract Act.
Penal Code.	

11. In order to qualify a person to present himself for the examination required by these rules for mookhtars—

(1.) He must hold a certificate of having passed the Entrance Examination of the University of Calcutta, Madras, or Bombay, or a certificate of having passed the Vernacular or Minor Scholarship Examination, or some other public examination certified by the Director of Public Instruction or by an Inspector of Schools to be equivalent thereto.

(2.) He must produce a satisfactory certificate of good moral character, and be above the age of 20 years.

V.—EXAMINATIONS.

12. Every candidate for examination for pleadership of either grade, or for mookhtarship, shall, on or before the 1st of November in each year, apply to the Board of Examiners for leave to present himself at the ensuing examination, and he shall establish to their satisfaction that he possesses the qualifications prescribed for such candidates.

13. Such application is not to be transmitted to the Board of Examiners direct, but is to be filed before the said 1st day of November in the Court of the District Judge within whose jurisdiction the candidate resides or is employed (Calcutta, for this purpose, being taken to be within the District of 24-Pergunnahs), accompanied by the necessary documents and papers. The Judge shall thereupon enquire into the validity of the certificate of character presented by the candidate, and shall satisfy himself as to the identity of the candidate, and he shall, on or before the 15th November, transmit to the Board of Examiners all such applications with the documents accompanying, together with a list of the applications and annexures, and with his opinion in each case as to the sufficiency of the testimonials produced, and any other information which he may think it needful in any case to communicate.

14. The Board of Examiners shall thereupon take the case of each candidate, with the report of the District Judge, into their consideration, and shall determine whether or not the candidate is possessed of the necessary qualifications. If the candidate is found qualified, the Board shall cause his name, the name of his father, his age and place of residence, and other needful particulars, to be entered in a register, with a declaration that he is permitted to appear at the next ensuing examination at * * * *

15. An extract from the register shall be forwarded to the District Judge for delivery to the candidate. The Judge shall cause a notice of his having received such extracts to be stuck up in his Court-house, and shall deliver them to the candidates on application.

The District Judge, in carrying out this Rule and Rule 13, shall conform to such instructions as he may receive from the Board of Examiners through their President or Secretary.

16. Before the date of examination, every candidate shall pay into the Government Treasury of the 24-Pergunnahs, or of the place where he is to be examined, the fee prescribed by Rule 22, and shall at the same time present to the Officer in charge of the Treasury the extract from the register furnished to him under Rule 10, and the treasury receipt for the fee shall be endorsed thereon. Every candidate for examination shall produce to the Examiners the extract from the register, with the treasury receipt so endorsed thereon.

VI.—ENROLMENT.

17. Any person who shall have qualified under these rules, and who shall desire to be admitted to practice, shall pay into the Government Treasury of the district in which he shall intend to practise the fee prescribed by Rule 22, and shall, on presentation of the certificate, of the Examiners or of his diploma, and the receipt for the said fee, be entitled to apply to the High Court for admission and enrolment.

18. The application, together with the certificate and receipt required by Rule 17 shall be presented to the Judge of the District in which the applicant intends ordinarily to practise, and shall be forwarded by the Judge to the Registrar of the High Court, with such remarks as he may think fit to make thereon.

19. The name of the applicant and his place of abode, together with his father's name and place of abode, shall be affixed in some conspicuous place in the Court-house of the Judge to whom the application is sent, and also in the High Court, at least six weeks before the applicant is admitted to practise.

20. The High Court may call for evidence of the respectability of the applicant in any case in which it may be deemed necessary.

21. Upon the applicant's being admitted and enrolled by the High Court, a certificate to that effect shall be forwarded by the Registrar of the High Court to the Judge of the district, who, upon the applicant's delivering and leaving with him a declaration in writing signed by the said applicant in conformity with the recital in the form of certificate given in the 2nd Schedule to Act XX of 1865, shall grant him a certificate as required by the said Act.

VII.—FEES.

22. The fees payable previous to examination and on application for enrolment shall be as follows :—

	Pleader, Higher Grade.	Pleader, Lower Grade.	Mookhtar.
	Rs.	Rs.	Rs.
Before Examination	30	20	15
Before Enrolment	25	15	10

VIII.—PENALTIES.

23. If any person having passed the examination entitling him to be admited and enrolled as a First or Second Grade Pleader or as a Mookhtar, and shall fail to apply for such admission and enrolment for a period of one year from the time of passing the examination, he shall not be admitted and enrolled, unless by special order of the High Court the time for such application shall be extended.

24. If any person having been admitted and enrolled as a pleader or mookhtar shall neglect to take out a certificate, or, having obtained a certificate, shall fail to renew it for a period of three years, he shall be suspended, and shall not be entitled to receive a certificate or to have his certificate renewed without further orders of the High Court.

25. Any person who shall hold any appointment under Government, or shall carry on any trade or other business at the time of his application for admission as a Pleader or Mookhtar, shall state the fact in his application for admission, and the High Court may refuse to admit such person, or pass such orders theron as it thinks proper.

26. Any person who, having been admitted as a pleader or mookhtar, shall accept any appointment under Government, or shall enter into any trade or other business, shall give notice thereof to the High Court, who may thereupon suspend such pleader or mookhtar from practice, or pass such orders as the said Court may think fit.

27. Any wilful violation of any of the above rules shall subject a pleader or Mookhtar to suspension or dismissal.

*** The Rig-Veda, the oldest book of Indian literature, has very properly been made one of the principal class-books for those who study Sanskrit in the schools and colleges in India, and though at present a scholar-like knowlege of the Vedic hymns is in the examinations required of the more advanced students only, yet, as soon as editions, translations, grammars, and dictionaries shall have rendered the study of these ancient documents more accessible, I doubt not that the time will come when no one in India will call himself a Sanskrit scholar who cannot construe the hymns of the ancient Rishis of his country.—*Extract from Preface.*

TRAINING NATIVE WOMEN IN PRACTICAL MIDWIFERY.

No. 3558, dated Calcutta, the 23rd September 1874.

From—RIVERS THOMPSON, ESQ., Secretary to the Government of Bengal,
To—The Surgeon-General, Indian Medical Department.

I AM directed to acknowledge the receipt of your letter No. 814, dated the 5th instant, with enclosures, containing a report from Dr. Charles, Professor of Midwifery in the Medical College, of the result of the experiments made for training native women in practical midwifery.

2. In reply I am to say that the Lieutenant-Governor is of opinion that it will certainly be undesirable, in the present stage of the experiment, to incur any expenditure in erecting buildings for the accommodation of the *dhais* in the Medical College. So far as the experiment has gone, the failure appears to have arisen from the difficulties experienced in obtaining apt pupils for instruction in practical midwifery.

3. The suggestion made in paragraph 4 of your letter, to inform district officers of the state of the case with a view to obtaining their co-operation, and that of influential landowners, in securing the attendance of native women for the purposes of instruction, will be adopted. A circular on the subject will be addressed to all Commissioners of divisions.

Circular No. 43, dated Calcutta, the 23rd September 1874.

From—RIVERS THOMPSON, ESQ., Secretary to the Government of Bengal,
To—The Commissioner of

IN continuation of this office Circular No. 150, dated the 12th December 1873, I am directed to forward for your information, and for communication to the district officers subordinate to you, a copy of the correspondence noted in the margin, from which it will be seen that the experiment made in the Medical College for training native women in practical midwifery has proved unsuccessful, in consequence of the difficulties experienced in obtaining apt pupils for instruction. I am to request that you will be so good as to invite the co-operation of all district officers and influential landowners in securing the attendance of suitable native women for the purposes of instruction.

From Surgeon-General, Indian Medical Department, No. 814, dated 5th September 1874 (with enclosures).
To Surgeon-General, Indian Medical Department, No. 3558, dated 23rd September 1874.

No. 814, dated Fort William, the 5th September 1874.

From—H. B. BUCKLE, ESQ., C.B., M.D., Deputy Surgeon-General, Indian Medical Department,
To—The Secretary to the Government of Bengal, Judicial Department.

WITH reference to your letter No. 5120, dated 12th December 1873, and annexure, in regard to the training of native women in practical midwifery, I have the honor to state that, on its receipt, I considered it desirable to communicate with the Principal of the Medical College, with a view to obtaining information on the working of the scheme for educating *dhais* in that institution, and in order to determine whether it would be advisable to provide building accommodation for them or not.

2. The enclosed report,* (which was originally called for in the concluding paragraph of Bengal Government letter No. 2429, dated 1st August 1871,) from the Professor of Midwifery, was received in April last, and I regret to say that as there was then a very heavy pressure of work in this office, it was put aside at the time, and has unfortunately been overlooked since; hence the delay in replying to your letter under acknowledgment.

* Dated 30th March 1874, with annexure, No. 34, dated 11th April 1874, from the Principal of the Medical College, and memorandum No 262, dated 13th April 1874, from the Deputy Surgeon-General, Presidency Circle. (Copies annexed.)

3. It will be observed that Dr. Charles considers the scheme for educating *dhais* at the Medical College to be a failure, since his endeavours to obtain pupils have been unsuccessful; and thinks that it would be undesirable to erect buildings for the accommodation of *dhais*, unless some assurance is given to Government that pupils will be forthcoming; and with that view suggests that district officers and influential landowners be asked to co-operate in obtaining women for instruction; and these views are concurred in by the Principal of the Medical College.

4. I myself think that, if the scheme is to be continued, it is absolutely necessary that something should be done; and I see no other way of accomplishing what is wanted than in the manner indicated by Dr. Charles.

5. Drs. Chevers and Charles are, and have been from the commencement, opposed to teaching at the Medical College the low standard of education desired for these women, viz., a little better training than what is possessed by those practising as *dhais*, who are guided solely by their own experience and native tradition.

6. The Principal of the Medical College and the Professor of Midwifery would, I believe, prefer carrying out an elaborate course of obstetric instruction by having well-educated women as pupils, who would eventually turn out highly educated midwives.

7. Under the circumstances represented, it is for Government to consider whether it is desirable to erect new buildings, or to defer doing so until some guarantee is given, as already suggested, that there will be no

difficulty in providing pupils for instruction in midwifery. It will probably be well to hold for the present.

8. I may add that *dhais* have not been put to any inconvenience in regard to accommodation, as they have continued to live under the same arrangements as formerly.

Dated Calcutta, the 30th March 1874.

From—T. EDMONSTONE CHARLES, ESQ., M D., Professor of Midwifery,
To—The Principal, Medical College, Calcutta.

IN continuation of my previous reports on the same subject, and with special reference to memorandum No. 5568A, dated 10th January 1874, from the Secretary to the Surgeon-General, I have the honor to report as follows.

2. My last report, dated 24th May 1873, gives fully the latest information at my disposal; and I beg also to refer to my report dated 8th February 1872, in which a large amount of information on the experiment of training native midwives will be found.

3. On the receipt of the expressed wish of Government that the experiment should be further continued, a new class was formed in September 1873, and we had no difficulty in finding six pupils.

4. As soon as the class was got together, I discovered that all the women who presented themselves for admission were Christians, and tried to remedy the inequality of creeds by keeping two vacancies to be filled by Hindoos or Mussulmanees.

Not a single woman of either class was forthcoming, and I had to fill up the two vacancies with Christians.

5. I have appealed to representative gentlemen of both the Hindoo and Mahomedan community; and though they express warm sympathy in the movement, and express their willingness to assist me, yet they all declare that they are powerless in the matter of securing pupils.

6. I believe that I can, at least for a short time, secure Christian pupils, as they seem to have little prejudice in practising as *dhais*, but I beg to be allowed to put it on record that for years I have tried to carry out the wishes of Government in securing pupils. I have tried in every direction and failed, and I beg to be relieved from further responsibility in the matter of recruiting this class. Should it be determined on that the attempt is still to be made, I hope that district officers and influential owners of land may be invited to find women for instruction as *dhais*.

7. Of the present class I have to report as follows:—On the 17th March 1874, a committee was assembled consisting of the Professor of Midwifery, the Native Teacher of Midwifery at the Sealdah Medical School, and the Goodeve Scholar in the obstetric wards of the Medical College. The pupil *dhais* were invited to present themselves for examination, and three out of the six responded to the call. One of them, Nidanee, showed nearly complete ignorance of the subject, and failed to pass; the other two made a creditable appearance, and obtained certificates to practise. Of these two, a woman named Jane Scott (a Bengalee) passed well, while another woman, Aunno Moonee Dassee, showed an acquaintance with her subject that would have done credit to her at a much more ambitious examination than that as a Bengalee *dhai*.

8. The last remark leads me to draw again attention to the fact, that given a Bengalee woman who can read a little, and who has previously acquired the art of profiting by instruction, it is not a difficult matter to teach her the rudiments of midwifery. On the other hand, given a woman who does not start from the same vantage ground, public money may be spent for months and years without producing, as far as I can see, any visible result.

They may be simply stated as incapable of assimilating an idea, however carefully it may be put before them.

9. One elderly woman, of whom we had experience in the obstetric wards, was engaged to look after the pupil *dhais*, under the impression that the accommodation for the *dhais* would be provided at once. Her influence over the women can have been little, as they have not been continuously under her eye.

10. It seems to me very doubtful whether, with these additional facts before them, the Government will feel in a position to carry on the experiment. As we cannot secure a succession of pupils, I question the propriety of providing accommodation for Christians only; as, from all I can learn, the time is not far off when the supply of even this class of pupils will cease. I beg most respectfully to be permitted to urge that, with the responsibility which the charge entails, it is most unjust to compel me to carry on the scheme any longer without the safeguards and assistance which I consider necessary.

11. I have kept in the background my own views and those of Dr. Chevers, that it is undesirable to continue the experiment in connection with the Medical College; but in case the general purport of my willingness to carry out the orders of Government might mislead, it cannot be susceptible of misconstruction to state that my own views remain unchanged.

No. 34, dated Fort William, the 11th April 1874.

From—NORMAN CHEVERS, ESQ., M.D., Principal, Medical College,
To—The Deputy Surgeon-General, Presidency Circle.

WITH reference to your office memorandum No. 5101, dated the 7th January last, I have the honor to submit that, without reverting to arguments previously advanced, I quite agree with Dr. Charles* in considering that, if this experiment is to be continued, it appears absolutely necessary that some measures, such as he recommends, should be adopted, with a view to obtaining Hindoo or Mahomedan pupils who have already received the rudiments of education.

* Report annexed in original

Memo. No. 262, dated Calcutta, the 13th April 1874.

From—H. B. BUCKLE, ESQ., C.B. M.D., Deputy Surgeon-General,
To—The Secretary, Indian Medical Department.

WITH reference to memorandum No. 5568A, dated 10th January, forwards letter No. 34 of the 11th April, submitting a report of the working of the scheme for instructing native *dhais* from the Professor of Midwifery. In any sense, for the benefit of the native community, the scheme, as conducted at the Medical College Hospital, has proved a complete failure. It might succeed better in a hospital for natives only than at one receiving both Europeans and Native patients, and the attempt should be made to get native *dhais* to come for instruction, not other classes.

ANNUAL REPORT OF THE COMMISSIONERS FOR MAKING IMPROVEMENTS IN THE PORT OF CALCUTTA, FOR THE YEAR 1873-74.

RESOLUTION.

GENERAL DEPARTMENT.

MARINE.—CALCUTTA PORT TRUST.

No. 3064.—*Calcutta, the 25th September* 1874.

READ—

The Annual Report of the Commissioners for making Improvements in the Port of Calcutta for the year 1873-74.

1. *New Works.*—The Commissioners spent Rs. 12,67,301 on new works during the year, and added greatly to the convenience of the port by completing the connection of the jetty heads, by the construction of five export sheds, the introduction of Armstrong hydraulic cranes, and by the completion of the embankment for the line of road and wharf between Armenian Ghât Railway Station and Aheercetollah Ghât. Much progress has also been made in taking up land for the extension of the embankment from the latter ghât to the northern limits of the port.

Now that the great works for the improvement of the port have so far advanced, it seems a favorable opportunity for taking a rapid survey of the various improvements which have been effected in the arrangements of the port during the last ten years. Previous to the cyclone of 1864, the conveniences of the port consisted of a set of moorings and some heave-up and anchor-boats. In consequence of the destruction of the moorings, and the loss of shipping property by the cyclone of that year, attention was directed to the necessity of making further provision for the trade of the port, and for the security of the shipping frequenting it. The almost entire destruction of the moorings led to the replacement of the old ones by the new and powerful screwpile moorings, with which the port is now furnished, and the strength of which was tested by the cyclone of 1867, during which trial they were found to have held admirably. The next step was the enactment of a law (Act X, B.C., 1866) empowering the Justices of the Peace for the town of Calcutta to make improvements in the port. This Act proved inoperative owing to an omission, which was subsequently supplied by another Act, under the operation of which the Public Works Department constructed four screwpile jetties with cranes and sheds for the accommodation of the sea-going trade, and a road and wharf for the convenience of the inland trade between the Mint and Aheereetollah Ghât. That department had also commenced the construction of two other jetties, when, in October 1870, these works were handed over to the Port Commissioners, appointed under Act V of 1870, who were vested with powers to carry on the improvement of the port. The port has now seven jetties fitted with steam and hydraulic cranes, and supplied with sheds, tramways, and other improved appliances adapted to facilitate the increasing trade of the port. The jetty-heads have been connected so as to form a continuous wharf, occupying nearly the whole of the space between Colvin's Ghât and the Railway Station; and wharves have been made for the country trade, occupying the remainder of the space between Chandpal Ghât and Aheereetollah Ghât. These will be extended as speedily as possible to the northern boundaries of the port at Cossipore.

These works, excluding the screw moorings and other purely port appliances, have cost a sum of Rs. 34,83,473, of which Rs. 23,50,000 have been raised by loans repayable in thirty years, and the remaining Rs. 11,33,473 have been met out of revenue. Rs. 1,13,768 of the debt have also been repaid.

The whole block of the port,—moorings, boats, and other appliances—was made over to the Port Commissioners at an estimated charge of Rs. 17,65,000, which is treated as a book debt, on which interest alone is charged. In addition to this, the Commissioners have spent Rs. 1,25,146, chiefly in providing a dredger and steam-launch.

The Lieutenant-Governor is glad to see that the application of the dredger promises to remove the anxiety which for some time existed in regard to the silting up of the jetties. His Honor would wish to have a special report on the subject, now that some experience has been had of the working of the dredger during the freshes.

2. *Jetties.*—The net revenue realized from working the jetties during the year was Rs. 1,53,361. Although one jetty more than in the preceding year was at work, this is a slight decrease on the amount realized in the two previous years. This decrease is fully accounted for by a decrease in the number of vessels unloading at the jetties. During the ensuing year, however, when ships will both load and unload at the jetties, it is anticipated that there will be an improvement in the revenue.

With reference to the statements made in paragraph 23, the Lieutenant-Governor is satisfied that the Port Commissioners have used their best efforts to facilitate the delivery of consignments to consignees; but it would, no doubt, be more satisfactory if some plan were adopted for securing to consignees of goods "the same facilities for obtaining delivery of their consignments" during the Doorgah Poojah holidays, as are afforded by the Custom House in enabling a ship "to enter at the Custom House and discharge her inward cargo into the jetty sheds."

In order to obviate an inconvenience which has been complained of, the Commissioners have, since the close of the year, submitted a new bye-law, under which consignments of iron will in future be regulated.

3. *Working of the Cranes.*—According to the statement in paragraph 30 of the report, between two and three months (reckoning 12 hours to the day) were lost in working the cranes, owing to avoidable causes. To provide against this loss, it is most desirable that the Commissioners should employ their own stevedores, and that they should themselves undertake the duty of discharging cargoes. The Lieutenant-Governor desires to be informed whether the Commissioners think that the time has arrived for him to give orders, under Section 60 of Act V of 1870, for effecting this object. His Honor will be prepared to give the Commissioners the fullest possible assistance in this matter.

The plans and estimates for the floating crane are now under the consideration of this Government.

4. *Inland Vessels' Wharves.*—The net revenue derived from the inland vessels' wharves amounted to Rs. 1,51,109, which was less than that of 1871-72, but a slight improvement on that of 1872-73.

The statement of tolls collected gives the following figures as the receipts on account of the articles against which they stand during the last three years:—

	1873-74.	1872-73.	1871-72.
Jute, hemp, &c.	31,726	40,989	26,140
Grains	23,682	32,912	17,675
Seeds, &c.	28,617	4,176	35,192
Tobacco	4,423	3,613	1,725

The variations in these figures are accounted for in some measure in the following extracts from the Bengal Annual Administration Report for 1872-73:—

"The fall in the seed-trade was due in part to the shortness of the seed crops in the Ganges valley and elsewhere. In the preceding year (1871-72) the value of the seeds exported fell off by £835,000, and now it has fallen by £898,483 more. The exports to Great Britain and America, our principal customers for seeds, have fallen off in about equal proportions."

"The Collector of Customs notes that the rapeseed crop was a failure, and that mineral oils are largely taking the place of rapeseed oil in Europe."

"The increase in the estimated value of the jute exports is very small, but the increase in the quantity of jute exports was very large. The jute produce of the year under review was so large that the price went down nearly one-half, and, as a consequence, there has been a reduction in the area sown with jute during the current year."

"The large export of rice to Java was a new trade, and was due apparently to the partial failure of the crops in that island."

"The tobacco export to Europe is almost a new trade. The Collector of Customs writes: 'This increase has been owing to a trial shipment having been favorably reported on for the German market, which is supplied through London.'"

5. *Working of the Port.*—The accounts of the port show a net revenue of Rs. 41,497 in 1873-74, as compared with Rs. 1,47,852 in 1872-73. The decrease is owing chiefly to the reduction in charges made last year. Had the trade not been affected by the famine, there would have been a falling off in the number of vessels entering the port; but the famine necessities operated so as to cause an increase of 91 in the number of steamers visiting the port, and this increase, though counterbalanced by a decrease of 63 in the number of sailing vessels, produced an increase in the gross tonnage of the port of 58,976 tons.

The remarks in paragraph 43 do not seem to explain in any way the statement of accounts given in paragraph 35, but the Lieutenant-Governor understands that an expenditure of upwards of Rs. 70,000 has been incurred on account of the block of the port during the last year.

He hopes that the inference derivable from the statements made in the report, to the effect that the Harbour Masters are careful in the discharge of their duties, will be borne out by future results. He trusts that the Port Commissioners will take every necessary precaution against the occurrence of accidents.

He also hopes the arrangements made regarding the safety of powder will prove satisfactory. The Legislature will, it is presumed, consider the question of amending the law regarding Government powder when the new Ports Bill comes under discussion.

6. *Strand Bank Lands.*—The net profit derived from these lands has fallen from more than half a lakh of rupees to Rs. 18,525, owing to a large increase of charge on account of control, and on account of expenditure on the extension of the Strand Bank Road to the northern limits of the port.

7. *Bathing Ghâts.*—With reference to Baboo Chotee Lall's Ghât, the Government of India has raised, at the suggestion of the Mint Master, the question of fixing on a site for this ghât in a position more removed from the Mint, and no orders can be given for proceeding with this work until this question has received due consideration.

8. *Miscellaneous Questions.—Paras. 76 to 94.*—These questions have all been discussed separately, and call for no further remark here.

9. The financial aspect of port affairs at the end of 1873-74 may be briefly summed up as below:—

	Rs.
Expended on new works from the commencement	53,73,619
Invested in Government securities on account of Reserve Fund and depreciation account	4,29,775
Total	58,03,394
Debt	40,01,232
Amount expended from revenue	18,02,162
The Commissioners had—	
Surplus revenue from Jetties	1,53,361
" " Inland Vessels' Wharves	1,51,109
" " Port	41,497
" " Strand Bank	18,525
Total	3,64,492

The Lieutenant-Governor is very glad to observe the following testimony borne to the work of the Commissioners by the Chamber of Commerce in its report for the half-year ending 30th April 1874:—

"The Commissioners commenced operations in October 1870, and from that time to the present the duties devolving upon them have been discharged in a manner which entitles them to the most unqualified expression of satisfaction on the part of the commercial public. Whatever they have undertaken has been done promptly and with the utmost efficiency."

The cordial acknowledgments of the Government of Bengal also are due to the Commissioners for their vigilant care of the various interests and affairs entrusted to them.

STATEMENT OF THE BURDWAN MAHARAJAH'S RELIEF OPERATIONS FOR THE FORTNIGHT ENDING 19th SEPTEMBER 1874.

No. 308—S.R., dated Burdwan, the 28th September 1874.

From—C. T. Buckland, Esq., Commissioner of Burdwan,
To—The Secretary to the Government of Bengal, Scarcity and Relief Dept.

In continuation of my No. 257—S.R. of the 2nd instant, I have the honor to submit, for the information of Government, and for publication in the *Gazette*, the statement of the relief operations of His Highness the Maharajah of Burdwan for the fortnight ending 19th instant.

Burdwan Maharajah's Relief Operations—Statement for fortnight ending 19th September 1874.

Burdwan.

The average number of persons fed at the Burdwan food depôt during the past fortnight has been 1,414, which, opposed to the 1,710 of the preceding 14 days, shows a decrease of 300.

Bood-bood.

At Bood-bood also a decrease exhibits itself, 615 being the daily average, against 800 of the last statement.

KEDINA.

At Kedina the same satisfactory state of things occurs, the daily average number, 615 opposing the 815 of the preceding fortnight. In these three places therefore a decrease of 683 daily has occurred. The decrease includes "bhadre log," and is due to a great extent to the harvesting of the aous crop, and the cultivation of the amun after the late rain. General reports are all good. No cases of extreme distress are reported, and at Bood-bood there is not one patient in the depôt hospital.

CULNA.

At Culna the average number has been maintained, and is likely to be so for some time, as the fear of short amun crops keeps up the high price of rice. The condition of the people is however good.

OUTLYING DEPÔTS.

The outlying depôts are mainly feeding beggars and sick. Three of them, viz., Tehatta, Kushedanga, and Gram Culna, will, with the concurrence of the Deputy Collector, be closed within the next fortnight, as the temporary necessity for their maintenance has ceased to exist. The average numbers fed at the five depôts has been 865 daily.

RELIEF WORKS.

The same relief works are maintained, but just now there is no demand for employment. Two hundred and ten persons have been daily employed.

A tabulated statement is annexed.

Statement showing the Daily Average Number of People relieved during the Fortnight ending 19th September 1874.

Number of people working at different relief-works—	
Rassan Bagh	35

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 26th September 1874.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
Burdwan Division.			
1	Burdwan, 28th* Sep. 1874	1·46	Rainfall at Raneegunge 2·52, at Jehanabad 1·45, at Boodbood 2·86, at Culna ·61, at Cutwa nil. Outturn of aous or early rice in Culna 10 annas. Prospects of the amun or late rice in Raneegunge, Jehanabad, and south of Damoodah, very fair. In Cutwa, more rain is wanted; in Bood-bood, a good deal of land about Kanno; and in north, Ausgram is uncultivated. Floods near Gooskarra have done some damage to the standing crops. Fever as before.
2	Bankoora, 26th „ „	0·98	Dry and hot during the early part of the week and showery towards the close. The crops continue to do well. The weather of late has been all that could be desired. The aous or early rice crop is being reaped, and some of the new rice is in the market. General health good.
3	Beerbhoom, 26th „ „	11·96	Wet weather. State and prospects of the crops continue good, abundance of rain having fallen; an interval of clear weather is now desirable. Prices stationary.
4	Midnapore, 26th „ „	2·82	After a break of about ten days, general rain set in again on the 23rd, and has been descending with intervals ever since. The state of the crops is generally favorable; a few more good showers during the next 25 days will secure an amun or late rice crop of rather above than below the average. The aous or early rice crop has also proved rather above than below the average.
5	Hooghly, 26th „ „	1·43	North-east wind for two days, and south and south-east during the remainder of the week. Weather cloudy and stormy on Friday night. Rain at Chunditolah 1·40, Kristonogore ·85 inches. More rain is urgently required for the late rice crop and for the cold weather crops, and for filling the tanks. Aous crop is being reaped.
	Howrah, 26th „ „	2·10	The weather for the last three days has been good, and promises to be persistent. Harvest prospects (of the cold weather crops) have been materially improved by the rain during the week, which has been general over the district. This rain has come too late to make the prospect brilliant in Juggutbullubpore, but it has left a chance of perhaps a fair average crop in this thana. In all other thanas the prospects are decidedly bright.
	Central Districts.		
Presidency Division.			
6	24-Pergunnahs, 28th† Sep. 1874.	3·90	Very hot and close during the first two days of the week, and rainy and cool during the remaining five days. Heavy showers fell during the week, which did great good to the late rice. The harvesting of aous or early rice is all but completed. Fever prevails in Baraset, Barripore, Satkhira, and Busseerhat. It has abated considerably in Diamond Harbour.
7	Nuddea, 26th Sep. 1874	0·72	Hot during the early part of the week, but cool and cloudy with slight rain during the latter half. The weather has of late been all that could be wished for. The floods have been slowly subsiding except in Bongong, which of course is the sub-division last affected. On the whole, the floods have done good to the amun or late rice, and they came too late to hurt the aous or early rice very much. Teel (oil-seed), chillies, arhur (pulse), &c., in the low grounds and in the parts first inundated have been destroyed. Prices still very high, and show no signs of falling. This fact in the face of the generally good prospects in Bengal seems to show that the stocks are really very small, and to confirm the opinion that the aous crop has not been good.
8	Jessore, 26th „ „	2·42	Cloudy and sultry in the early part of the week, and heavy rain at the end. The inundation is subsiding, and it is not thought that the damage will be so serious as was feared. Outside the inundated area, the late copious rain has done much good, and the prospects are on the whole very good. In the north, the sowing of the cold weather crops, kallye (pulse) and peas, is commencing.
Rajshahye Divn.			
9	Moorshedabad, 26th Sep. 1874.	1·70	There has been ample rainfall during the week in almost all parts of the district. The weather was cloudy at the time of report. The late rice crops in the Bhurutpore, Khargram, and Kalliangunge thanas have much improved. The seedlings recently transplanted are also doing well. Reports from other parts are equally favorable. Kalai (pulse) is being sown on low lands from which the floods are receding. No material change in prices since last report.
10	Dinagepore, 25th Sep. 1874.	3·43	Showers all over the district, with hot and sunny intervals. Bhadoi or early crop has been all cut. The prospects of the hymunti or late rice crop are excellent: a bumper crop may be expected.

* Telegram of the 28th September, received on the same day, shows rainfall during the seven days immediately preceding.

RAJSHAHYE DIVISION.—(*Contd.*)	11	Maldah	.....	Return not received.
	12	Rajshahye	.....	Return not received.
	13	Rungpore, 25th Sep. 1874.	1·99	Weather hot during the first part of the week. Since then north-east wind blowing; stormy and cold. Reports of crops favorable. Transplantation coming to an end. Some low ground cultivation has been submerged in places, owing to excess of rain. Telegraphed on the 28th.—Rain since Friday 5 inches and a half.
	14	Bogra, 26th „ „	5·19	During the week there has been again ample rainfall, and the prospects of the crops continue to be excellent. In all probability a bumper amun or late rice crop is expected, though there may be losses from inundation in isolated localities. General health good.
	15	Pubna, 26th „ „	3·09	Weather dry. Heavy rain on 24th and 25th. The damage to the late rice crop by inundation is calculated to be two annas on the average. The prospects of this and other crops continue favorable. Fever continues.
COOCH BEHAR DIVN.	16	Darjeeling, 25th „ „	3·97	During three or four days of the week little or no rain fell, but during the night of the 24th and morning of the 25th, it has been coming down in torrents. The crops continue to progress favorably. The abatement of rain during the early part of the week seems to have been considered as an advantage.
	17	Julpigoree, 25th „ „	7·06	Alternate rain and hot sun, with occasional heavy showers. Nothing could be finer than the prospects of the coming rice crop. Other crops promise well.
		Cooch Behar, 24th „ „	4·82	Wet in beginning of week, afterwards fine. Prospects continue to be good.
		Eastern Districts.		
DACCA DIVISION.	18	Dacca, 28th* Sep. 1874.	2·05	Plentiful rain all over the district. Crops very good.
	19	Fureedpore, 26th „ „	1·75	Excepting on Tuesday and Wednesday, rain throughout the week, and a severe storm on the afternoon of Friday. The water continues steadily falling all over the district, and the amun or late rice is in a very promising condition everywhere. The price of coarse rice is stationary at Goalundo, Bhanga, and Gopalgunge, and has slightly fallen at Fureedpore and Madareepore.
	20	Backergunge, 24th Sep. 1874.	2·65	Clear and hot. Prospects of crops good.
	21	Mymensingh, 25th Sep. 1874.	0·58	Bright and sunny. Heavy rain has again commenced since night of the 23rd, and the prospects of the late rice crop are exceedingly good.
	22	Sylhet	.....	Return not received.
CHITTAGONG DIVN.	23	Chittagong, 24th Sep. 1874.	2·13	Hot and steamy weather, with rain at intervals. The situation is the same as last week, except that transplanting is nearer completion. There has been a fair amount of rain during the week, and the sky is still threatening. Cholera reported from Satkania, in the sudder sub-division.
	24	Noakholly, 24th Sep. 1874	0·06	Weather for most part clear and very warm. The accounts so far received of the aous or early rice harvest are fairly satisfactory. The amun or late rice has been nearly transplanted, and promises well.
	25	Tipperah, 25th „ „	·46	Hot, still, and dry. No rain at Brahmunberiah sub-division. The late rice crop is reported in good condition in the eight southern thanas, but more rain is wanted in the four northern thanas. The outturn of the aous or early rice has been good.
	26	Chittagong Hill Tracts, 22nd Sep. 1874.	1·18	Cloudy every now and then. Excessively hot throughout the whole week. The paddy harvest still continues. Cotton plants are thriving, but they have not recovered the want of rain during July and August. Prospects, on the whole, fair.
		Hill Tipperah, 26th Sep. 1874.	0·25	Hot and cloudy; thunderstorm at 4 P.M., 23rd September. No change to report in the prospects of the crops. More rain wanted.
BEHAR.				
PATNA DIVN.	27	Patna, 28th* Sep. 1874	3·54	Rain from 20th to 26th and 28th September. Weather all that could be desired both for the paddy crop now on the land, and for the future prospects of the rubbee. Every appearance of more rain. Health of the district continues good.
	28	Gya, 26th „ „	0·80	Seasonable weather. Bhadoi or early crops harvested. Sathi paddy being reaped. Rice everywhere promising. Health generally good.

* Telegram of the 28th September, received on the same day, shows rainfall during the seven days immediately preceding.

PATNA DIVISION.—(*Contd.*)			
29	Shahabad, 26th Sep. 1874	0·90	Clear and hot at commencement of the week. Rain during the last two days with high east wind. The *Hatya Nachatra* commenced on the night of the 25th. Cloudy and showery at the time of report, and much cooler. The prospects of all the crops continue excellent. The bhadoi or early crop is coming into the market. The present break in the weather is all that could be desired for the aughani or late rice, and for preparing the land for the rubbee crops.
30	Tirhoot, 26th „ „	0·97	Cloudy and warm. In the Mudhoobunnee sub-division, rainfall during the week is 0·12 inches. Prospects of paddy crops continue to be most excellent, but rain is still required in the high lands. The later sown *gamrhi* continues to be reaped in places; its outturn has been very poor through want of sufficient rain in the beginning of its growth. Telegraphed on the 28th, 15 inches (*sic*) of rain since Thursday noon; the rice crop is looked on as quite safe. In the Tajpore sub-division, rainfall 0·18 inches. Paddy still holds out, but except in the flooded tracts, will yield little or nothing without heavy *Hathya* rains. Amun or late rice still being planted. Tobacco transplanting begun. In the Hajeepore sub-division, bhadoi or early crop has been nearly harvested; it has turned out a splendid crop in all places in which it has not been destroyed by the late floods. The prospects of paddy are favorable, owing to a recent rainfall. In the Setamurhee sub-division, rainfall 0·30 inches. The rice plants are looking healthy. Cholera has abated in Shewhur. Fever prevalent as is usual at this season of the year. Report from Durbhunga has not been received. In the sudder sub-division, bhadoi or early crops have been harvested, and the outturn is expected to be from 10 to 12 annas. The late rain has done much good to the rice crop on high lands, and, if the rain continues a few days more the outturn will be an excellent one. Telegraphed on the 28th from Mozufferpore, rainfall from Friday morning to 6 A.M. of the 28th, 7·75 inches. Rain has been general in the western circle and elsewhere. The makai or Indian-corn has come into the market, and is selling at 23 seers per rupee.
31	Sarun 26th „ „	0·63	Hot and clear in the early part of the week; cloudy with showers since Thursday; both east and west wind. Weather still stormy and threatening. Rain more or less general throughout the district, except within the jurisdiction of Moharajgunge, an outpost of thana Bussuntpore, in the sudder sub-division; and Gopalgunge, an outpost of thana Burowlee; Roghunathpore and Goothni, outposts of thana Durowlee; in the Sewan sub-division, where there has been no rain. On the 21st there was a fall of 42 inches in part of the district where the previous rainfall had only been 22 inches, while at the same time there was none at all a few miles off. The bhadoi or early crops are being harvested and consumed, and coming into the markets. The aghani or late rice in the low lands is still doing well; in the higher lands it is being affected by drought. The late rain will have benefited the rice crop, but more is still anxiously looked for. Manufacture of indigo "khontee" (2nd cuttings) is still going on in some factories. Prices (wheat and common rice excepted) steady.
32	Chumparun, 25th Sep. 1874.	1·10	Very hot, bright, and sunny, with occasional heavy showers. General heavy rain set in on the day of report, much improving the prospects in the east and south-east. Elsewhere they continue most favorable.
BHAGULPORE DIVN.			
33	Monghyr, 26th Sep. 1874	1·98	High wind and rain. There has been a good rainfall during the past two days. The crop prospects generally are excellent.
34	Bhagulpore, 28th* „ „	6·20	Very heavy and general rain throughout the district. Was raining hard at the time of report. Rainfall at Banka, 5·04; Soopool, 11·09; Muddohpoora, 4·40. The aghani or late rice crop throughout is perfectly safe, and must be a fine one, with a little more rain in middle of October. The crop will be far above the average. General health very good.
35	Purneah, 26th „ „	7·43	High wind from east, and rain since Thursday. The late rain will do good to the winter rice crop, which is now secured. There is every prospect of an extraordinarily large harvest.
36	Sonthal Pergunnahs, 26th Sep. 1874.	4·56	Dry in sudder sub-division in early part of the week, then very favorable rain. At Deogurh 1·85; Rajmehal 1·1; Godda 4·32. A little more rain would do no harm in Rajmehal. Prospects everywhere good.
ORISSA.			
ORISSA DIVISION			
37	Cuttack, 28th* Sep. 1874	3·79	Weather continues warm and showery. Crops thriving. Public health good.
38	Pooree, 24th „ „	1·07	Cloudy with slight rain. The early rice crop is ripening, and partly being reaped; and outturn fair in the parts not affected by floods. The late rice crop is being weeded, and also transplanted where it was destroyed by flood. The rivers have fallen, and no fresh damage has been caused. The prospects of the crops are fair. Sugarcane is doing well, and promises a good crop. Mandia, arhur and nowberhi (pulses) are growing well. Teel (oil-seed) is being harvested with an indifferent outturn. Prices stationary. Public health fair.
39	Balasore, 25th „ „	·94	First half of the week hot and dry, followed by a showery day, and two days of constant rain. This rain has been very opportune, and has enabled cultivators to resume their weeding, which had been interrupted.

* Telegrams of the 28th September, received on the same day, shows rainfall during the seven days immediately preceding.

HOTA NAGPORE.			
	South-West Frontier Agency.		
0	Hazareebagh, 25th Sep. 1874.	1·3	Hot and sultry, with rain at intervals. The prospects continue good throughout the district. Gora dhan and murwa (millet) are being cut, and yielding an abundant harvest. Soorgoojah and kurthee are being sown, and other lands are being ploughed for the rubbee. Fever is becoming prevalent, but in other respects the public health is good.
41	Lohardugga, 26th Sep. 1874.	1·30	Seasonable weather. The harvest of bhadoi or early crops has, on the whole, been an excellent one, and the prospects of the late rice crop are very good indeed, but in Chota Nagpore Proper and Palamow. In the latter the lands are now being ploughed for rubbee crops. Prices easy. General health is good.
42	Singbhoom, 25th Sep. 1874.	1·85	Sunny during the first part of the week, cloudy latterly. Very favorable; crops looking exceedingly well. Outturn of gora rice a full average everywhere. General health good.
43	Manbhoom, 26th Sep. 1874.	1·43	Favorable, owing to the continued favorable state of the weather. The prospects of the crops have improved of late. There was a good fall of rain on the 24th instant, which has done much to improve the paddy on the high lands. The strong sun between the showers has had the effect of destroying the Bogi blight, with which the rice crops on these lands were attacked. These now are recovering, and may yet produce a crop, but it is not likely to be more than an 8-anna one. The health of the people and their condition are now good.

The mean barometer as likewise the dry and wet bulb thermometer means are derived from the twenty-four hourly observations made during the day.

The dew-point is computed with the Greenwich constants. The figures in column 10 represent the humidity of the air, the complete saturation of which being taken as unity. The receiver of the lower raingauge is 1½ feet, and that of the anemometer 70 feet 10 inches above the level of the ground. The velocity of wind, as indicated by Robinson's anemometer, is registered from noon to noon.
